

5G Futures Summit

Welcome

Session moderator

David Nowicki

Ecosystem Development Director
Telecom Infra Project

Session 3

Unlocking a world of opportunity with Open RAN

Agenda

Session 3 keynote speaker(s)

David Nowicki, Ecosystem Development
Director, Telecom Infra Project

Lalit Kashyap, Vice President and Head -
US Communication, Media and Information
Services, Wipro

Ganesh Shenbagaraman, Head of
Standards, Regulatory Affairs &
Ecosystems, Radisys

Sadayuki Abeta, Global Head of Open
RAN Solutions/ OREX Evangelist, NTT
DOCOMO

Session 3 panel member(s)

Sameer Vuyyuru, Head of WW
Business Development for
Communication Service Providers, AWS

Manish Singh, CTO, Telecom Systems
Business, Dell Technologies

Geoff Hollingworth, CMO, Rakuten
Symphony

Moderator: **Lourdes Charles**, VP,
Global Head of 5G & Connectivity,
Wipro

Telecom Infra Project (TIP): Overview

650+ Participating Companies

FACILITATOR

TIP is a US-based independent & neutral non-profit industry organization with global reach enabling vendors, operators, system integrators, and policy makers to develop, test and deploy open and disaggregated connectivity solutions across the access-, transport- and core-networks

100+ Service Providers

ACCELERATOR

TIP accelerates adoption by aligning industry roadmaps with operator requirements/deployment scenarios, and supports deployment through test validation and certification. After years of successful trials and plugfests for Open RAN, TIP is now focussed on full system certification

WHO IS TIP?

150 + Trials and deployments in **45 +** countries

ENABLER

TIP enables supply chain resiliency, drives economies of scale and secures short time-to-market, benefiting the ecosystem

Unlocking a World of Opportunity with Open RAN

Open RAN is the future

- Open RAN Standards Bring flexibility and efficiency

Obstacles Remain

- TCO, power efficiency and performance
- integration complexity
- lifecycle management with multi-vendor solutions

What can be done?

- Catalyst funding from US NTIA and other governments
 - NTIA Head Alan Davidson @MWC Barcelona TIP Pavillion *"RFC themes for funding catalysts interventions are Interop, Security & Efficiency ... particularly test and certification"*
- TIP introducing SCOPE Full System Certification
- Innovative Approaches from today's keynotes and panelists: Wipro, Radisys, NTT Docomo, AWS, Rakuten and Dell Technologies

System Level Obstacles are Holding Back Open RAN

While Incumbents Vertically Integrate and Deliver a Full Traditional System to Operators ...

Product
Conformance

System
Integration

System Validation

Operator
Acceptance

... Operators Can't easily Source a Multi-Vendor Open RAN System in a similar manner

