International EMF guidelines apply to 5G

- ‘…guidelines protect against all potential adverse health effects relating to exposure to RF EMF from 5G technologies.’

- 5G frequencies similar to other wireless technologies

- 5G levels far below limit values:
  - Ofcom (2020):
    - maximum measured level all mobile - 1.5% of limit
    - maximum measured level 5G - 0.0039% of limit
Science based information on 5G EMF and health

5G mobile networks and health

‘Provided that the overall exposure remains below international guidelines, no consequences for public health are anticipated.’
