6. ISSUES REGISTER

1. **IMDN character length**

- RCC.72 v1.1 section 3.1.1 sets the maximum length for the value of the IMDN.Message-ID to 36 characters.
- GSMA RCS IOT joyn Blackbird Implementation Guidelines ID_5_2 set the maximum length for the value of the IMDN.Message-ID to 32 characters.

IMDN maximum length value needs to ensure interworking and backward compatibility with pre-UP clients.
