

# Mobile Connect Accelerator

A GSMA Approved Solution By WSO2.Telco

# Why WSO2.Telco?

## Gartner And Forrester Label WSO2 As “Visionary”

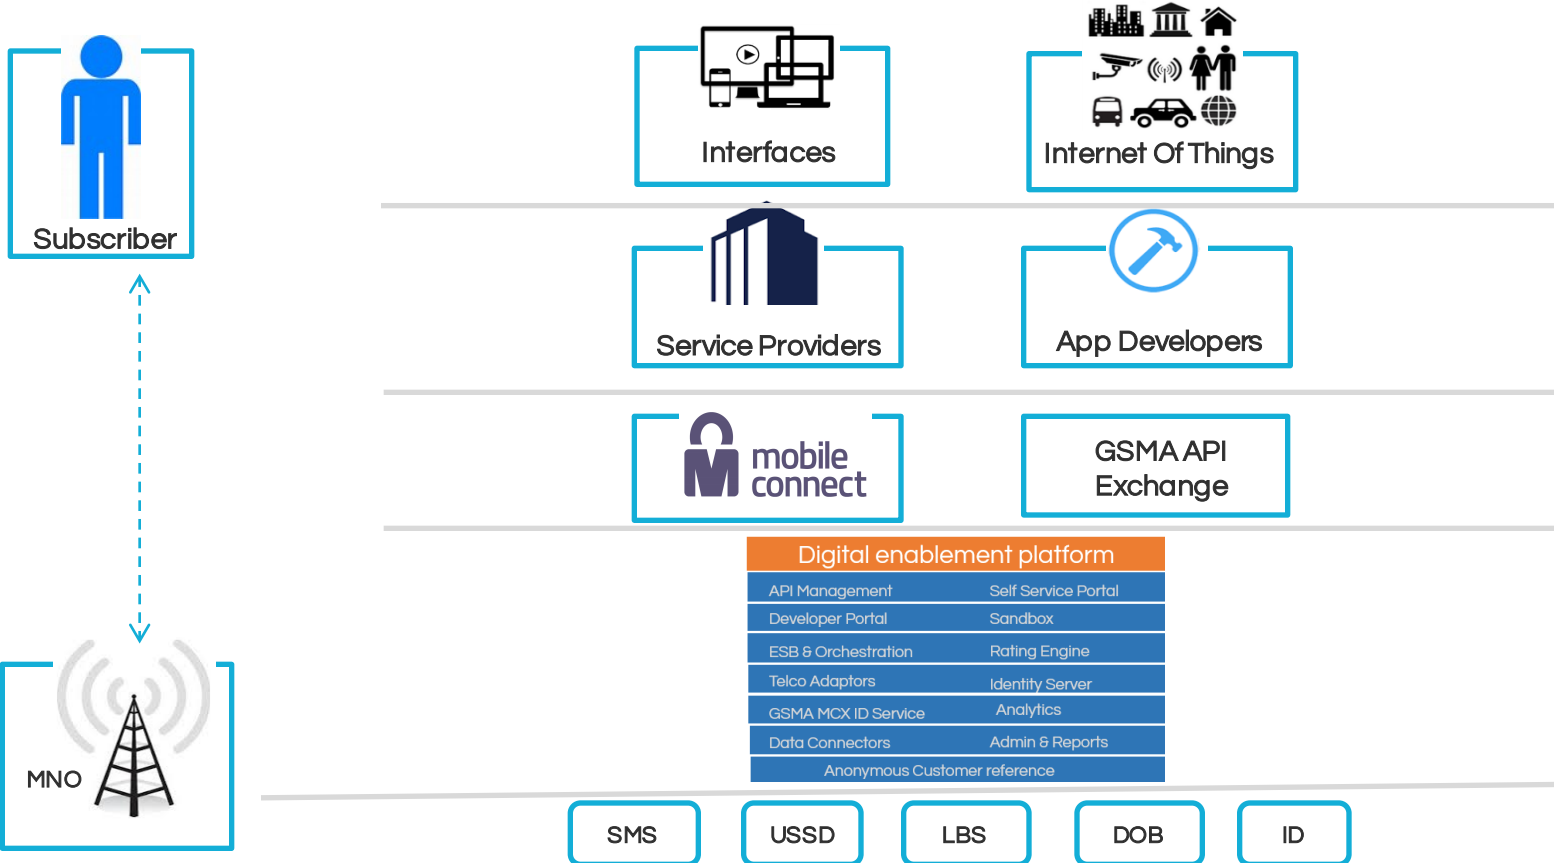

**100% Open Source** - WSO2’s platform is the only comprehensive middleware platform that is 100% open source with no gimmicks.

