# SESSION 4 AGENDA

## Session 4 Speakers

- **Emanuel Kolta**, Lead Analyst, GSMA Intelligence
- **Ramin Attari**, RVP MEA, Parallel Wireless
- **Sadayuki Abeta**, VP, Head of Open RAN solutions, NTT Docomo
- **Partha Seetala**, President of Unified Cloud Business Unit, Rakuten Symphony

## Session 4 Panel

- **Ramin Attari**, RVP MEA, Parallel Wireless
- **Dr Doug Pulley**, Chief Solutions Architect, Picocom
- **Prakash Siva**, Head of Technology and Architecture, Radisys
- **Pál Zarándy**, Group Chief Strategy Officer, Mobile & 5G, 4iG

## 5G and Transforming RAN Architectures

**Emanuel Kolta**  
Lead Analyst  
GSMA Intelligence

**Intelligence** Serves **800** organisations

**40,000** users worldwide

**Data**

- 1,400 Mobile operators
- 80 Operator groups
- 5,000 Networks
- 30M Data points updated daily

**Research**

- 130+ Reports annually
- 1M Report downloads in 2019
- 4 Research Areas: Mobile Operators & Networks, IoT & Enterprise, Digital Consumer, Fixed, TV & Convergence

**Pinpoint accuracy**

Five-year forecasts consistently accurate within +/- 2.5% of reported data, updated quarterly

**40+ Analysts & industry experts**

Supporting the business strategy of our subscribers and the wider ecosystem

**THE GSMA WAS FOUNDED IN 1987**

Intelligently Connecting Everyone and Everything to a #BetterFuture

The mobile industry is the first to formally commit to the UN Sustainable Development Goals

Representing the interests of **750+** MOBILE OPERATORS and **400** COMPANIES IN THE BROADER MOBILE ECOSYSTEM

NEARLY 400 COMPANIES IN THE BROADER MOBILE ECOSYSTEM

The GSMA works to deliver a regulatory environment that creates value for consumers by engaging regularly with:

- MINISTRIES OF TELECOMS
- TELECOMS REGULATORY AUTHORITIES
- INTERNATIONAL & NON-GOVERNMENTAL ORGANISATIONS

**14** Offices worldwide

Hosting the world's leading mobile industry events, MWC Barcelona, MWC Shanghai, MWC Los Angeles and the Mobile 360 Series attract **230,000** people from across the globe

