

Tainan City, the fantastic City in Taiwan

Turning the Cultural Capital of Taiwan into a Smart City.

Dr. Hau Chen Mike Lee Executive Vice President Far Eastone

台南市(Tainan City)

Tainan is the cradle of Taiwan's development, and the hometown of 1.88 million people. Centuries of development nurtures its history and culture. With numerous heritages, historical temples and profound culture, Tainan is regarded the most representative area of Taiwan.

No matter where the tourists are from, domestic or oversea, Tainan always brings a sense of déjà vu and makes them feel like home.

Home- is the atmosphere that attracts the locals to return to their hometown and makes people sentimentally attached to a city.

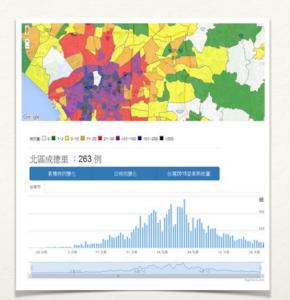

City's Governance

City's Challenges & Technological Governance

Challenges: Dengue fever · Bird flu · Earthquakes · Storms & Typhoons · Outmoded city · Ageing population

Governance: Open data · Big data · Informationized businesses and processes

Cultural Capital Tourist Paradise Technology City

Four Visions

How FET Collaborate with Tainan

- Policy alignment
- Technology mapping
- Public Procurement procedures
- Project execution alignment
- Create real impacts

Innovation

Smart City Operation Center / Cloud Architecture / Open Government Service APP / Open Data Service / IoT Service Platform

Six Plans

Healthcar

Community Health Management Service / Healthcare Service Platform / City Card Health Data Integration / Citizen Self Health Management Platform

Transportation

Smart Transportation Center / 4G Traffic Control Management Platform / 4G Smart Bus Stop

Tourism

O2O Video EC Platform / UGC Management Platform / Advertisement Profit Sharing System / 4G Rich Media Push Platform

Education

Smart Campus APP / Mobile Education Platform / 4G Mobile & Education Promotion Plan / Mobile Education Material Production / 4G & Fixed Dual Network Platform