**Built On A Single Code Base** - The WSO2 platform is made up of over 25 products covering all major categories from integration and API management to identity and data connectors. All products are built using a single code base; they work seamlessly with each other so less engineering resources are needed when integrating them.

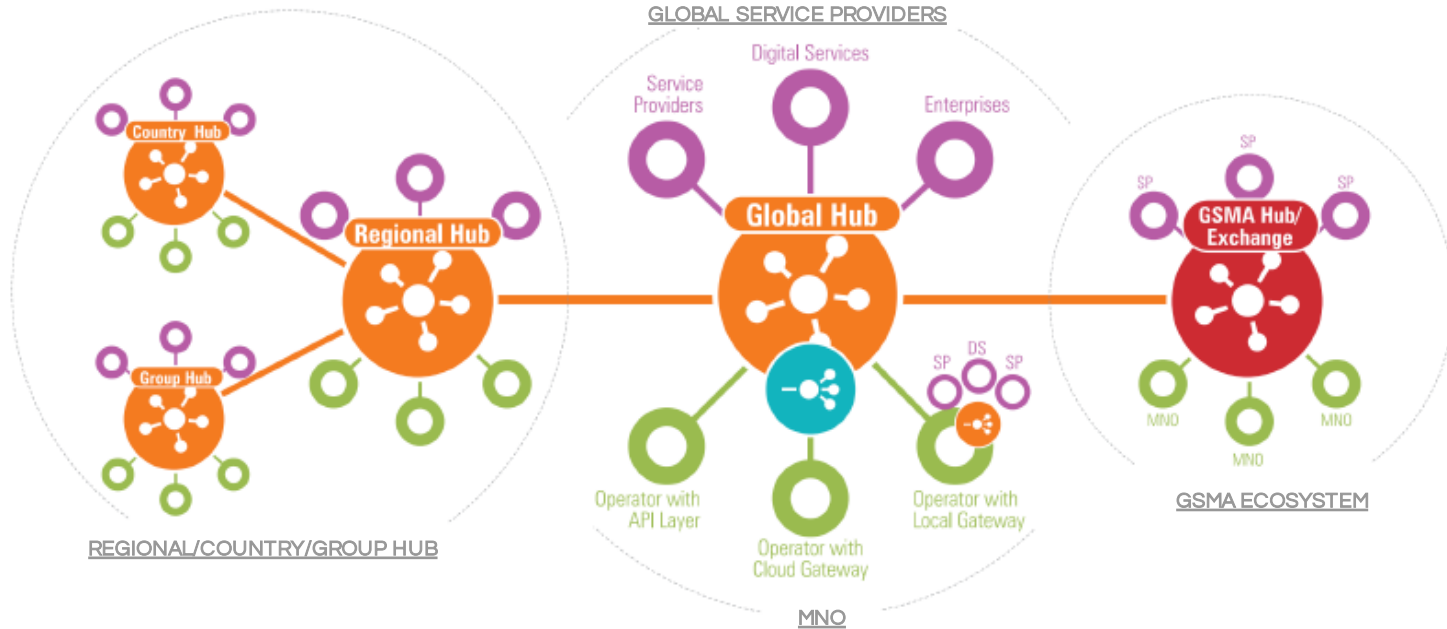

**Fully Cloud Enabled** - Support for private, public, and hybrid clouds mean that the same application can run on-premise and on the cloud.

**Proven Global Client Base** - Several major global companies such as ebay (2bn transactions per day), Boeing, AAA are using WSO2’s platform for their mission-critical applications.

