Licensed Shared Access

Key Findings on Licensed Shared Access

LICENSED SHARED ACCESS: PRINCIPLES

LICENSED SHARED ACCESS

A way for spectrum to be shared by non-commercial (governmental) users with a limited number of mobile operators

Appropriate for bands identified for mobile broadband in accordance with sharing rules

Possible complementary way of authorising and accessing spectrum for capacity bands but not a substitute for exclusive-access spectrum

Without proper incentives to bring the parties together, the spectrum sharing opportunity may remain purely theoretical
