

Luxembourg

Exposure guidelines General law for all Regions in Luxembourg: 3 V/m per Operator and per Antenna system.

Planning Authority Regional administrations.

Requirements for planning permission Building permissions are required all installations.
Commodo/Incommodo procedure has to be applied for all installation above 100W Output power.

Timescales for Permission Regarding building permits it is between 20 and 200 days and depends strongly on the commune and if we need an additional greenfield (environment) authorisation.

The commodo/incommode procedure is the combination of the ITM and the Environment permission. Due to the fact that there is a huge backlog we wait there for more than half a year.

Appeals process The building permits go directly to the commune.

The commodo/incommode goes in parallel to the ITM and Environment.

Public Consultation Local authorities publish notices on sites and make information available in the Town Council offices.

Exemptions & Existing site upgrade No exemptions.