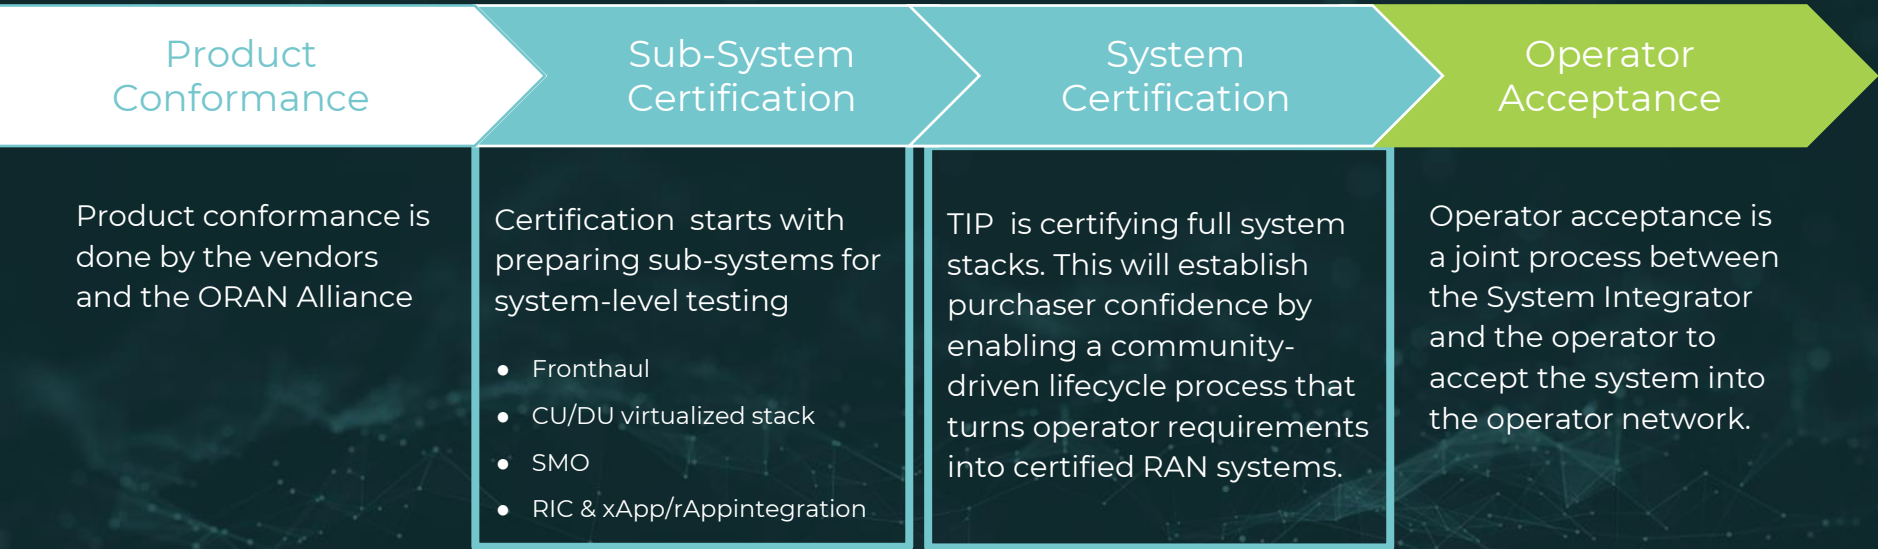

Open RAN Multi-Vendor
Conformance

Operators Forced to System
Integrate & Validate Multi-
Vendor Products

Operator Acceptance

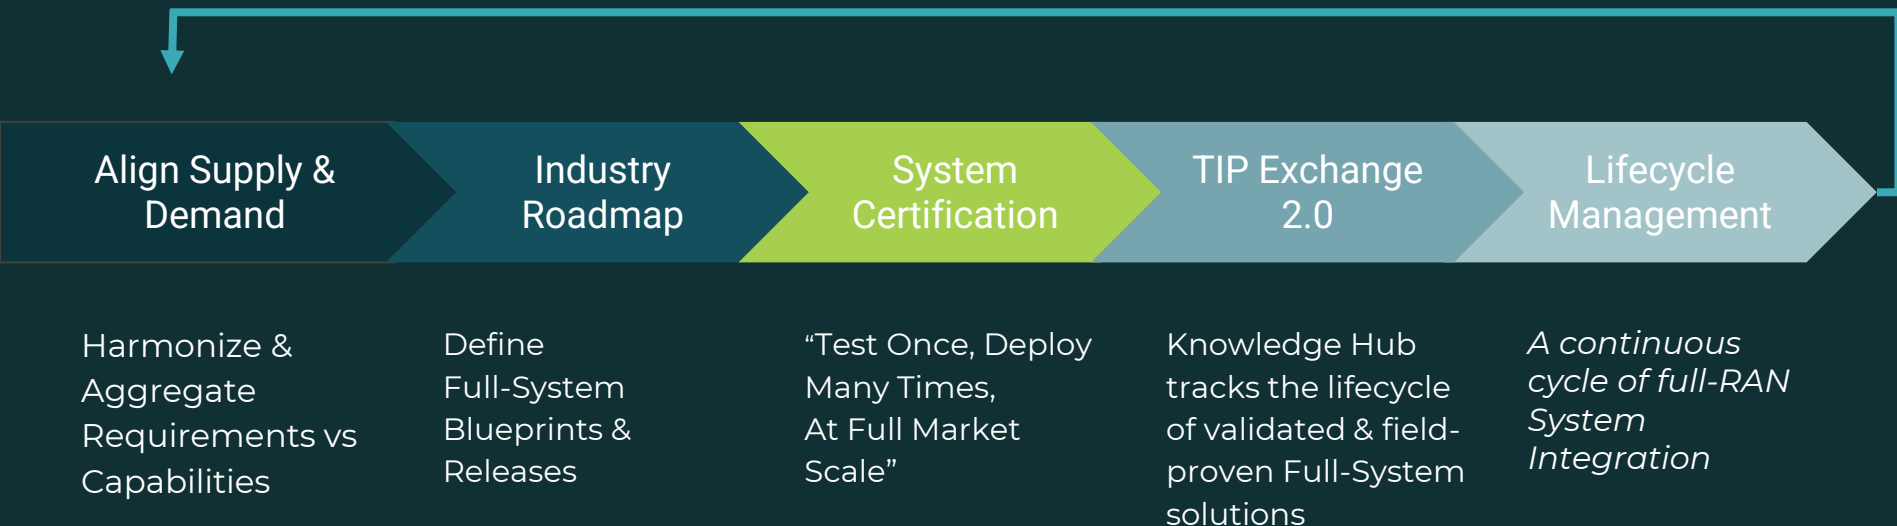

TIP Community Introducing Full System Certification

System Certification is a missing link to global acceleration

TIP SCOPE Establishes Open RAN Operator Purchasing Confidence

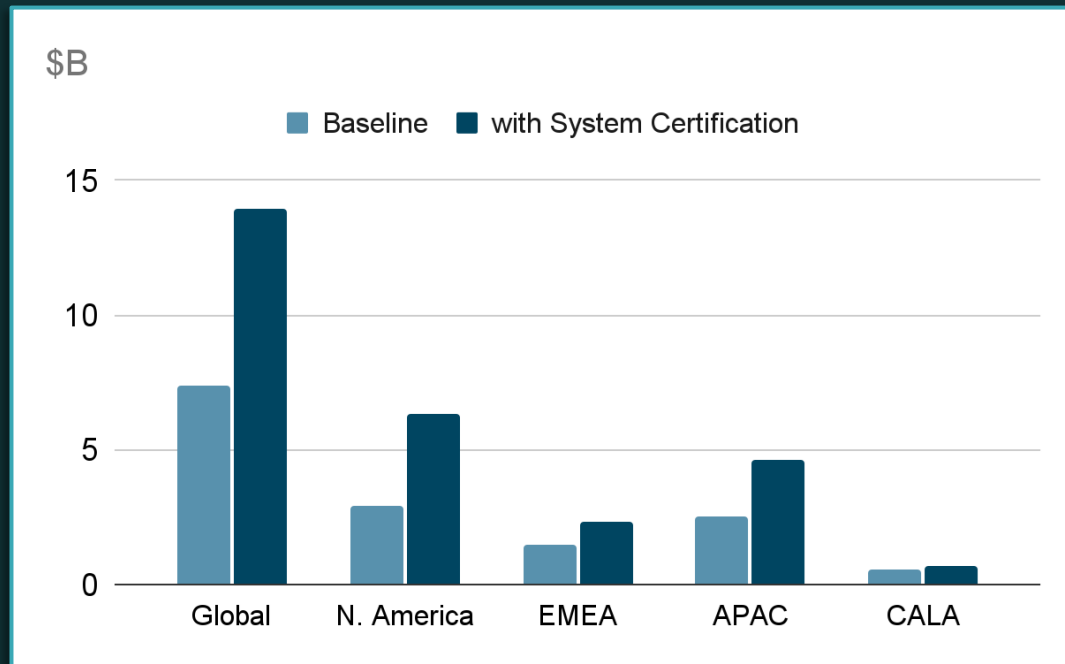

TIP Open RAN Update

Accelerating Open RAN Globally

SCOPE System Certification will lead to industry-wide streamlined testing & evaluation processes and operator purchaser confidence.

A Téral Research market research report estimated this will greatly accelerate the Open RAN equipment market resulting in a doubling in size globally to \$14 Bn by 2028.

System Certification Impact to Open RAN Equipment Market 2028

The ORAN revolution.

Adoption challenges and opportunities

5G Futures Summit – Session 3 Keynote

September 26, 2023

Table of contents

- 1 Market scape
- 2 Challenges and opportunities
- 3 Our Value proposition
- 4 Our success story

One of the **largest, most trusted, purpose-driven** technology companies in the world.

We're realizing
ambitions for over

1,400
clients

across

66
countries

250K+
employees

Why do we stand out in a world of business consultants?

We were born in tech.

Impactful innovation grows from hands-on
experience and deep technical knowledge.

Welcome to Lab45.

An incubation space where our engineers and scientists fuel your innovation with ambition.

Tap into Topcoder.

The world's largest on-demand digital talent platform with 1.7M+ developers, designers, and data scientists.

Go cutting-edge with Wipro Ventures.

Our strategic investments that bring startup innovation to solve your enterprise challenges.

We design and build pathways to the future.

Empowering enterprises with AI-fueled innovation, platforms, and talent to drive agility, efficiency, and resiliency.

Engineering Edge

Create your engineering edge by leveraging ours

- Align science, technology, and domain expertise
- Digitalize faster with less cost and risk using connected platforms like IndustryDOT, 5G Def-I, and Cloud Car

FullStride Cloud

Accelerate and innovate as a full-stack, cloud-native enterprise

- Orchestrate ecosystems
- Uncover data insights with AI and ML
- Create the connected future with Wipro Cloud Studio

Consulting

Define and Design Business transformation.

