Global Head of Identity & Authentication

Vodafone Carrier Services

THE BUSINESS PROBLEM

WHY USE MOBILE OPERATOR DATA?

ALWAYS ON

Customers are always connected to their mobile phone.

REGULATED INDUSTRY

ID Verification, Security & Privacy is in our DNA

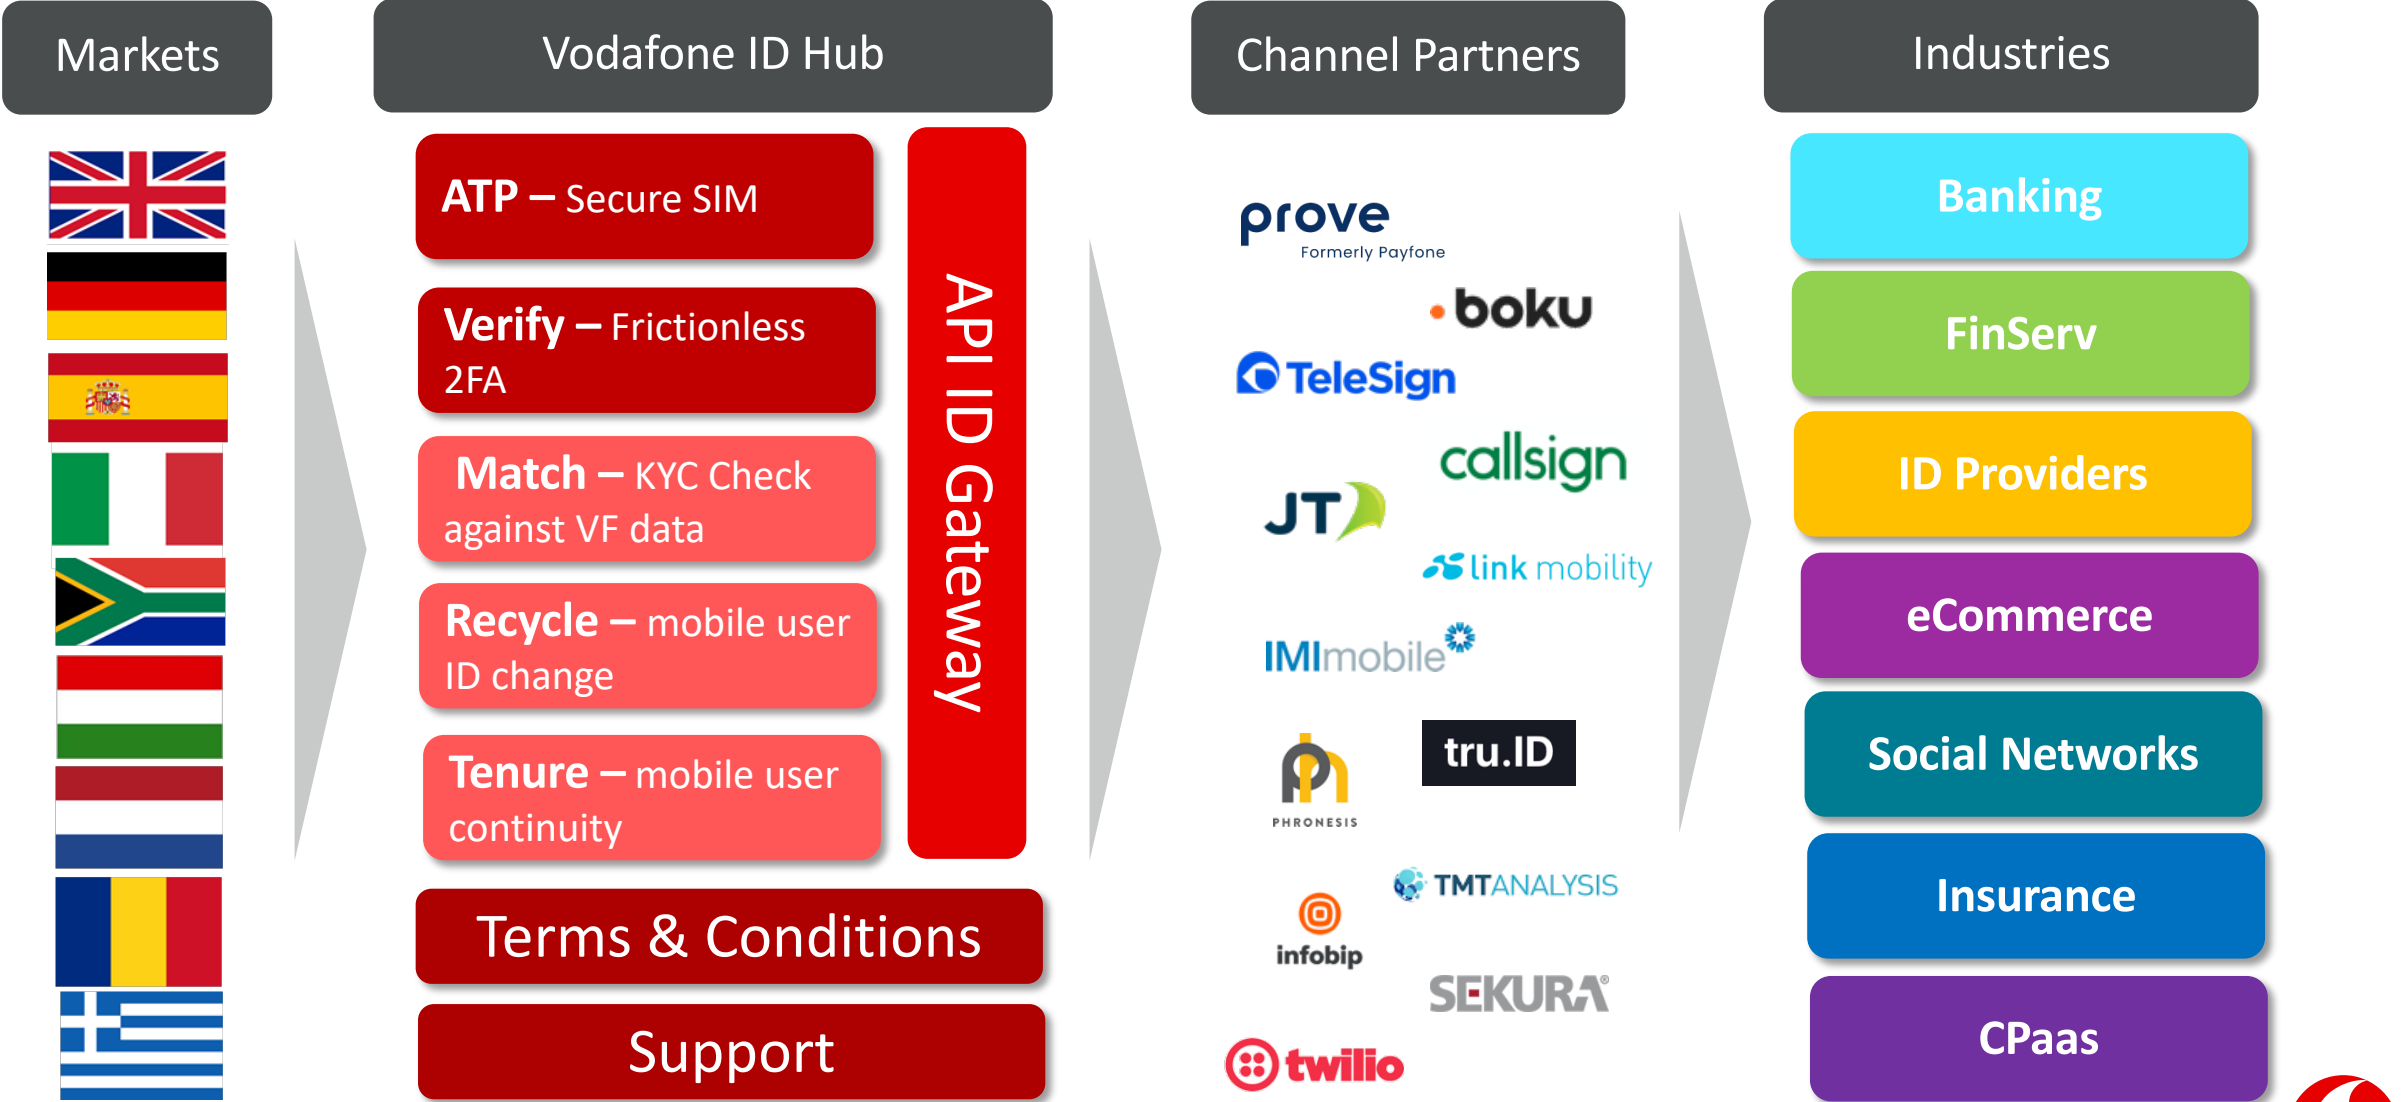

FIRST PARTY

Data from the source with auditability and consent captured accordingly.