**100+** TECHNICAL WORKING GROUPS

Promote industry best practice, harmonise operational frameworks and standards

Member-only platform connects **23,000+** Industry experts

**8.7 bn+** MOBILE CONNECTIONS WORLDWIDE

**InfoCentre<sup>2</sup>**

# Transforming RAN Architectures: Why?

## Growing demand for connectivity and flat CAPEX

### Increasing demand for connectivity

Cellular Connection  
2019 - 2025

Source: GSMA Intelligence

Mobile Data Traffic  
2019 - 2025

Source: Ericsson

### Flat budget

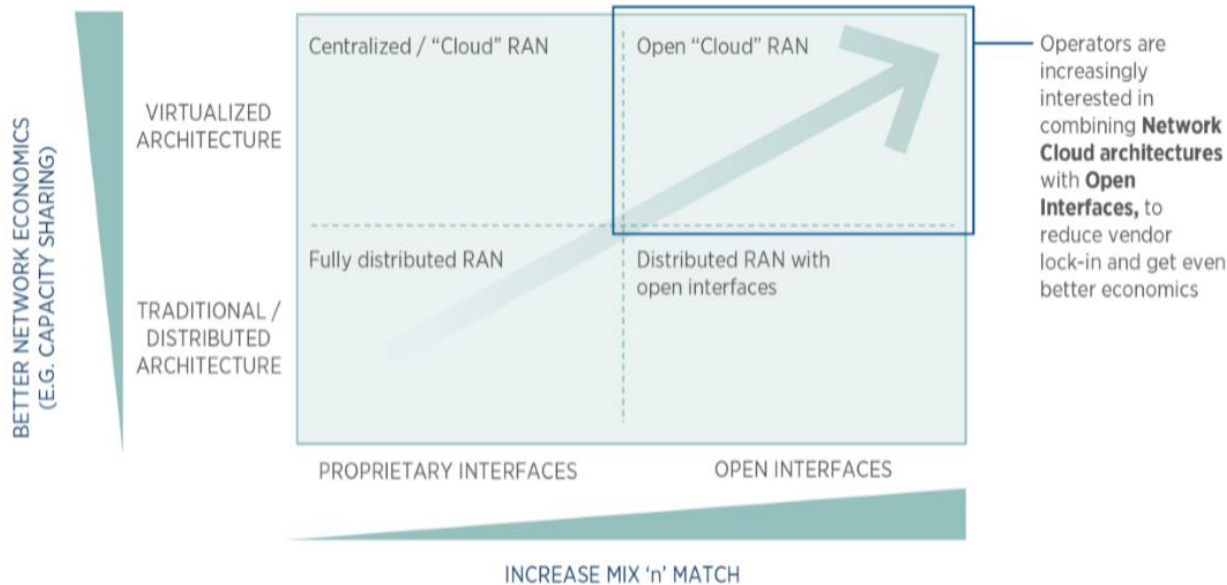

Total mobile CAPEX

Source: GSMA Intelligence

# Transforming RAN Architectures: How?

## Open vs. virtual vs. cloud vs. pooled vs. distributed

**Virtualization and open interfaces** are different things, and an operator can deploy one without the other, but technology is becoming available to combine RAN virtualization with open interfaces.

- **Virtualisation**: for better economics through capacity aggregation or cloudification with open interfaces

- **Open interfaces**: for more choice and innovation in the supply chain

# The vendor ecosystem radically changed in the past 20 years

Global market share of network equipment vendors worldwide

Market share of the **top 3 players:**

50%

52%

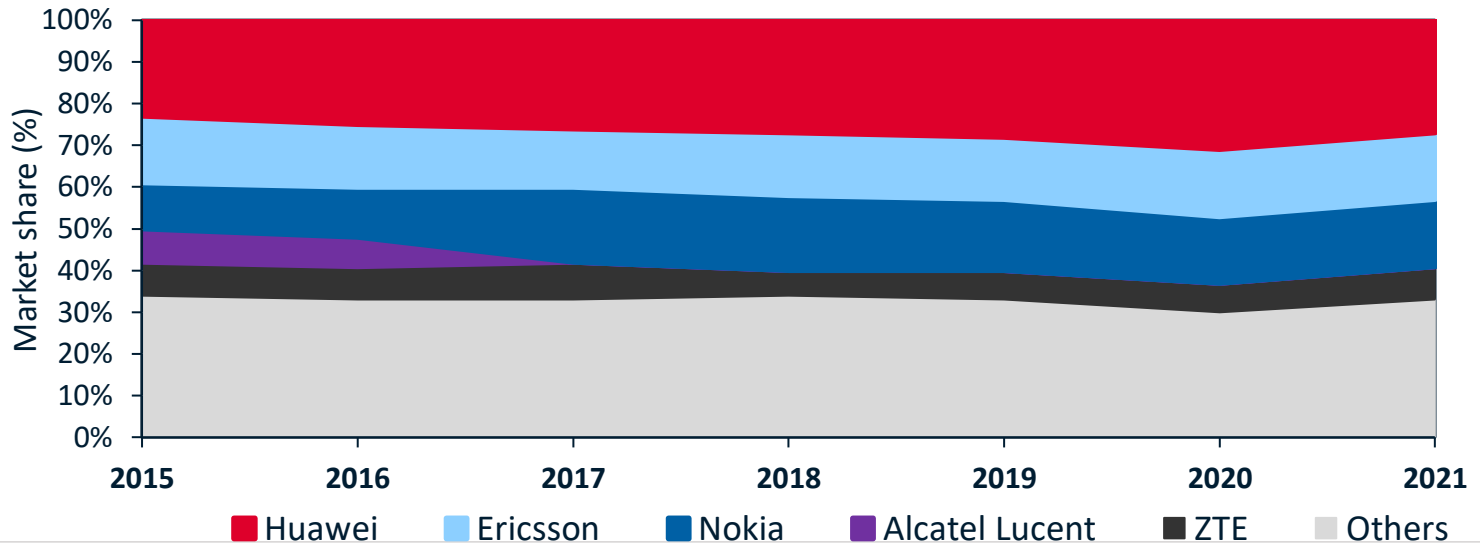

58%

60%

60%

63%

59%

# Drivers of the transformation: Benefits impact both costs and lead to a sustainable supply chain

## 1. Financial pressure

The most attractive 5G use cases require network densification deployments

## 2. Sustainable supply chain

The current radio equipment supply chain is under stress, as the number of suppliers continues to decline due to market consolidation and geopolitical restrictions