- Access best-in-class business, design and technology minds from Wipro, Capco, and Designit.
- Engage domain experts to help you define, design, and deliver results.

Enterprise Futuring

Drive forward-looking, large-scale transformation

- The leader in next-generation Digital Operations and Platforms (DOP).
- Build foundational cybersecurity
- Gain advanced protection with CyberTransform and CyberShield

The time is right for adoption of ORAN

Increasing consumption of Data | Integration of Cloud computing and AI | Deployment of 5G infrastructure

Market Share

Expanding
Global O-RAN
Market

Increasing 5G
SA technology
adoption across
the globe is
expected to fuel
the market
growth

Analysis by Rational Stat

Government
initiatives for the
deployment of 5G
infrastructure are
expected to fuel
the growth

ORAN is Driving
innovation and
commercialization
with interoperable
products and
systems

Connectivity Technology

5G plays a
dominant role

The global O-RAN market
stands at \$1B and is
expected to grow to \$15B
by 2027*

Opportunities and Complexities

02.

Opportunities and Promise

Telco Priorities

- Lowering the Total Cost of Ownership
- Reduced lock-in
- Faster Innovation
- Reduce complexity
- Scalable

O-RAN Promise

- Diversify the supplier eco-system
- Resiliency, Interoperability
- Programmability & automation of Network and Services
- Standards adoption and pretested, configurable industrialized solutions
- Disaggregation and Cloud Native operations

Complexities and Considerations

While there are several potential benefits of Open RAN, multitude of challenges hindering its adoption and scaling.

- Performance of Open RAN Vs Traditional RAN systems
- Complexity and cost of integrating disaggregated system
- Overall maintenance & operational complexity of multi-vendor O-RAN solution
- Open RAN standards evolution and continuous adoption of vendor eco-system involved
- SLA / KPI ownership of integrated Open-RAN system
- RAN Infrastructures made up of multiple vendors' equipment increase threat surface areas.

Industry eco-system evolution, collaboration of industry players, advanced network automation using AI/ML, application of digital-twin technologies etc., would help in overcoming some of the above challenges.

Our Value Proposition

03.

We are an Expert at deciphering Customer Need

Your partner for answering Why, What and How

Maximizing

Success Stories

04.

Success Stories in ORAN domain

O-RAN R&D Services delivered to leading O-RAN product vendors:

- O-RU 7.2 compliant Macro Radio product design
- O-Cloud Edge Server Platform design using latest Intel Processor
- Fronthaul GW, O-DU / O-CU Aggregation routers design for D-RAN , C-RAN deployments
- O-RAN O-DU/O-CU SW Features Design & Development
- O-RAN Service Management & Orchestrator Product design

O-RAN System Integration services delivered to leading Telcos

- Multi-Vendor O-RAN integration and validation for an European Telco
- rApps design & development, O-RAN solution integration for a North American Telco

Contributions Open Eco-system

- Gold member in ONAP community, co-lead Network Slicing & SON Features for last 3 years. Complete ownership of RAN Simulators to test ONAP system
- O1 I/F standardization contributions from ONAP community

Wipro Investments in R&D of O-RAN Products

- O-DU/O-CU reference stacks on Intel Flex RAN Platform
- rApps / xApps reference use-cases on NVIDIA GPUs
- 130+ 5G Patents files & 70+ Patent grants

We have played significant role in building E2E integration test labs, architecture blueprints, automation using AI/ML and AI Ops solutions to reduce overall TCO of Open RAN for operators.

The definition of tech for good.

We're the only tech company majority-owned by a philanthropy—the Azim Premji Foundation, serving some of the most disadvantaged populations in the world.

When you work with us, you're not just transforming your business. You're helping change the world.

\$29b of founders' personal wealth irrevocably pledged
66 cents for every \$ earned by Wipro goes to the foundation

Our 5G Def-i Innovation Center can help you define your strategy and accelerate connectivity.

Our Austin-based collaborative space helps make your products and services more safe, sustainable, and compliant by:

- Certifying 5G smartphones, tablets, modules and IoT endpoints
- Qualifying 5G mobile network infrastructure and performance
- Offering fully integrated solutions such as 24x7 product qualification, compliance, pre-certification, and interoperability testing

What if

... you had a partner to
help you achieve your
ambitions?

wipro Ambitions Realized.

