

Cloud AR in 5G Era

Dr. Chih-Lin I
Chief Scientist, CMRI

AR Will Reshape Verticals And Daily Lives

Revolution in Human-Computer Interaction and AR will enhance human perception, cognition and execution eventually.

Cloud AR Are Driven by a Need: highly complex processing

**Recognition
Precision**

**Graphic
Quality**

Latency

Computing power is crucial for better customer experience.

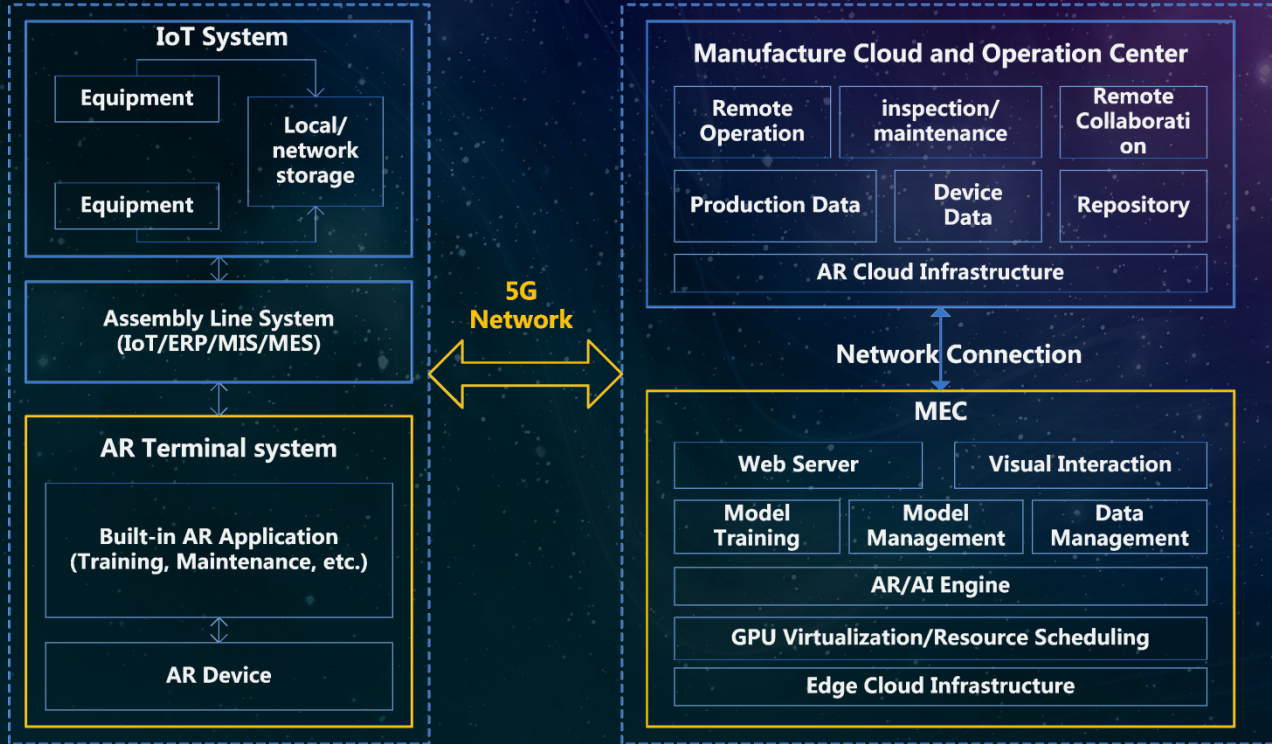

5G Cloud AR Architecture

Key Parameters With Different Graphic Quality

	Resolution	Frame Rate (FPS)	Compression	Uplink Bandwidth (Mbps)	Downlink Bandwidth (Mbps)
Multi-people interactive AR application	1080P	30	H.265	2	4
	2K (2560*1440)	60	*D	6	60
	4K (3840*1920)	90	*D	10	100
	The resolution here is binocular resolution and *D indicates the low latency encoding industry standard.				