### Virtualization and open interfaces improve operators position differently

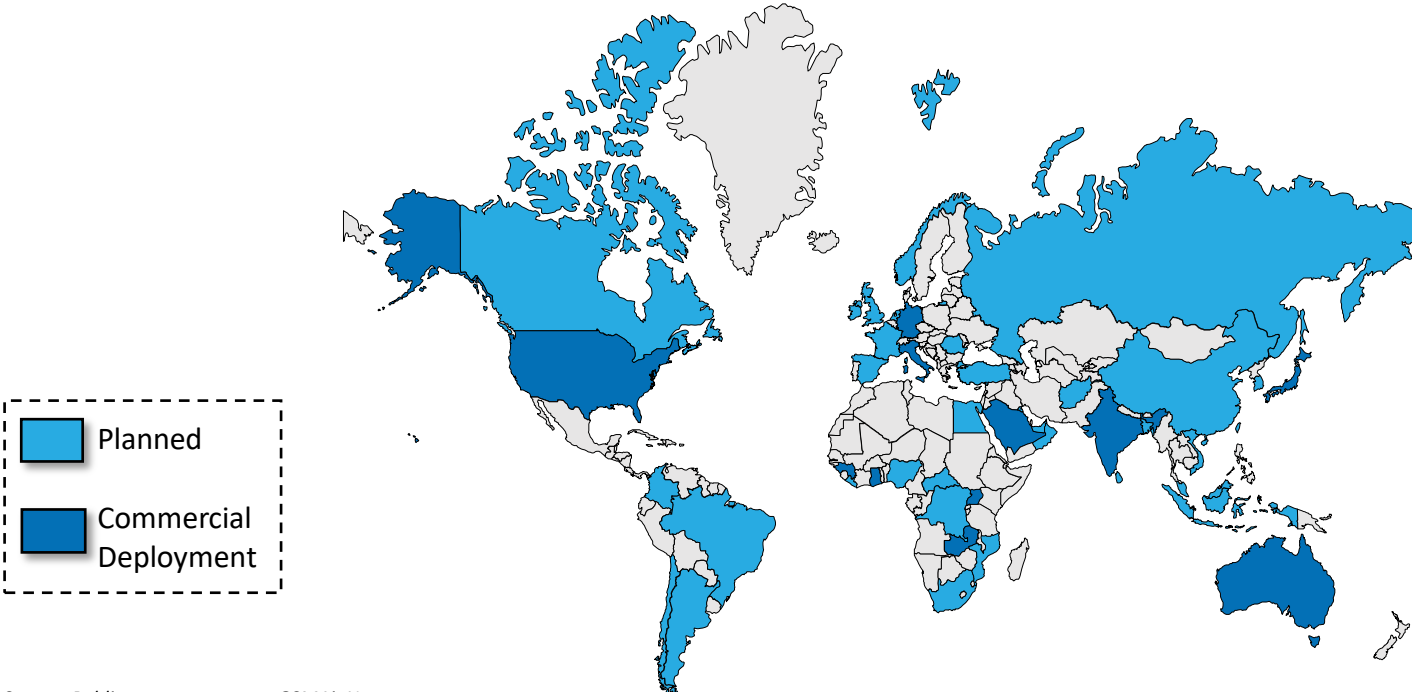

#### Virtualization

- Number of equipment
- Different levels of pooling
- Energy efficiency
- Space efficiently
- Operations, maintenance
- Cabling, installations

#### Open interfaces

- Radio equipment
- Flexibility (e.g. Plug n Play)
- Infrastructure competition (e.g. Mix n Match)

## ACCELERATING OPEN RAN DEPLOYMENTS & INCREASING SUPPLY CHAIN DIVERSITY

# OPEN RAN – THE ORIGINAL VISION

# OPEN RAN – CURRENT STATUS

**Competition** → Insufficient deployment of ORAN contracts globally

**CAPEX** → HW price reduction is directly linked to volume

**Innovation** → A constant game of catch-up with Incumbent vendors on new features slows further innovation

**Lock-in** → Each SW vendor is adapting to specific HW vendors, and each vendor's Open RAN SW has a different path to orchestrate (RU/DU/CU)

**Supplier Diversity** → Heavy dependency on momentum in Open RAN deployments, leading to more investment in this technology

**Disaggregation** → Not happening fast enough as each SW vendor is integrated with specific HW vendors

# OPEN RAN – HOW CAN WE ACCELERATE ADOPTION?

# CENTRALIZED RAN ADVANTAGES

Better Network  
Utilization

Spectrum  
Efficiency

Power  
Efficiency

Network  
Elasticity

Network Agility

# ON-SITE TO CLOUD TRANSITION AND ENABLING CENTRALIZATION

- RF cabling
- RRH data cabling
- RRH power cabling
- Transport cabling

# RAN CENTRALIZATION

Distributed

Vs.