DNA of Open Telecom Solutions

TELECOM INFRA PROJECT

- LTE eNB RAN system integrator in TIP
- Projects at Menlo Park, SKT, TIM (Italy)
- 5G Open RAN community lab contribution

- Co-chair of O-RAN WG8 since 2019
- Key contributions to WG3: E2SM and E2AP
- Contributions in TIFG, WG5 and WG6
- Project lead of Open source 5G DU

Small Cell Forum

- Leader of 5G nFAPI standardization
- Award for Open RAN contributions – 2020, 2021, 2022

Open Networking Foundation

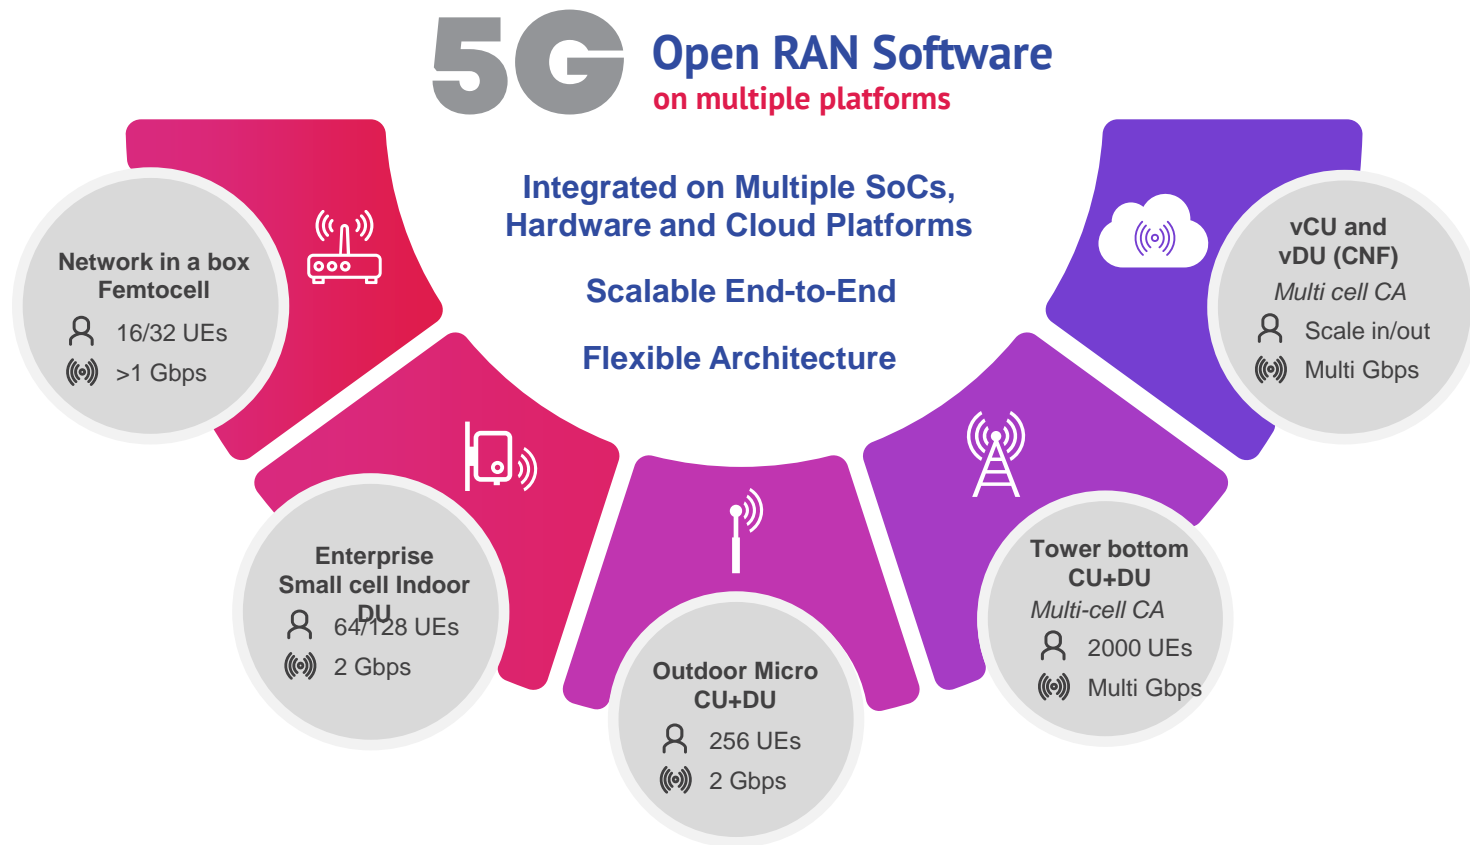

- Open-source EPC contribution to M-CORD
- Founder member of SD-RAN: Multi-vendor O-RAN trial at DT