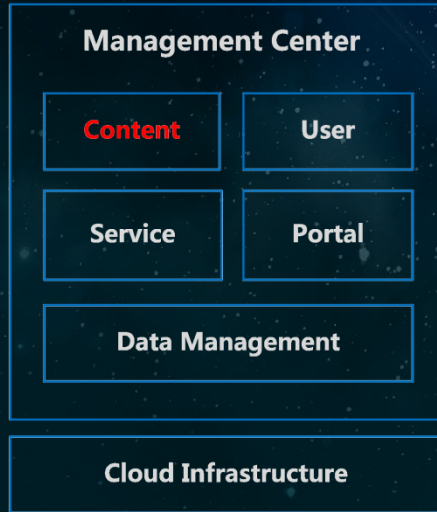

5G Cloud AR Solution-Manufacture

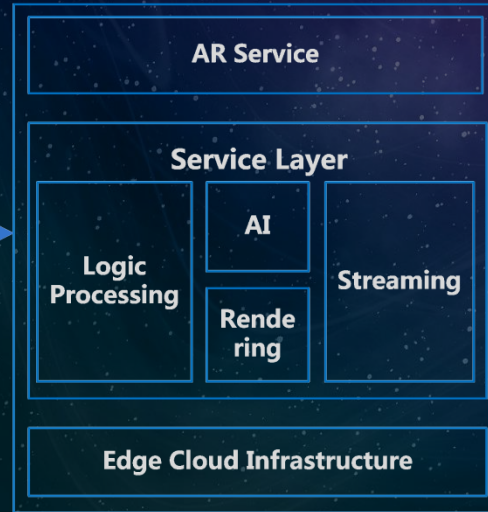

- Support various ISO/ECMA standards of the assembly line system.
- Information processing using Big Data, AI and industry specific models and tools.
- Incooperating domain-specific information from the manufacture cloud.