Centralized

Better Use Of Available RAN Resources Leading to Accelerated Deployments

Parallel  
WIRELESS

The logo consists of a green signal icon on the left, followed by the word "Parallel" in a large, dark grey sans-serif font. Below "Parallel" is the word "WIRELESS" in a smaller, orange, all-caps sans-serif font.

## Multivendor Open RAN - DOCOMO's Experience

**Sadayuki Abeta**

VP, Head of Open RAN Solutions  
NTT Docomo

MWC™  
GSMA

# Multivendor Open RAN

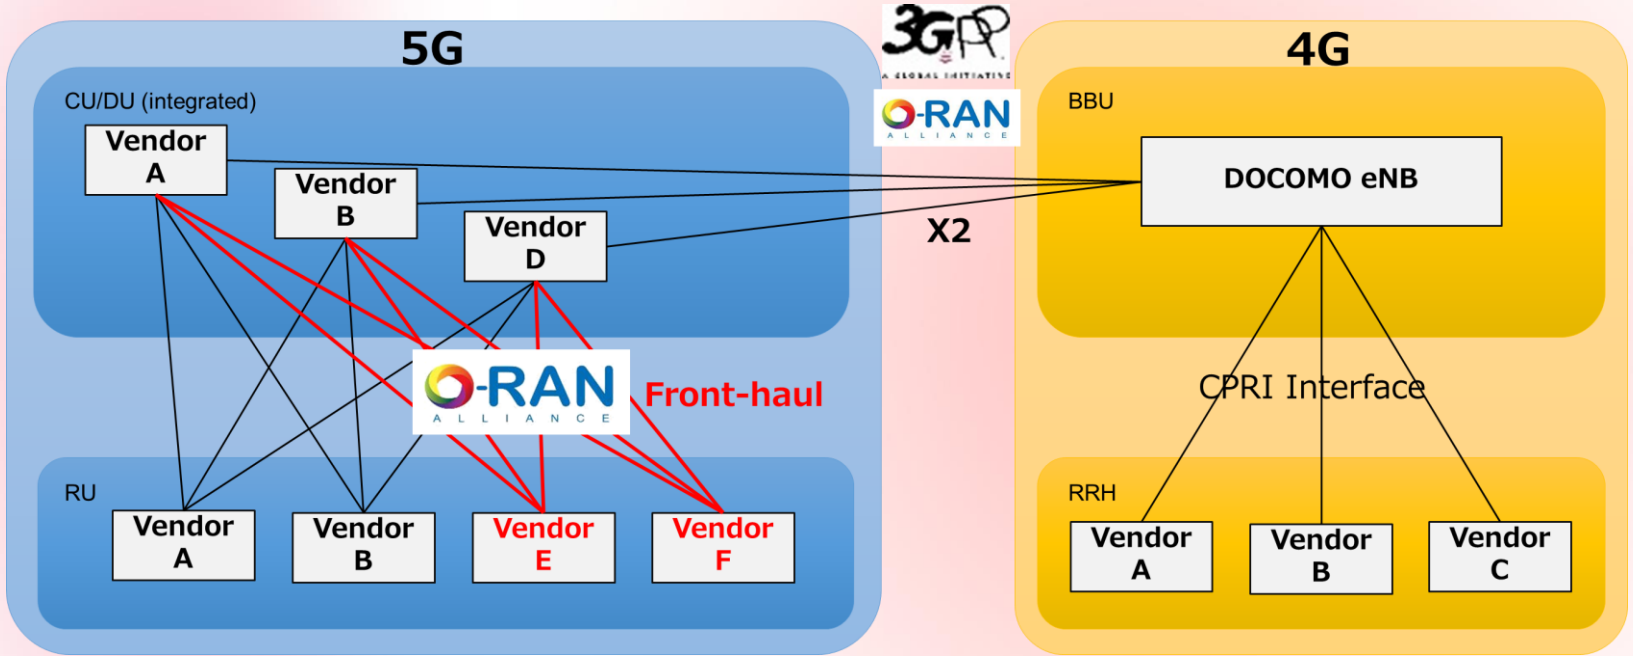