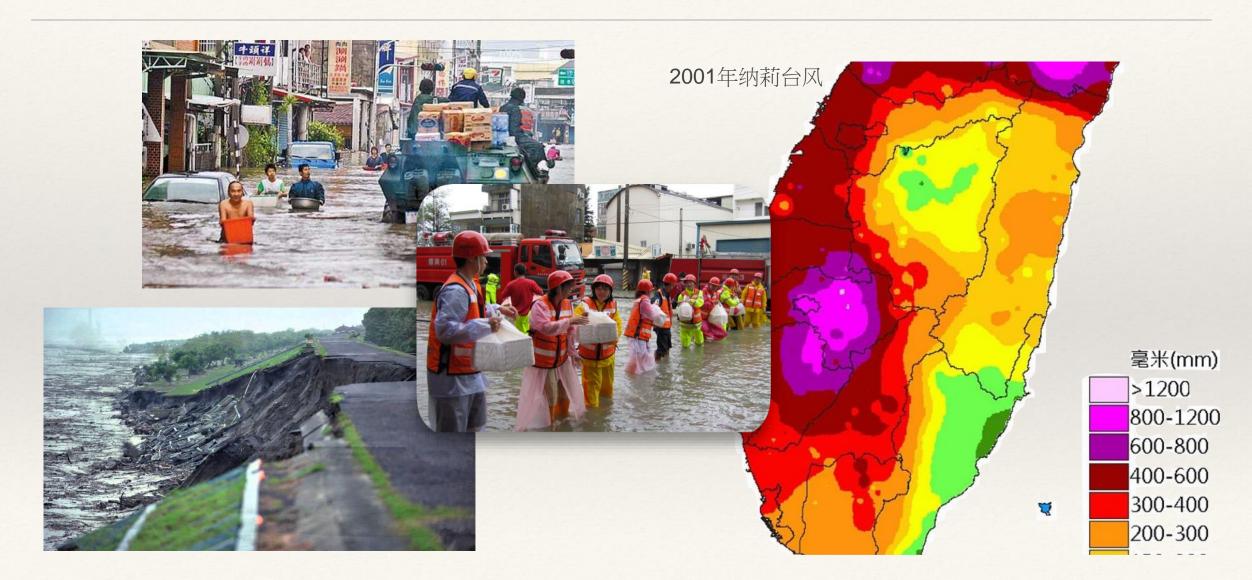

Water Resource

Mobile 4G Remote Monitoring System / Integrated Information Push Service / 4G Backup Network / Disaster Prevention System Integration

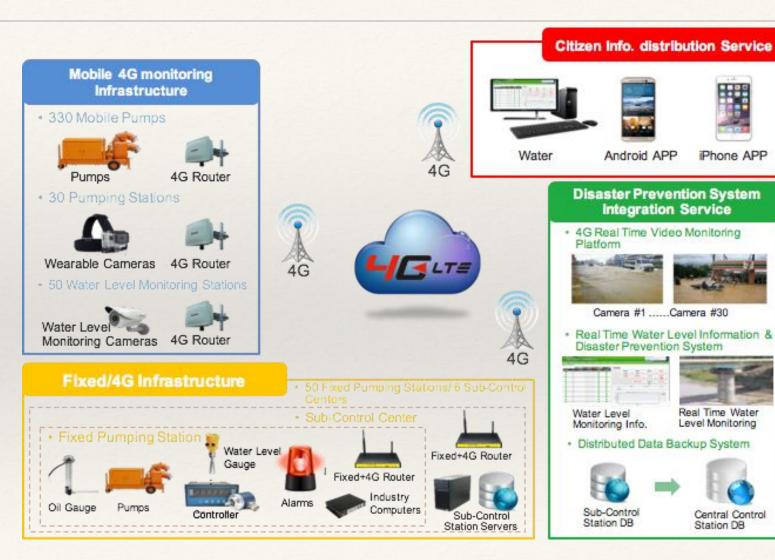

Challenge-Water Conservancy

Solutions-Water Conservancy

Challenge-Transportation

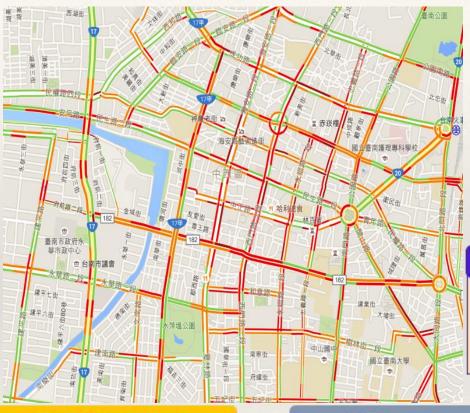

Solutions-Transportation

4G Communication

- 4G Communication Network
- . 4G / Wi-Fi Dual WAN Router
- 4G TTIA Certified Device
- 4G Vehicle Video System

Green Public Transportation

- . T-Bike Operation
- Smart Transportation APP
- 4G Smart Bus Stop

Operation Support

- Automatic Parking Operation Services
- Smart Violation Tow System Operation
- * Traffic Control Operation
- Traffic Data Sharing APP

Payment Integration

- · Citizen Card Payment
- Mobile Payment Integration
- · Multiple Payment Integration

