OPG #80 Meeting Minutes

Author:	Tom Van Pelt	**Email:**	tvanpelt@gsma.com
		Tel:	+32479232846
Date:	8/2/2022	**Time:**	13:00 – 15:00 GMT
Subject:	OPG #80 Meeting Minutes		
Operator Attendees:			
A1 Telekom Austria	Erich Zillinger	Erich.Zillinger@A1.at	
BT	Milan Lalovic	milan.lalovic@bt.com	
China Unicom	Gao Chen	cheng96@chinaunicom.cn	
KDDI	Toshi Wakayama	to-wakayama@kddi.com	
NTT DOCOMO	Sora Funayama	sora.funayama.ag@nttdocomo.com	
Orange	Rida Zouaoui	rida.zouaoui@orange.com	
T-Mobile US	Murat Karabulut Priyadarshini.Menon	murat.karabulut@t-mobile.com priyadarshini.menon@t-mobile.com	
Telefonica	Alexandre Harmand	alexander.harmand@telefonica.com	
Telus	Mohamed Eldakroury	mohamed.eldakroury@telus.com	
TIM	Antonia Napolitano Mario Madella	antonia.napolitano@telecomitalia.it mario.madella@telecomitalia.it	
Vodafone	Mihaela Ambrozie	mihaela.ambrozie@vodafone.com	
Industry Participants			
Chair Capgemini engineering	Shamik Mishra	shamik.mishra@capgemini.com	
Capgemini engineering	Deepak Gunjal	deepak.a.gunjal@capgemini.com	
Ericsson	Bart van Kaathoven Magnus Olsson	bart.van.kaathoven@ericsson.com magnus.m.olsson@ericsson.com	
GS Lab	Vikram Barate	vikram.barate@gslab.com	
Huawei	Ulrich Kleber	Ulrich.Kleber@huawei.com	
Intel	Neal Oliver	neal.oliver@intel.com	
Microsoft	Bahar Sadegi	bahar.sadeghi@microsoft.com	
MobileEdgeX	Thomas Vits Christoph Goertz	thomas.vits.external@mobiledgex.com christoph.goertz.external@mobiledgex.com	
Nokia	Padmakumar Subramani	padmakumar.subramani@nokia.com	
Optare Solutions	Santiago Rodriguez	srodriguez@optaresolutions.com	
Samsung	Hyesung Kim	hs1207.kim@samsung.com	
ZTE	Zhijun Li	li.zhijun3@zte.com.cn	
GSMA Attendees:	Tom Van Pelt Faisal Zia Hong Liu	tpelt@gsma.com fzia@gsma.com hliu@gsma.com	

Other Attendees:	
Absent / apologies:	

ALL GSM ASSOCIATION MEETINGS ARE HELD IN ACCORDANCE WITH THE GSMA'S ANTI-TRUST AND IPR COMPLIANCE POLICY

Security Classification		
Non-Confidential	Project Team or Group	X

The information contained in this document may be subject to change without prior notice. This document has been classified according to the GSMA Document Confidentiality Policy.

1. GSMA Antitrust Policy and Agenda

GSMA Anti-trust and US entity list stated were noted.

Agenda for the meetings was approved.

2. Timeline for Publication

Only 4 weeks are left until the deadline for finalising the draft/topic CRs. Offline work on the remaining CRs is strongly encouraged to ensure that CRs are mature by the 1st March deadline.

3. Topic C - Capability Exposure (Intel)

Neal presented CR0007R2 on the Capability Exposure Role

- No major comments, but a number of smaller issues still to be addressed
  - more consistent usage of CER abbreviation that is introduced,
  - add missing paragraph and section title from previous revision and
  - use more specific "representational consistency" instead of just "consistency
- CR revision addressing these issues expected for OPG#81, likely enabling the CR to be approved for addition into the baseline CR for OPG.02 v2.0

4. Topic B – Exposure of NW Operator Capabilities Beyond Edge Resources (MobiledgeX)

Thomas presented CR0002R1 and CR0006R1 adding the context of the existing baseline to the changes proposed in the initial revision and introducing a few minor edits to address the comments raised during OPG#78

- No comments were raised during the meeting
- Offline review of the CRs is strongly encouraged though

Thomas presented CR0009 providing the changes proposed to introduce the topic in section 5 of the PRD. Comments were raised:

- For NG.127 a reference should be introduced in the document's table of references rather than adding a link in the body of the document

- The work on NG.135 could be highlighted as something to take into account, but a direct reference should not be used because OPG.02 v2.0 will likely be published before NG.135 is publically available
- OP might also offer the capability to monitor network slices
- It should be made clear that the charging data needs further elaboration when the commercial models for offering network capabilities are more clear

5. Topics A,E,N - Seamless Service Continuity (Capgemini)

Deepak presented CR0004R2 introducing chapter numbering and other changes

- Comments mostly focussed on the flow proposed for section 4.8
    - It needs to have a caption
    - The intention of the background rectangles is unclear and may cause confusion
    - Unlike UE handovers context transfers between edge instances are not atomic which means that there will be a non-zero interval where the UE may have been handed over while the context hasn't (or vice versa). This will require coordination between OP and Application Provider and thus will require application-level support.
    - The SSC mode used will have impact on the flow
    - There may also be other triggers for handovers, e.g. the OP detecting a deteriorated quality of service due to the subscriber's mobility. Other than a changed starting point, the flow will be similar.
- Roaming will be covered in a future revision
- Some editorial comments were raised to the changes to section 5.1 (e.g. bullets without introduction on their intention) and 3.4 (baseline text shouldn't be marked as a change)

6. Topics K – Connectivity Models (Ericsson)

- Bart introduced CR0001R1 addressing some comments raised in OPG#79: Some further comments were made
    - The statement on EPC limitations seems a clarification because from an OP perspective similar requirements would exist on 4G as there are for 5G. As such the statement is better marked as a Note.
    - The derived requirement on the multiple PDU sessions is not aligned with the earlier, generic requirement and would benefit from a clarification to highlight the difference and ensure that it is not overlooked.
    - The comment on wholesale agreements and technical requirements is left in for now to get clarification from Sandra on whether anything should be added, but without clarity on what is needed for those agreements, it is hard to put any formal requirements. Such clarity is expected to come from the upcoming WSOLU workshop and the activities following on from that.

7. AOB

- WSOLU (sub-group of WAS) meeting in Bonn, Germany, Tuesday 15 February 2022 09:00-12:30 CET Operator Platform Workshop
- Draft agenda in the slides. Includes presentation on OPG activities, roaming particular requirements and discussion on commercial principles and charging
- All OPG **members interested in remote participation to notify the GSMA. Meeting details will be shared with those interested.**

#80 Call closed at 15:00 GMT

Action points log

Open action points

Action number	Description	Status	Notes
OPG73.01	Sandra to reach out to TSG chair and confirm what type of devices are in their scope and what is the progress of their work for possible future presentation about URSP rule processing logic	Open	Discussions has started
OPG79.01	All members to review CR0008 for approval by 9 February	Open	

Closed action points
