  A.1 Document History  
  Other Information
1 History of EID issuance

The main purpose of the eUICC Identifier (EID) is to provide a unique global serial number for eUICCs, it is not related to service subscriptions and cannot be used to identify them. The original format of the eUICC issuer Identifier (EID) was inherited from the Integrated Circuit Card Identifier (ICCID) format where certain fields of the ICCID were embedded in the EID structure. The ICCID is defined by the ITU-T recommendation E.118 [6] as a Primary Account Number. Within ICCID the Issuer Identifier Number (IIN) is typically administered by national authorities as part of the IIN allocation. However:

- The EID is not a Primary Account Number (PAN) as its main purpose is not the charging of services.
- Different National Regulatory Authorities issue IINs/ICCID for use as EIDs using different rules, creating different operating conditions for manufacturers and in some cases making it impossible for manufacturers to obtain EIDs.

In 2019, the GSMA was asked by industry stakeholders to assume responsibility for the administration of the EID.

2 Scope

This document specifies:

1. the EID principles and requirements to be followed by the entities that assign EID numbers;
2. the format of the EID; and,
3. the EID assignment process to be followed by assignment authorities.

When approved, this document establishes the GSMA as the only appointed First Level EIN Assignment Authority. However, EIDs assigned under the ITU-T E.118 [6] based scheme will remain valid in the eSIM ecosystem.

</table>

6 EID Usage

The EID is the eUICC Identifier used in the context of Remote SIM Provisioning and Management of the eUICC as defined in [1], [2], [3] and [4].

7 EID Principles

This section contains the principles related to the EID.

<table>
<thead>
<tr>
<th>Principle No</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>EID.P01</td>
<td>Existing mechanisms for ICCID issuance by national numbering authorities, and subsequent subscriber identification shall not be affected.</td>
</tr>
<tr>
<td>EID.P02</td>
<td>The central purpose of the EID is to uniquely identify an individual eUICC (this is independent of the eUICC form factor and includes both discrete or integrated eUICC forms).</td>
</tr>
<tr>
<td></td>
<td>NOTE: Uniqueness is required for cryptographic mutual authentication and eUICC security mechanisms.</td>
</tr>
<tr>
<td>EID.P03</td>
<td>The EID is not a Primary Account Number (PAN).</td>
</tr>
<tr>
<td>Principle No</td>
<td>Description</td>
</tr>
<tr>
<td>--------------</td>
<td>-------------</td>
</tr>
<tr>
<td>EID.P04</td>
<td>The EID is not intended to be used to charge for telecommunication services.</td>
</tr>
<tr>
<td>EID.P05</td>
<td>The EID assignment shall be separate from the ICCID and IIN assignment.</td>
</tr>
<tr>
<td>EID.P06</td>
<td>The EID is not required to maintain compatibility with ISO/IEC 7812-1 [5] e.g.: limit the first 2 digits to 89.</td>
</tr>
</tbody>
</table>

8 EID Scheme Requirements

<table>
<thead>
<tr>
<th>Requirements No</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>EID.R01</td>
<td>The length of the EID SHALL be 32 digits.</td>
</tr>
<tr>
<td>EID.R02</td>
<td>The EID SHALL identify uniquely an eUICC.</td>
</tr>
<tr>
<td>EID.R03</td>
<td>The EID defined in this document SHALL be defined independently of ITU-T E.118 [6].</td>
</tr>
</tbody>
</table>

9 Requirements on Assignment Authorities

<table>
<thead>
<tr>
<th>Requirements No</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>AE.R01</td>
<td>The uniqueness of the EID SHALL be maintained regardless of the assignment authority.</td>
</tr>
<tr>
<td>AE.R02</td>
<td>The EID assignment defined in this document SHALL not use EIDs that start with 89; such values are reserved for the ITU-T E.118 based scheme [6].</td>
</tr>
<tr>
<td>AE.R03</td>
<td>Criteria for eligibility SHALL exist for all assignment authorities involved in the assignment of EIDs.</td>
</tr>
</tbody>
</table>
10 eUICC Numbering System
The length of the EID shall be 32 digits. It is composed of the following parts (see Figure 1):

- The EUM Identification Number (EIN): N digits (variable length)
  - EIN consists of one or multiple concatenated EID Range Holder Identifiers (ERHIx).
  - Each ERHI is assigned by an EIN Assignment Authority (EAA) to either an EUM, or a subsequent EAA.
  - Each EAA is responsible for the uniqueness of the ERHIs it assigns.
  - Assigned ERHIs do not need to be of the same length.
  - The EAA determines the number of digits in the assigned ERHIs.
  - Example: ERHI 11 is assigned to entity A. As a consequence, ERHIs 110 to 119 or any other number starting with 11 can no longer be assigned. However, ERHIs 120 to 129 can be assigned to entities B to K.
  - The First Level EAA is the GSMA.
  - GSMA will assign ERHI1s to:
    - EUMs or
    - National Authorities

- EUM Specific Identification Number (ESIN): 30 - N digits

- 2 Check Digits

EID = EIN || ESIN || Check Digits
EIN = ERHI1 [ || ERHI2 ] ... [ || ERHIk ]

Figure 1: EID Structure
- The EUM Specific Identification Number (ESIN): 30-N digits (variable length depending on EIN)
  
  o The ESINs are assigned by the EUM.
  
  o The EUM is responsible for the uniqueness of the ESINs it assigns.