## - DOCOMO's experience -

**Sadayuki Abeta**  
**NTT DOCOMO**

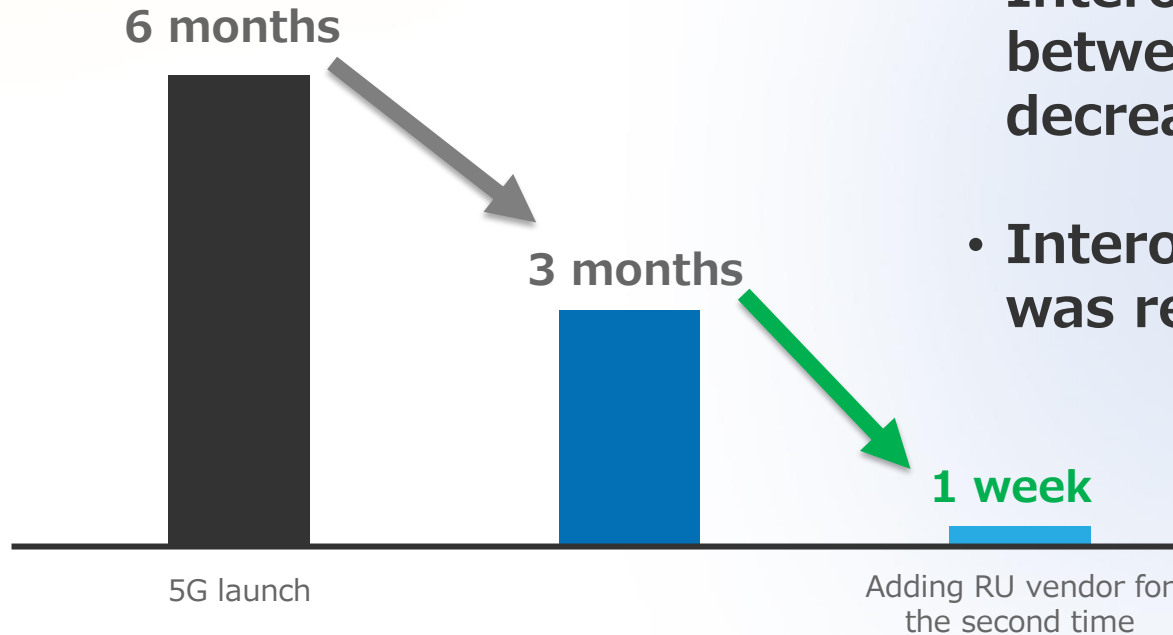

- **System Integration**
- **Inter-operability test**
- Cost structure
- New operation scheme
- ..

# DOCOMO's commercial RAN

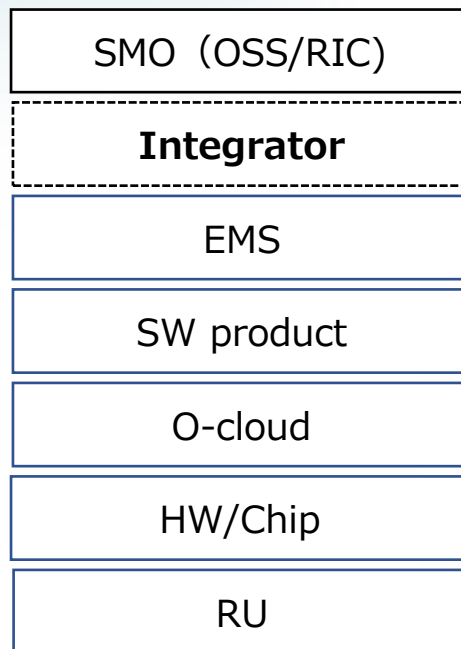

> 16 Million 5G Subscribers / > 20,000 gNB

# IOT period has been decreased

- Interoperability test period between RU and DU was decreased.
- Interoperability test cost was reduced.

- **Select best vendor after Day1**
- **Avoid supply chain risk**
- **Select the solution in the world**

