and over 300 000 corporate
customers

STANDARDS

GlobalSign IAM Team has
been participating in the
standardization of IAM
protocols for years

FEDERATION

Our technology is used in
large scale federation
networks linking dozens or
hundreds of organizations
and services

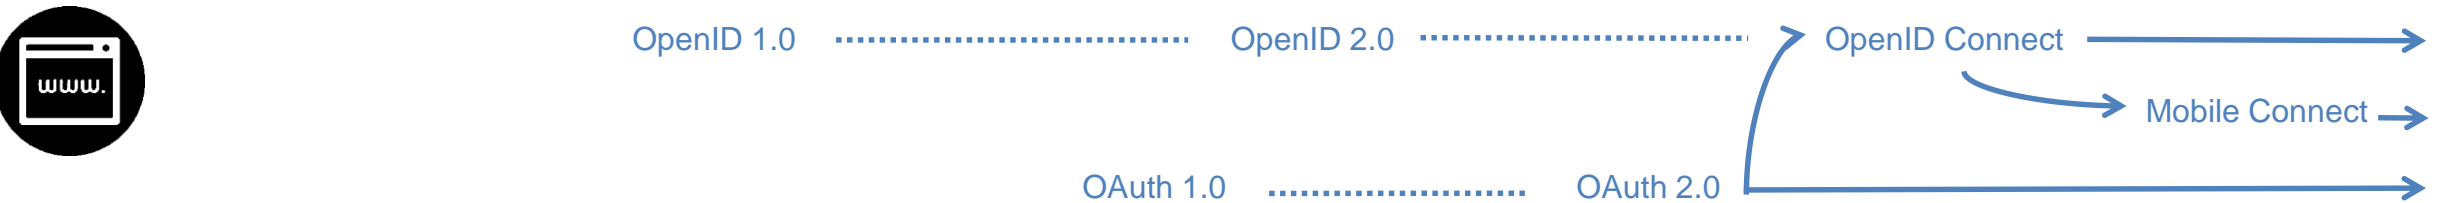

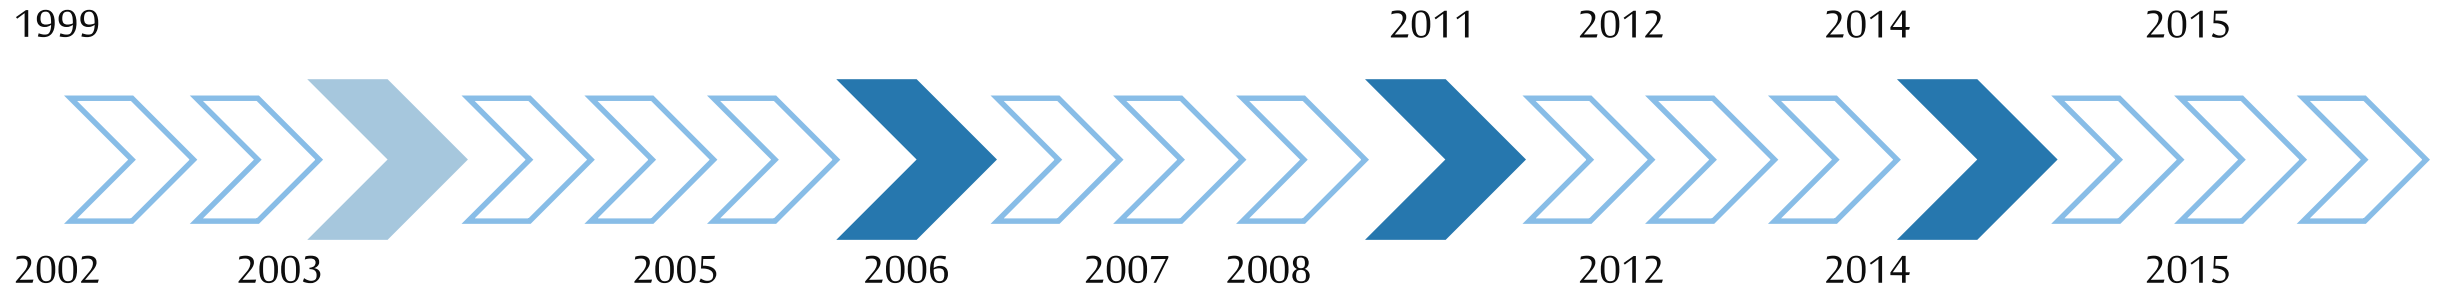

WE'VE BEEN THERE

FACT OF LIFE - MULTIPLE STANDARDS

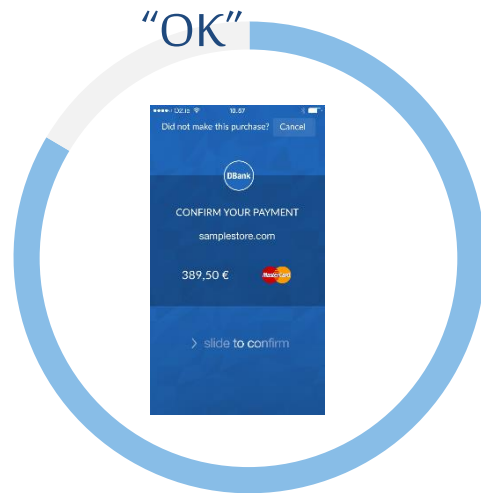

For implementing mobile phone authentication there are multiple standards you can pick up. But the online services can also utilize different standards for external authentication.