# Rapid, Interoperable Digital Service Enablement

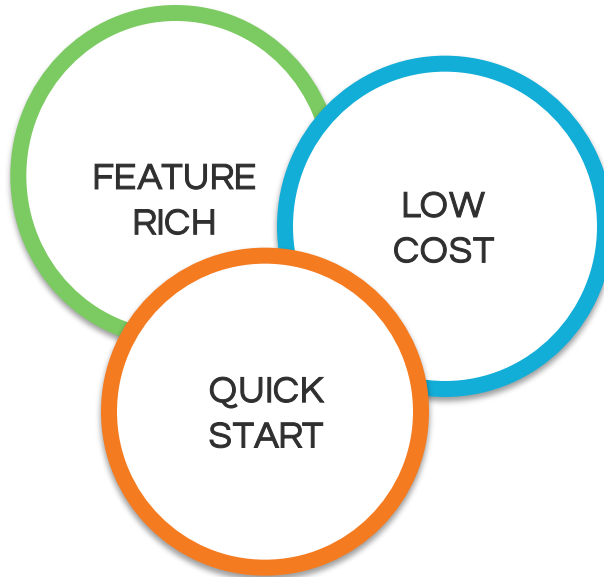

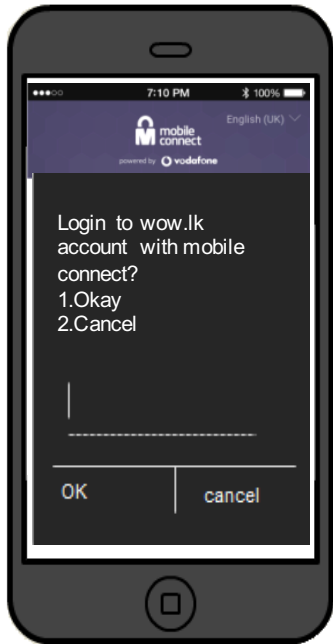

# WSO2.Telco: Wider Ecosystem

## WSO2.Telco Ecosystem

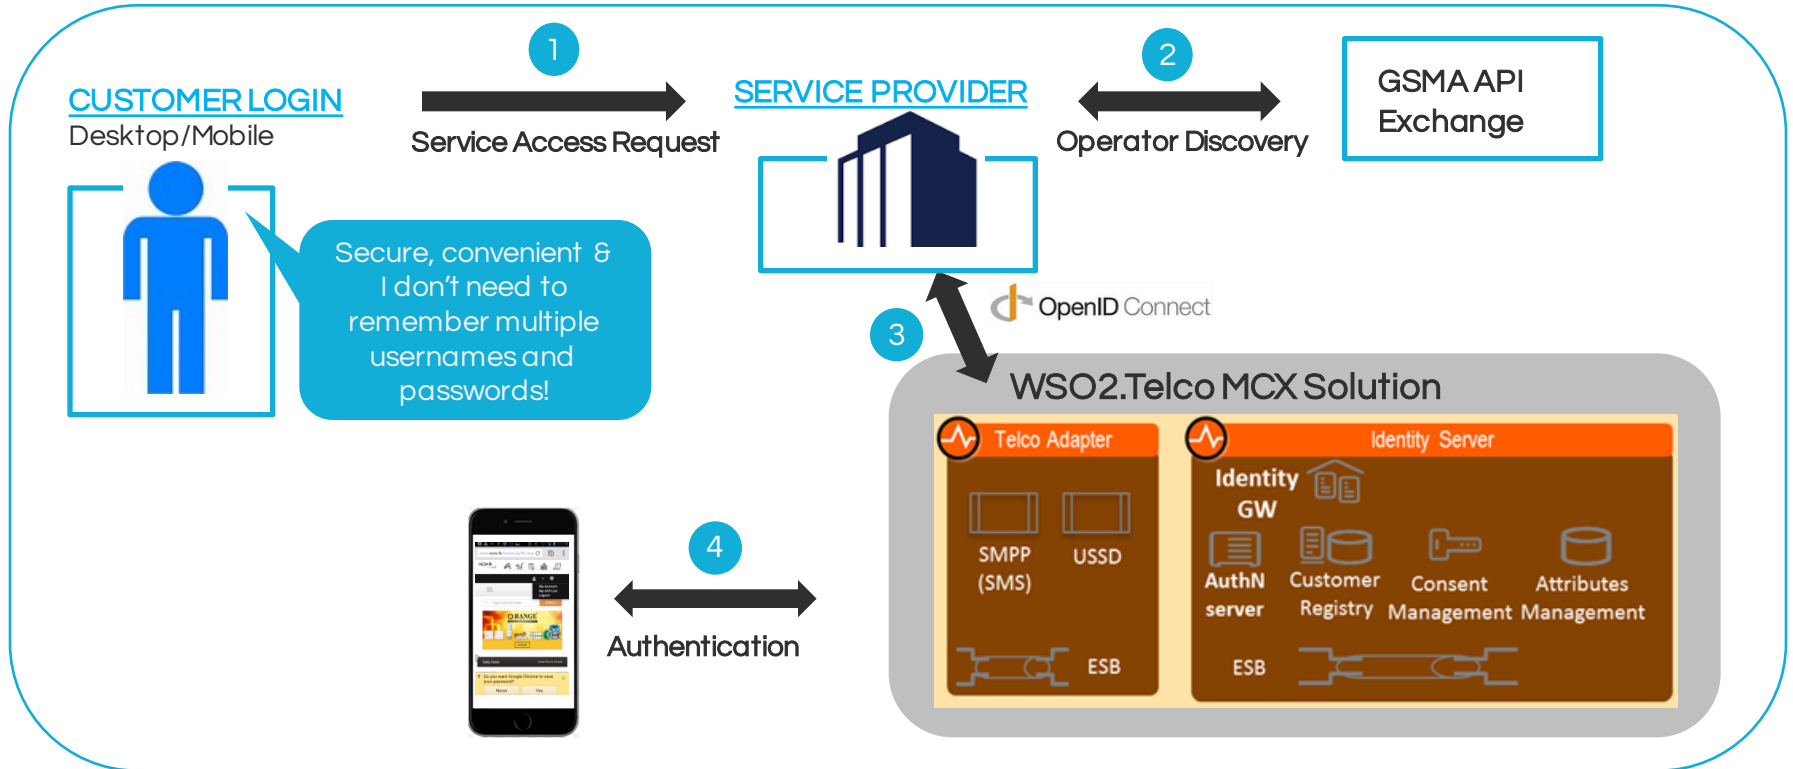