- The Check Digits: 2 digits containing check digits calculated by the EUM over all 32 digits as specified below
  
  1. Set the two check digits to 0,
  
  2. Using the resulting 32 digits as a decimal integer, compute the remainder of that number on division by 97,
  
  3. Subtract the remainder from 98, and use the decimal result for the two check digits, if the result is one digit long, its value SHALL be prefixed by one digit of 0.

Verification of the check digits of an EID can be performed by any interested party as follows:

  1. Using the 32 digits as a decimal integer, compute the remainder of that number on division by 97.
  
  2. If the remainder of the division is 1, the verification is successful; otherwise the EID is invalid.

11 Criteria for ERHI1 Assignment

Applications for an ERHI1 SHALL meet all the criteria for approval below:

- The applicant applying for an ERHI1 SHALL NOT already have an ERHI1 assigned to it, except in the justified exceptions;
- The applicant SHALL commit to use the ERHI1 preferably within 12 months of the release date.
- For non-National Authorities,
  - The applicant SHALL be an EUM and
  - the applicant SHALL be a single corporate entity operating under a specific legislative regulation.

12 ERHI1 Assignment Process

```
[1] Fill Registration Form
end rnote
A -> GSMA : [2] Registration Form Submission
rnote over GSMA #FFFFFF
[3] GSMA Verification Process
(No more than 5 days)
```
The ERHI1 Assignment involves five stages that are detailed below:

1. **Form filling**  
The applicant completes the necessary details defined in the Registration Form that can be found on gsma.com.

2. **Submission**  
The applicant sends the completed and signed Registration Form to EISRegistration@gsma.com.

3. **Verification Process**  
GSMA verifies the authenticity of the applicant company and the validity of the application.

   It is estimated that the entire verification process will not take more than 5 working days after receipt of the form.
If the verification fails, GSMA may take further actions depending on the reason of the verification fail (e.g., attempt of fraud to a legitimate ERHI1 owner).

4. ERHI1 Assignment/Rejection

If the verification in step 3 is successful, GSMA assigns the ERHI1.

5. GSMA Confirmation

After the documentation is verified by GSMA, GSMA:

- notifies the applicant of the assigned ERHI1 by sending the completed registration form.

13 ERHI1 Cancellation Process

```plaintext

participant "<b>Applicant" as A
participant "<b>GSMA EIN Assignment Services" as GSMA

cnote over A #FFFFFF
[1] Fill Cancellation Form
da A : [2] Cancellation Form Submission with the ERHI1 to be cancelled
da GSMA : [2] Cancellation Form Submission with the ERHI1 to be cancelled
dnote over GSMA #FFFFFF
[3] GSMA Verification Process
(No more than 5 days)
da GSMA Confirmation

da GSMA : Verification fails
nda GSMA #FFFFFF
[4] Cancel the ERHI1 Number
da GSMA Confirmation

da GSMA -> A : [5.1] Notify the Cancellation of the ERHI1
nda GSMA #FFFFFF
da A : [5.1] Notify the Cancellation of the ERHI1
enda
@enduml
```
In addition to the EIN Assignment Process, an ERHI1 that is no longer used by a company may be cancelled by the EIN Assignment Authority. An applicant can ask to GSMA to cancel an existing ERHI1 following the process described below:

1. **Form filling**  
   The applicant completes the necessary details defined in the Cancellation Form that can be found on gsma.com.

2. **Submission**  
   The applicant sends the completed and signed Cancellation Form to EISRegistration@gsma.com.

3. **Verification Process**  
   GSMA verifies the authenticity of the applicant company and the validity of the application.
   
   It is estimated that the entire verification process will not take more than 5 working days after receipt of the correct form.
   
   If the verification fails, GSMA may take further actions depending on the reason of the verification fail (e.g., attempt of fraud to a legitimate ERHI1 owner).

4. **GSMA Confirmation**  
   If the verification in step 3 is successful, GSMA:
   
   o Notifies the applicant that the ERHI1 has been cancelled.

14 **GSMA Responsibilities**  
Within the context of this document, the GSMA has the following responsibilities.
- Register or cancel any ERHI1
- Maintain a list of assigned ERHI1s and their status.
- Ensure integrity of the EID Assignment process.
  - This includes a yearly review by GSMA and a report to the group in GSMA responsible for issuing this document about the actual assignments and their usage by Subsequent Level EAAs.
- Provide expertise and advice on EID issues where appropriate.
- Ensure that if the ERHI1 has been cancelled, it is not assigned to any other entity.

15 Subsequent Level EIN Assignment Authorities Responsibilities

Within the context of this document, any Level X EIN Assignment Authority (X>=2) SHALL have the following responsibilities:

- Comply with the EID requirements defined in Section 8, with the Assignment Authority Requirements defined in Section 9, and the Numbering Scheme defined in Section 10.
- Complete all the information with regards to the Registration or Cancellation Forms, respectively.
- Ensure that each ERHIx is unique.
- Only the verified company SHALL request the cancellation of their own identifier.
- Once an ERHIx has been cancelled, it SHALL NOT be used after the date indicated in the Cancellation Form.
- Comply with the assignment reporting requirements for their Level X-1 EAA.