**System integration is costly?**

**How can we reduce the cost?**

# Sharing is Key

## Sharing system integrated solution/result

## Sharing test process

2022.10.25

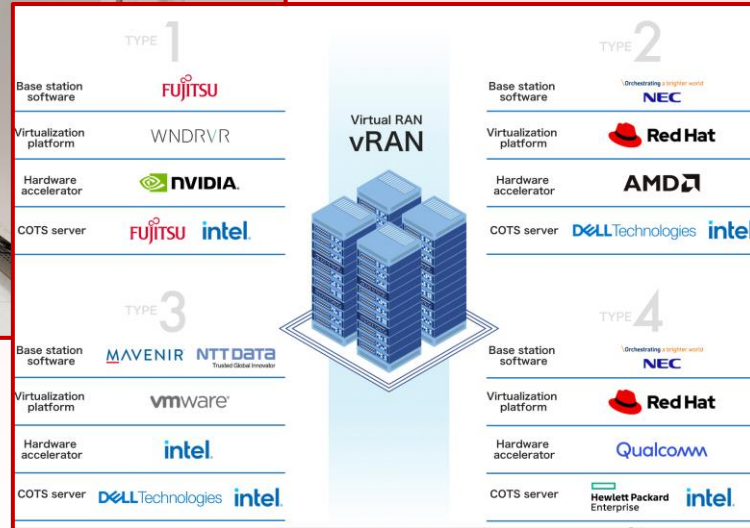

### Vodafone and NTT DOCOMO to cooperate to drive greater system integration and service efficiency in Open RAN

TOKYO, JAPAN, October 25, 2022 --- Vodafone and NTT DOCOMO, INC. (DOCOMO) agreed to cooperate to bring the benefits of open radio access networks (Open RAN) to a wider operator and vendor community.

In a Memorandum of Understanding (MoU) signed today, Vodafone and DOCOMO agreed to cooperate towards harmonizing mobile operator system integration and test processes including testing criteria and experiences to create common test scripts, a series of software instructions needed to conduct a test. This uniform approach to testing will mean that vendors can avoid repetition when dealing with multiple operators, saving them time, capital outlays, and resources, also making sure the industry delivers, no matter the region, secure by design, high quality products as defined by the industry bodies - 3GPP and the ORAN Alliance. The cooperation will be performed by exchanging the respective expertise and technologies between the parties.

## Sharing test Lab

## **BRAND-NEW OREX (Open Ran Ecosystem Experience)**

DOCOMO, aiming to eliminate telecommunications gaps in a global society where everyone is always connected, launched a project to popularize Open RAN worldwide in 2021.

Joined by 13 global vendors, DOCOMO is now conducting verifications with operators worldwide in order to develop new technologies that are expected to lead to more open fronthaul, virtualized and intelligent RAN. The initiative will advance to the next stage this year with the introduction of the OREX brand, which will provide operators worldwide with a transformed experience.

## Cloud-Native Deployment Powers Open RAN Adoption

**Vivek Chadha,**  
SVP Telco Cloud  
Rakuten Symphony

# Telecom Transformation with Open RAN

## Open Interfaces

Open RAN uses open standard interfaces between components enabling interoperability

## Hardware-Software Disaggregation

Open RAN separates hardware and software through virtualization of network functions

## Cloud-Native

Open RAN is designed to run in the cloud for greater flexibility, efficiency and scalability

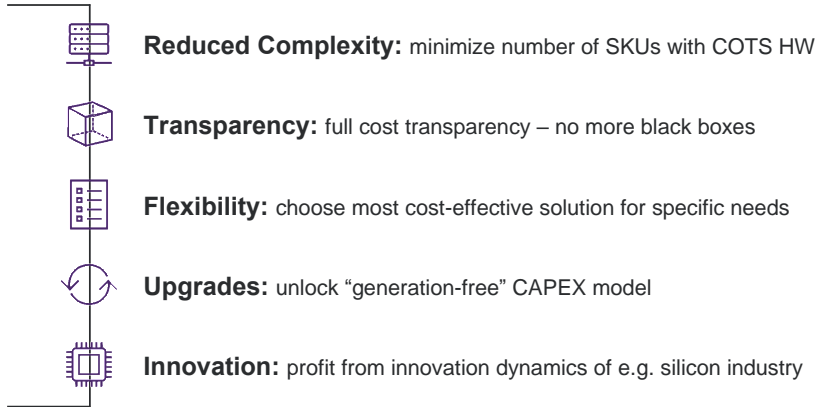

## Automation & Orchestration

The software-driven approach of Open RAN enables automation and E2E orchestration

