### 2. NOTES, DECISIONS, ISSUES

**Anti-Trust Policy and handling of Entity List:** Introduced by Tom Van Pelt

**Action List:** Updated as indicated in section 5 below

**Action 242-01:** Tom to request inclusion of Jerry in FASG study on potential RCS fraud and security issues

#### CRs:

- CR003: Presented by Tom Van Pelt
  - No comments or objections were raised
  - CR003 was approved in its initial revision
- CR009: Presented by Steffen Habermann
  - No comments or objections were raised
  - CR009 was approved in its initial revision
- CR012: Presented by Ankit Tandon
  - Editorial comments were raised resulting in a revision
  - CR012R1 will be sent for 24h approval
  - **Action 242-02:** Ankit to distribute CR012R01 for 24h approval

#### AOB:

- Universal Profile 2.4 publication: UP 2.4 and its supporting specifications were published on 16<sup>th</sup> October and are available on the Future Networks website since today (see <https://www.gsma.com/futurenetworks/rcs/universal-profile/> and <https://www.gsma.com/futurenetworks/rcs-documents/rcs-documentation/> as well as on the generic GSMA document portal.
- IR.95 Annex B: GSG to an action during the meeting in Shenzhen to correct the RCS examples in Annex B of IR.95. On closer inspection though, it seems that the annex contains so many issues that it seems unlikely that the annex is used frequently by industry parties. It may thus be better to remove it rather than to spend the effort to update it.  
**Action 242-03:** Tom to check with Marc Balon (GERI chair) and Wayne Cutler on their preferred way forward with Annex B of IR.95.
- Implementation Release 3: the Roadmap Group proposed to include all new UP 2.4 features in the next implementation release, next to Spam and Fraud reporting and Spam blocking. When the scope is closed, GSG will have to produce a description to define the release in detail to be added to PRD RCC.73.
- Next meetings:
  - The call on 19<sup>th</sup> November will be shifted to the late slot to avoid a conflict with the Roadmap Group call
  - Further calls will be scheduled on 3<sup>rd</sup> December and 7 January which may be cancelled depending on the number of contributions submitted.
  - 15<sup>th</sup> November will be the deadline for RCC.72 CRs going into the next publication of that PRD
  - **Action 242-04:** All to bring CRs to RCC.72 by 15<sup>th</sup> November COB to allow discussing them in the call on 19<sup>th</sup> November.
  - GSG will meet F2F during the NG subgroup meetings in London in January, on the afternoon of Thursday 23<sup>rd</sup> January and Friday 24<sup>th</sup> January in the morning. No conflict exists with other NG subgroups, but there will be an RCS business messaging lab on 23<sup>rd</sup> January which may affect some delegates.
  - During NG#11 in Las Vegas, GSG will meet for 1 day on the Tuesday 31<sup>st</sup> March in parallel to GERI.

## 6. ISSUES REGISTER

### 1. IMDN character length

- RCC.72 v1.1 section 3.1.1 sets the maximum length for the value of the IMDN.Message-ID to 36 characters.
- GSMA RCS IOT joyn Blackbird Implementation Guidelines ID\_5\_2 set the maximum length for the value of the IMDN.Message-ID to 32 characters.

IMDN maximum length value needs to ensure interworking and backward compatibility with pre-UP clients.