# Mobile Connect Accelerator (MCX) By WSO2.Telco

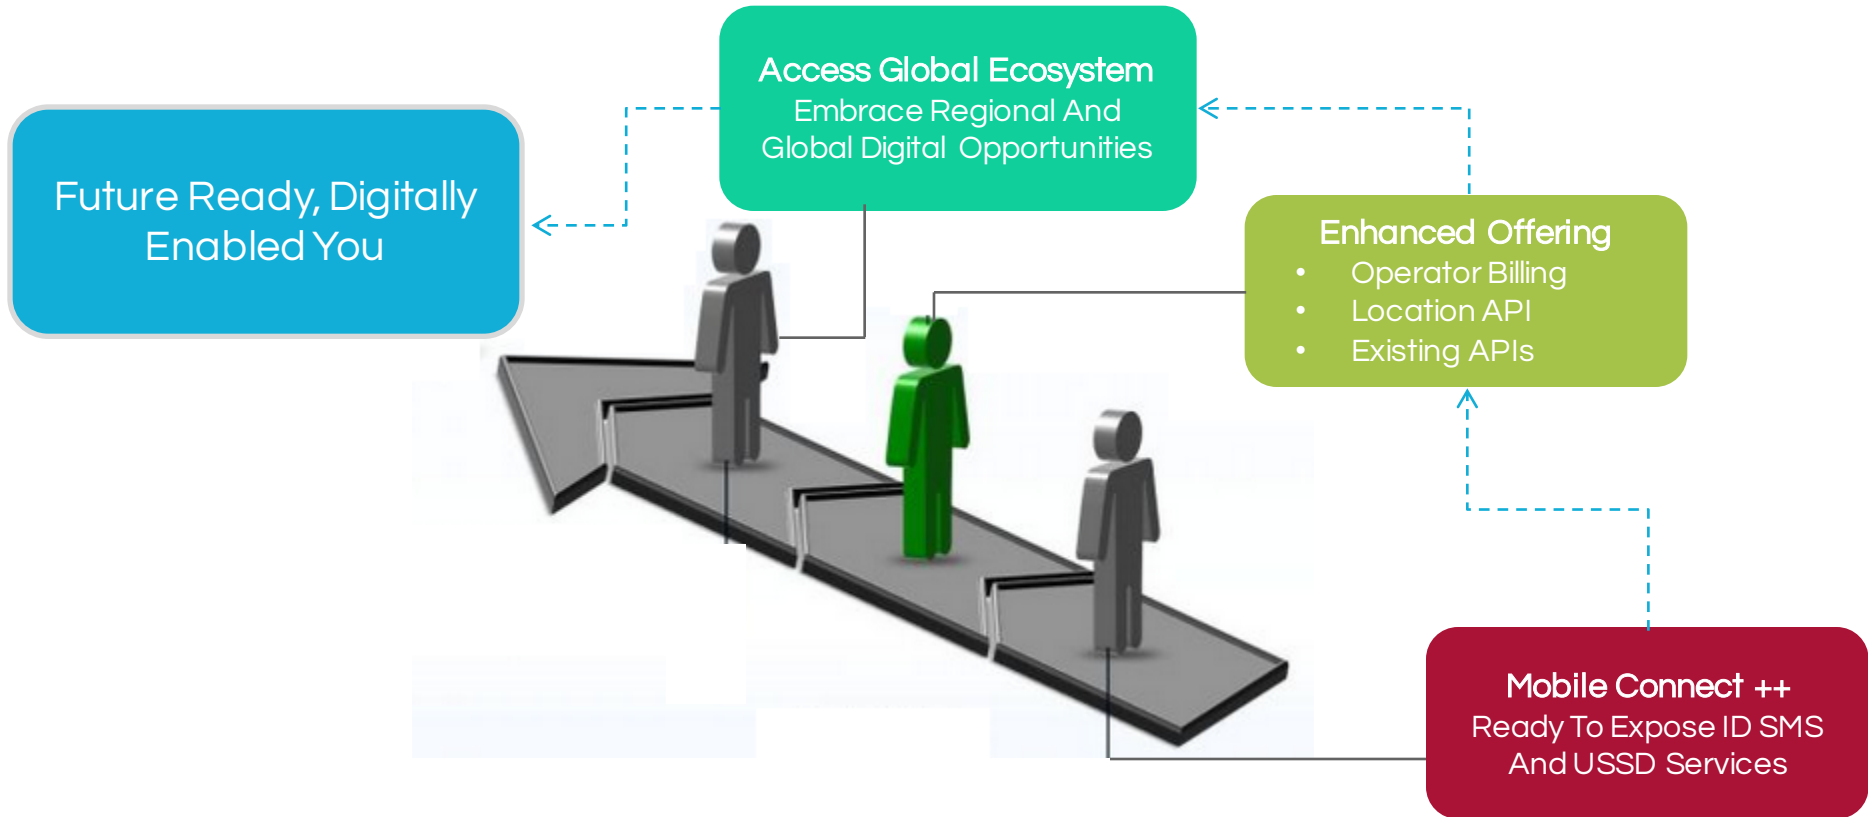

- LOW COST** Open source with modular scaling. OPEX model to grow with traffic
- FEATURE RICH** Mobile Connect ++ and authentication API's for other services
- FLEXIBLE** Highly flexible for adapting to changing requirements and new use cases
- SCALABLE** Proven middleware with tools enabling seamless integration + horizontal scaling
- INTER OPERABLE** Allows MNO's to both collaborate and innovate internally whilst reducing friction