# Disaggregation Enables Wide-Reaching Hardware Standardization & Simplification

## HW Standardization

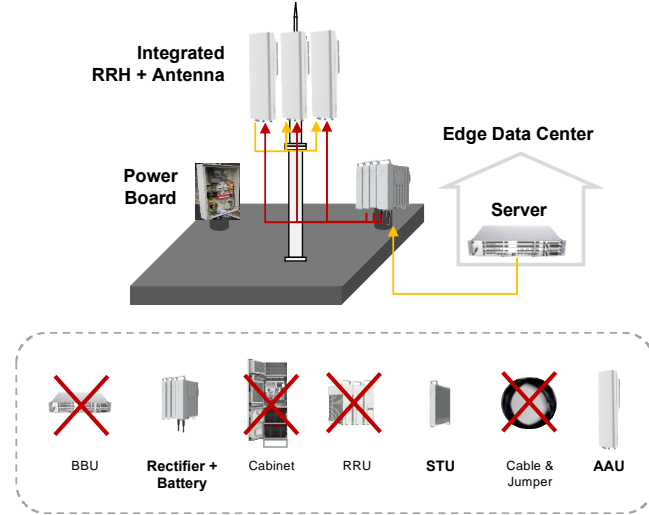

Moving towards a SW-defined NW with standardized HW

**Significant hardware cost reductions**

## Simplified Site Design

Removing electronics from the cell site – no more cabinets

# 'Open Interfaces' Set Stage for 'Mobile as a Software'

**Flexibility** – Industry-wide standardization to eliminate vendor lock-in

**Software first** – Reducing dependency on HW & opening up new possibilities

**Innovation** – Opening the market for accelerated innovation

**Automation** – reducing manual interventions during operations

Unprecedented Efficiency

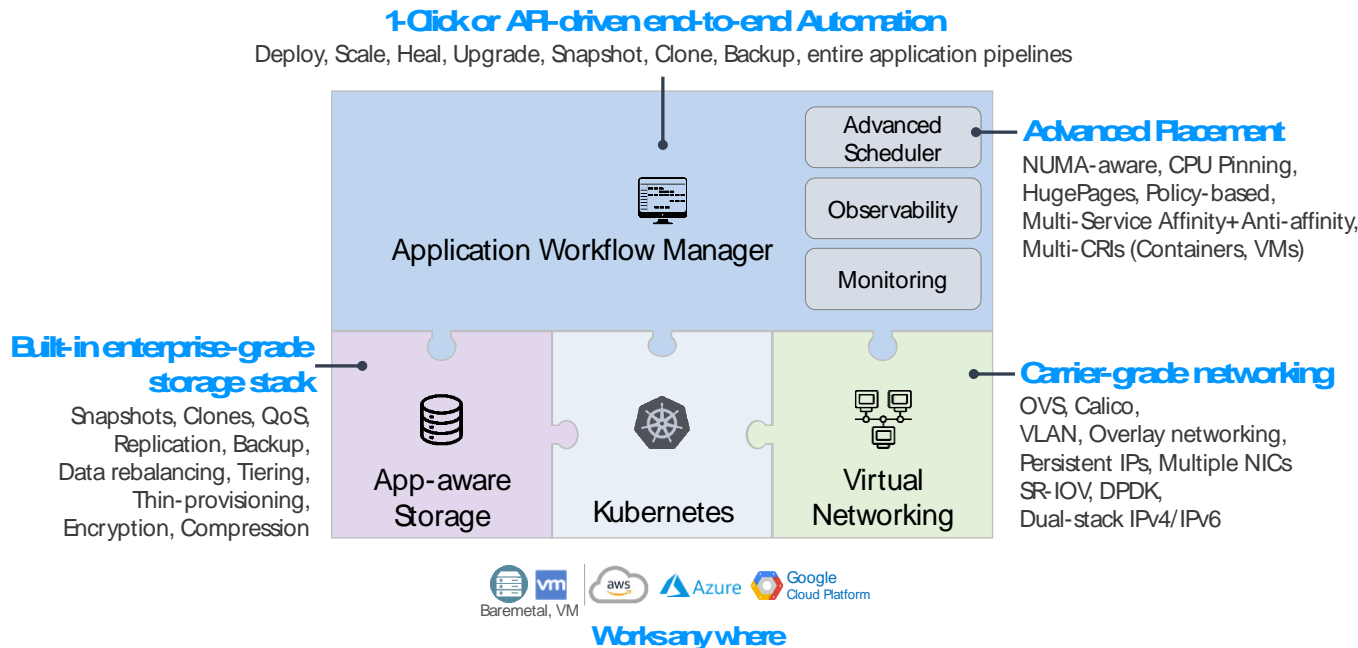

Massive TCO Reduction

New Business Opportunities

# Cloud Native – One Operational Abstraction for Telco Transformation

All underlying infra – Compute, Storage, Networking and any cloud available on demand via single click or a single API call