5G Cloud AR Solution-Education

Central Management Platform

Edge Platform

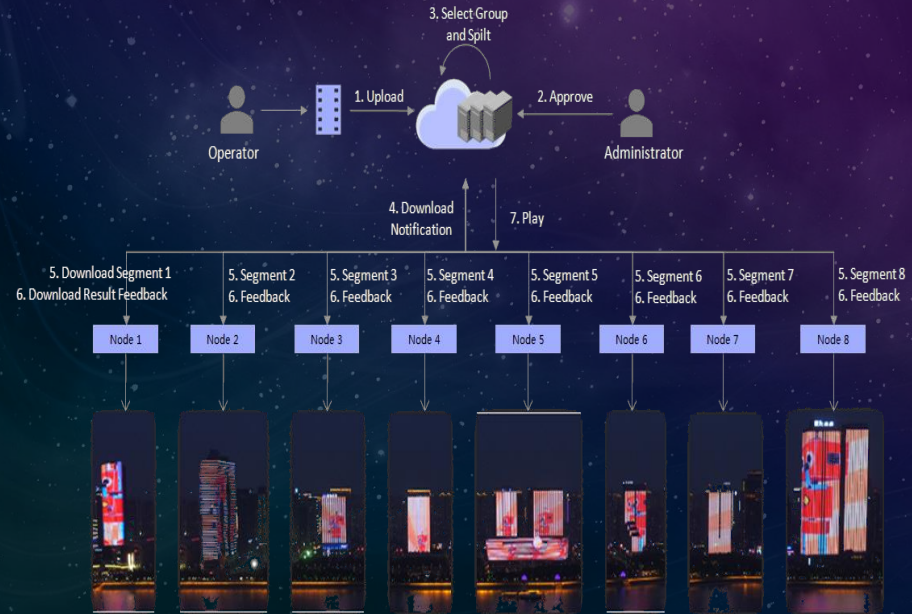

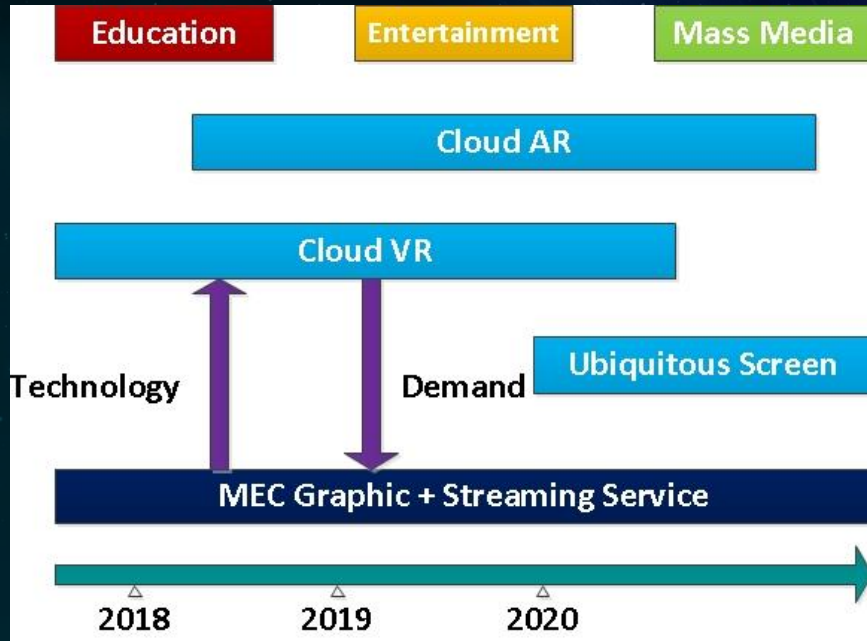

AR client

- Integrating **digital curriculum** and the central management platform.
- Enhance teacher-student interaction both locally and remotely via edge cloud and AR devices.
- Enhance classroom and/or remote collaboration: group of students with AR devices jointly explore collective learning, improve team project, etc.

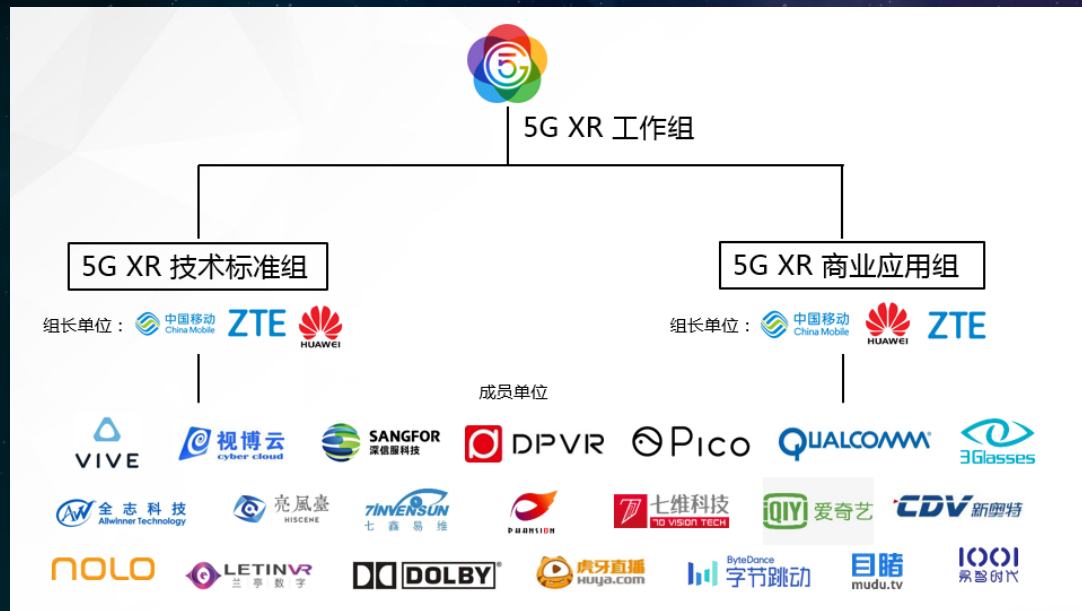

5G-Assisted Ubiquitous Screen

- Ubiquitous Display, Digital Twin City, Data Visualization service in 5G era.
- Integration of communication technology and computer vision/graphic technology.

5G Cloud XR Working Group

1. R&D: Solving the end-to-end technical challenges and bring the key technologies into Standardization.
2. Solution: Promoting cross-industrial collaboration to conduct commercial trials

Cloud AR Technology and Application Research Report

(released 2019.6.27)

- ➔ *Status of AR Industry and Key Use Cases*
- ➔ *5G Cloud AR Key Technology*
- ➔ *5G Cloud AR End-to-End Architecture*
- ➔ *5G Cloud AR Business Opportunities and Business Model*