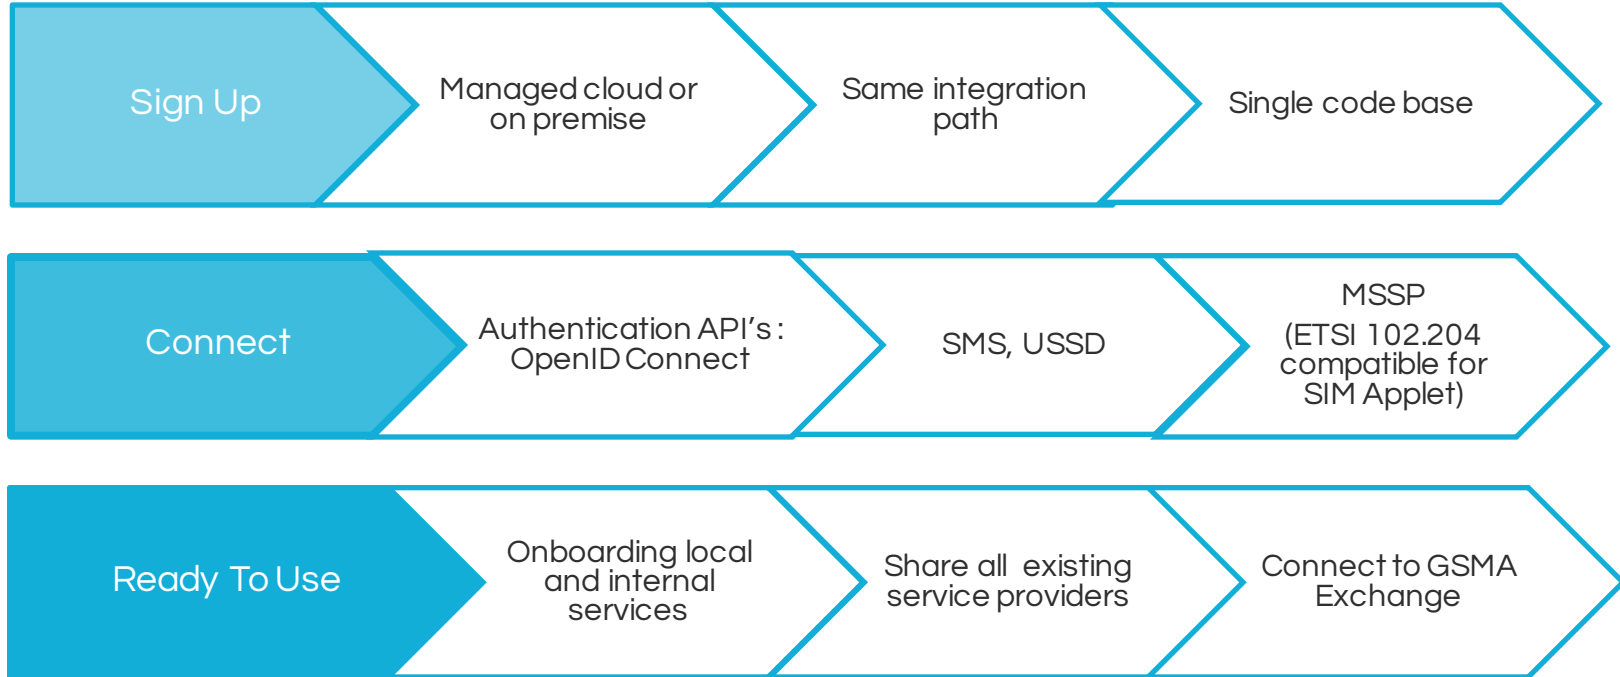

# How MCX works

# Opening Up To A Digital World - Full Of Opportunities

# No Friction, Quick Start!

# Deployment Options And Upgrade Path

## Cloud Based Quick Start

Live deployment in 30 days

Fully managed cloud solution with light integration

Low cost for full production instances

Simple contract with no fuss

## On Premise

Free POC/ beta trial

