SPECTRUM AWARD BEST PRACTICE: CONSIDERATIONS FOR SUCCESSFUL LICENSE AWARD PROCESSES

28th July 2016, 2.30pm to 4pm

Dar Es Salaam, Tanzania

There is no single solution for governments for licensing spectrum. The circumstances of each market need to be considered, with industry stakeholders involved in all stages of the decision-making process. This is achieved through an open and transparent consultation process, to ensure the chosen approach will achieve an economically efficient allocation of spectrum, delivering the desired government objectives while meeting the needs of industry, investors and citizens.