Basic Infrastructure

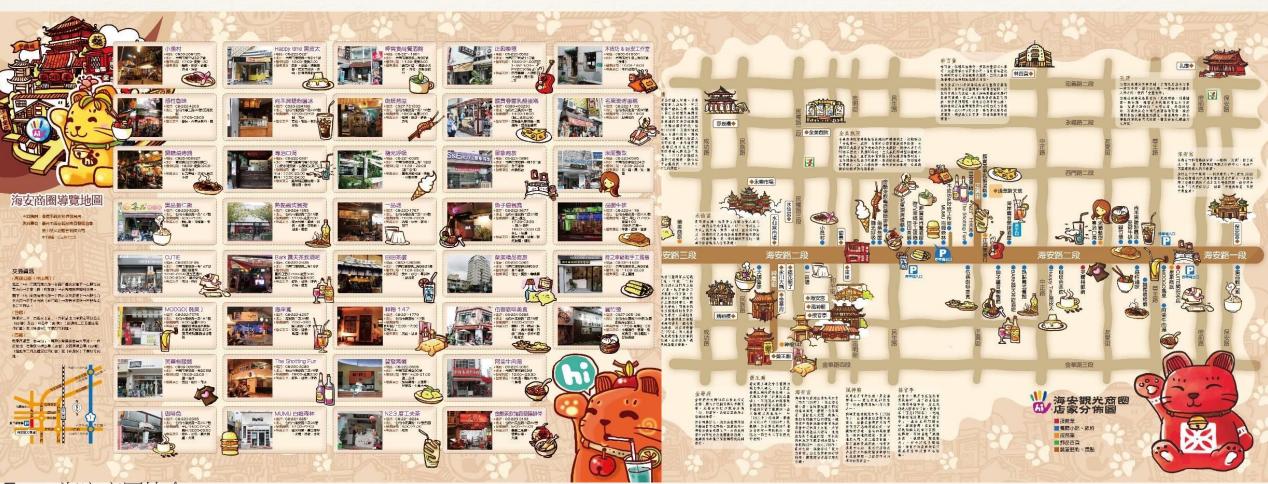

- Data & System Integration with Tainan Transportation Center
- Citizen Feedback System Integration

IoT Sensors

- · eTag readers
- · 4G real time LPR
- · Beacon & APPs
- * 4G Communication Module

Challenge-Tourism

From 海安商圈协会

Solutions-Tourism

- . 20,000 Beacons
- . O2O(Online To Offline)
- Profit-Sharing
- . OpenData/Open API

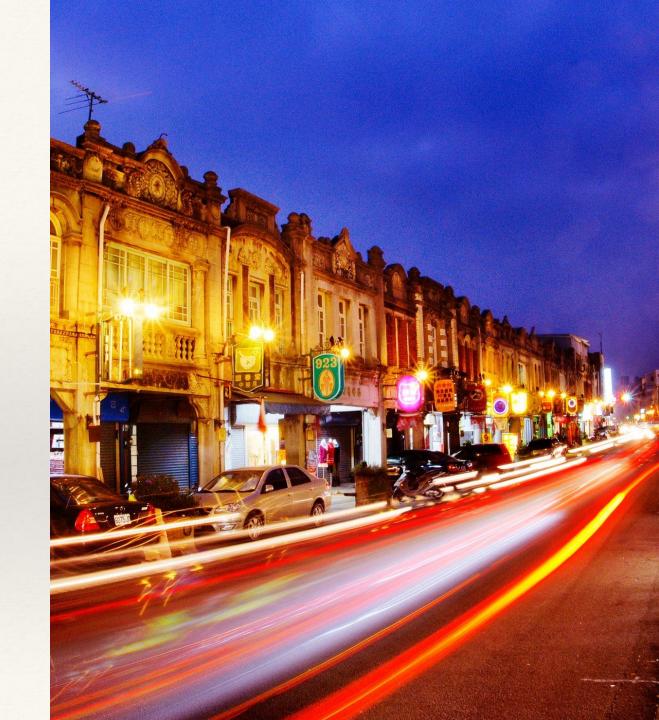

Real Impacts

- Efficient and private cloud platform, a digital information transmission and data sharing platform
- Reliable water disaster management information platform
- Mobile education platform, 5.97% of school students already accessed education videos
- ❖ 300 Healthcare cloud service units all over the city, over 12,000 measurements were taken
- Mobile marketing and O2O ecosystem, 675+ stores, 126,847 app users NT\$10M revenue in 2016

A Sustainable Future of the City

A people-oriented smart city

Respect the environment and lives

Sustainable Smart Living

A city's future built on intelligence and communication

Thank you