Same code and rapid VM based deployment

Seamless migration from cloud - with no additional integration

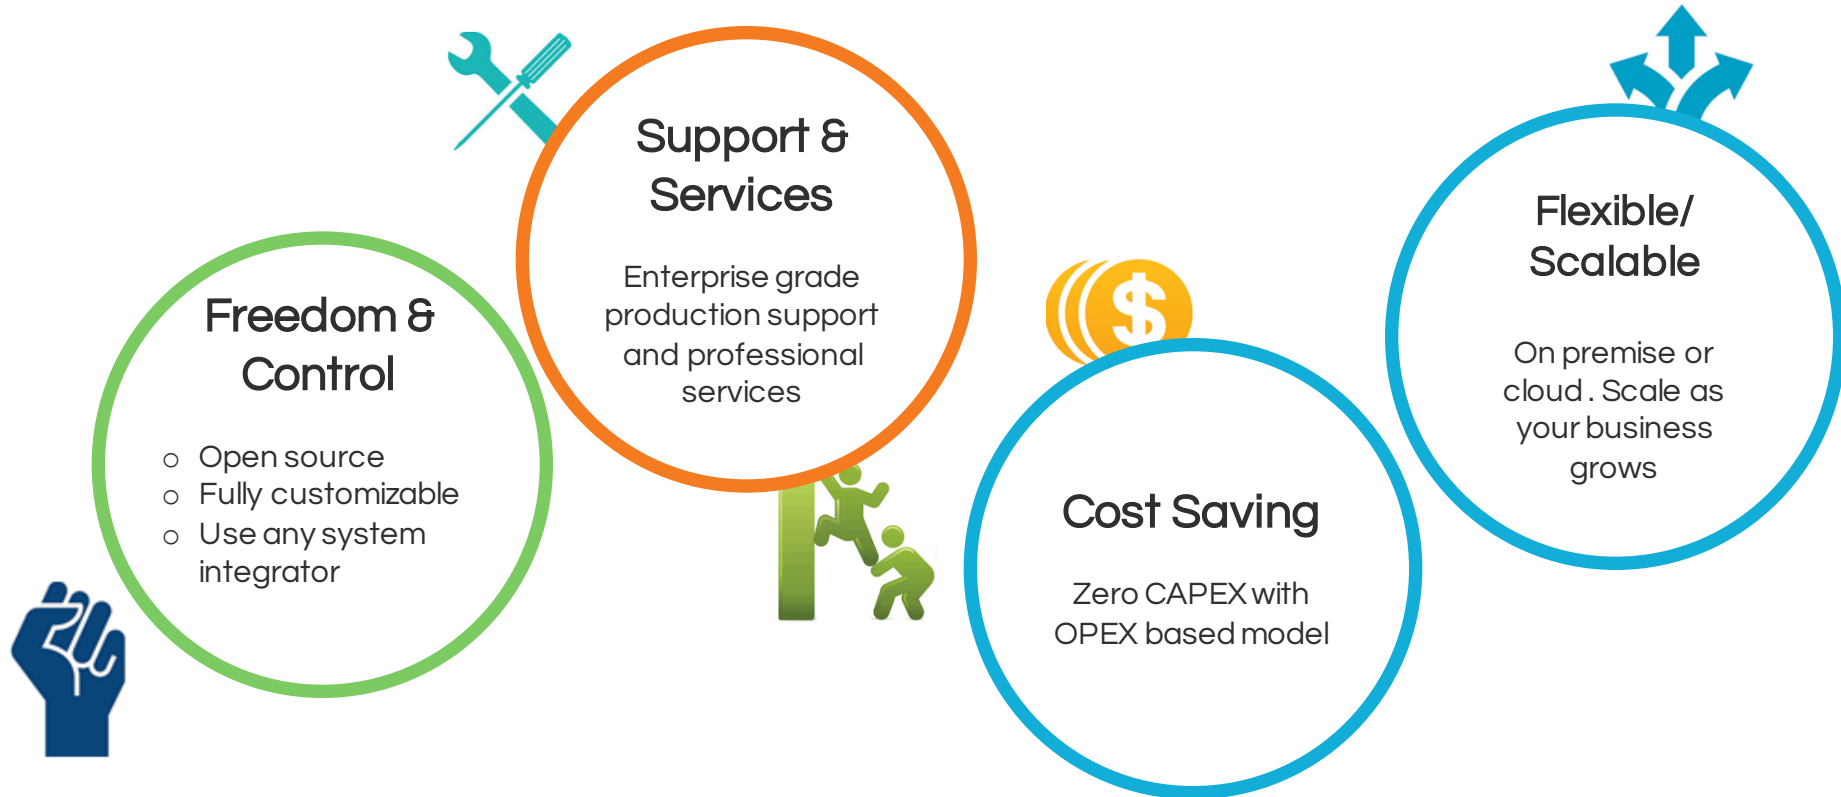

Adaptable for use of any system integrator

## Hybrid For Scaling & Upgrades

Multiple architectures to choose from (partial/full HA)

Quick upgrade to full API management

All capabilities built on highly efficient WSO2 code base

Thank you