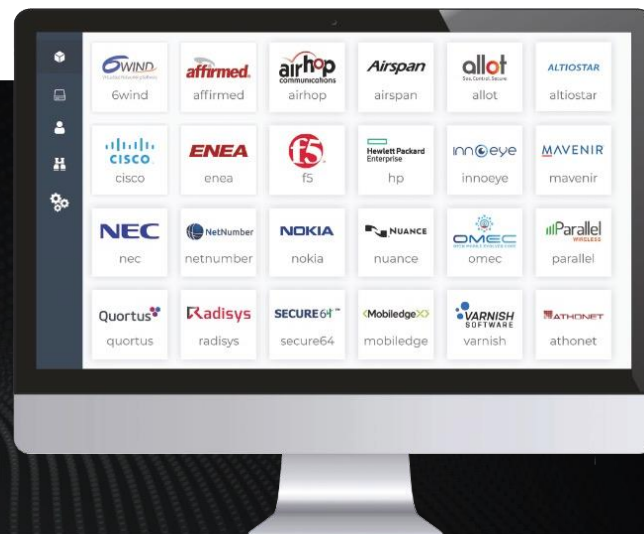

# Extreme Simplification

On board applications in hours and deploy in minutes.

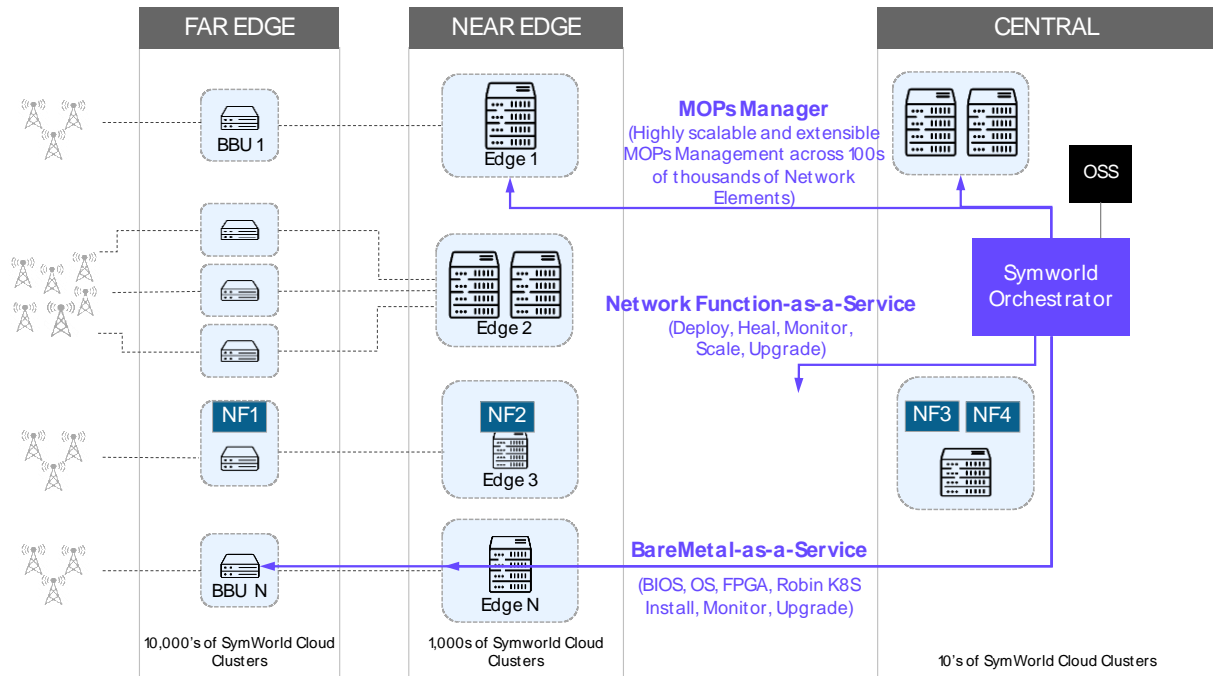

**HIGH-PERFORMANCE  
CLOUD-NATIVE PLATFORM (CNP)**

**CARRIER-GRADE DATA MANAGEMENT &  
NETWORKING CAPABILITIES**

Experience single-click deployment of your entire 5G stack

# Horizontal Cloud - One Single, End-to-End Unified Cloud From Cell Sites to Central Data Centers

Centralized Management of 10,000s of RAN, Edge & Core clusters

Policy based Closed-loop Automation

Define & Execute Complex DAG based Workflows across RAN, Edge, Core

## MULTI DOMAIN SERVICE ORCHESTRATION

Centrally manage distributed infrastructure, 3rd party applications, network functions (VNFs + CNFs) and service chains.

BARCELONA  
27 FEBRUARY - 2 MARCH 2023