VODAFONE IDENTITY HUB (VIH)

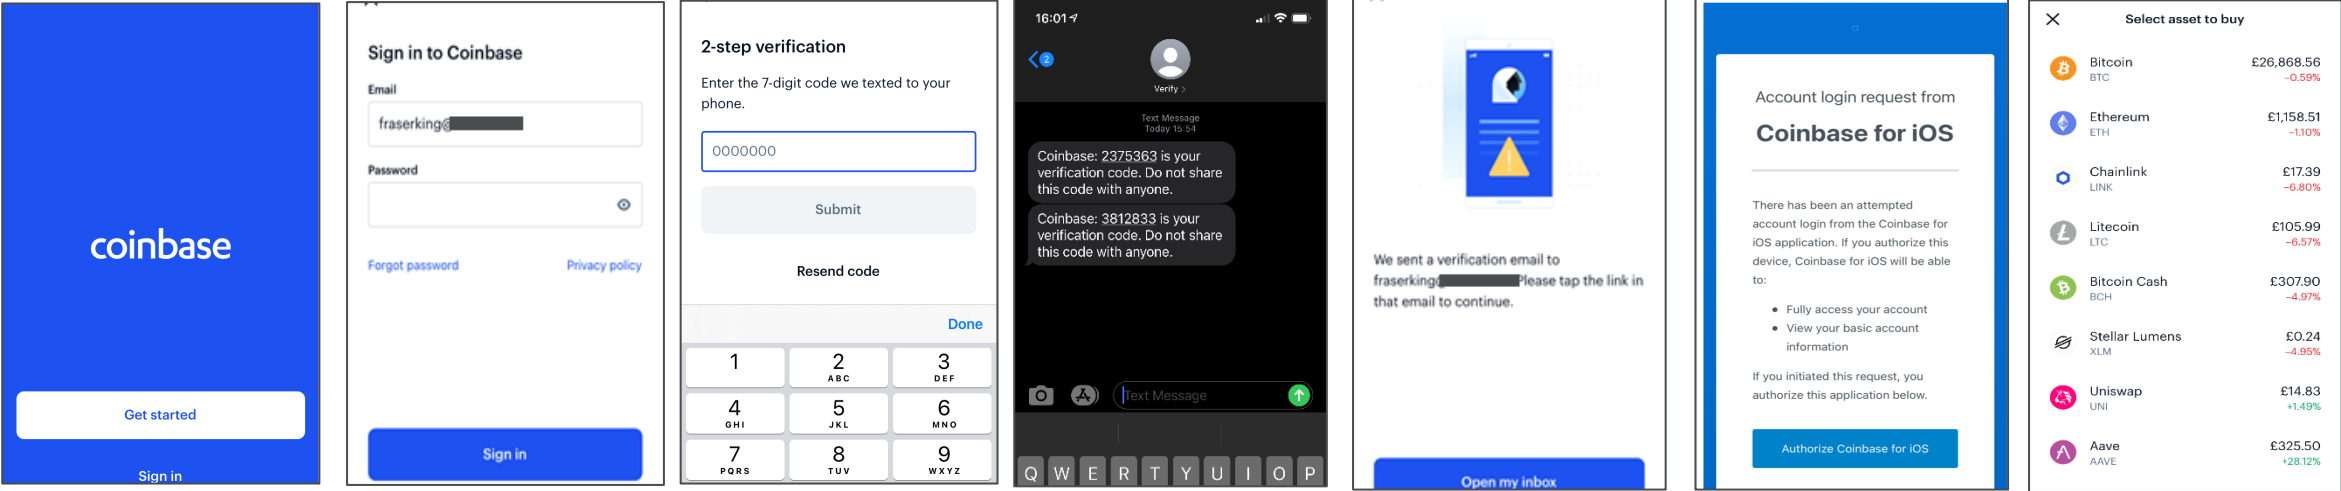

AUTHENTICATION ON MOBILE IS A BIG OPPORTUNITY

- Digital Transformation is accelerating an urgent need for better authentication without increasing customer friction.
- >70% of all eCommerce happens on Mobile
- Existing Authentication solutions are not fit for mobile
 - Email – poor mobile experience
 - App Auth – cant be trusted
 - Bio-metrics – challenges with enrolment and privacy
 - Authenticators – high friction & fragmentation
 - SMS_OTP – introduces friction and open to social engineering
- **Why cant mobile web authentication work like mobile authentication?**

WHY CANT MOBILE WEB AUTH WORK LIKE MOBILE AUTH?

MOBILE WEB AUTH CAN WORK LIKE MOBILE AUTH!