All standards supported by
GlobalSign IAM

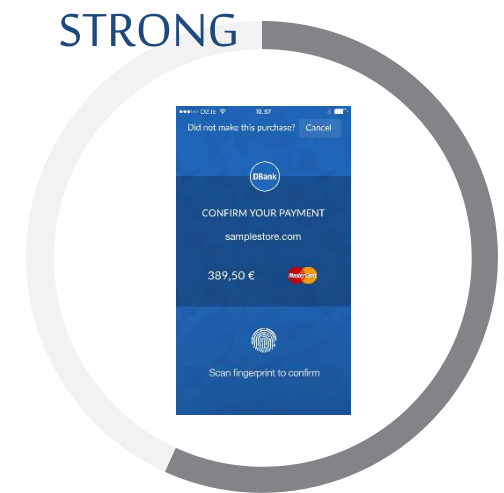

LEVEL OF ASSURANCE

Authentication is based on the presence of the token (mobile device). Swipe, click ok etc...

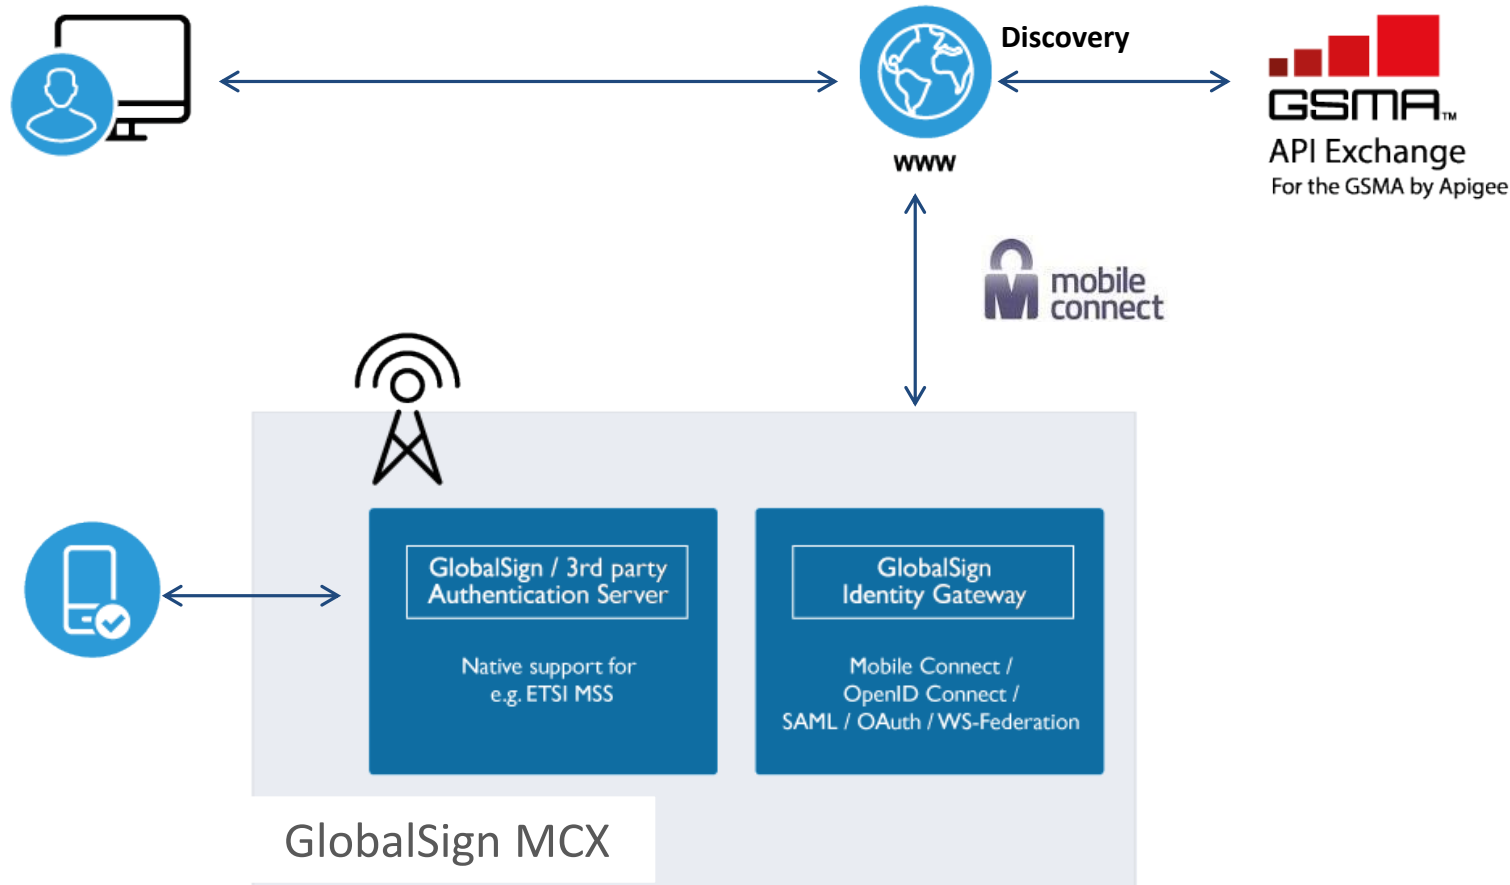

One-time-passwords as an SMS message, mobile generated (offline), list etc...

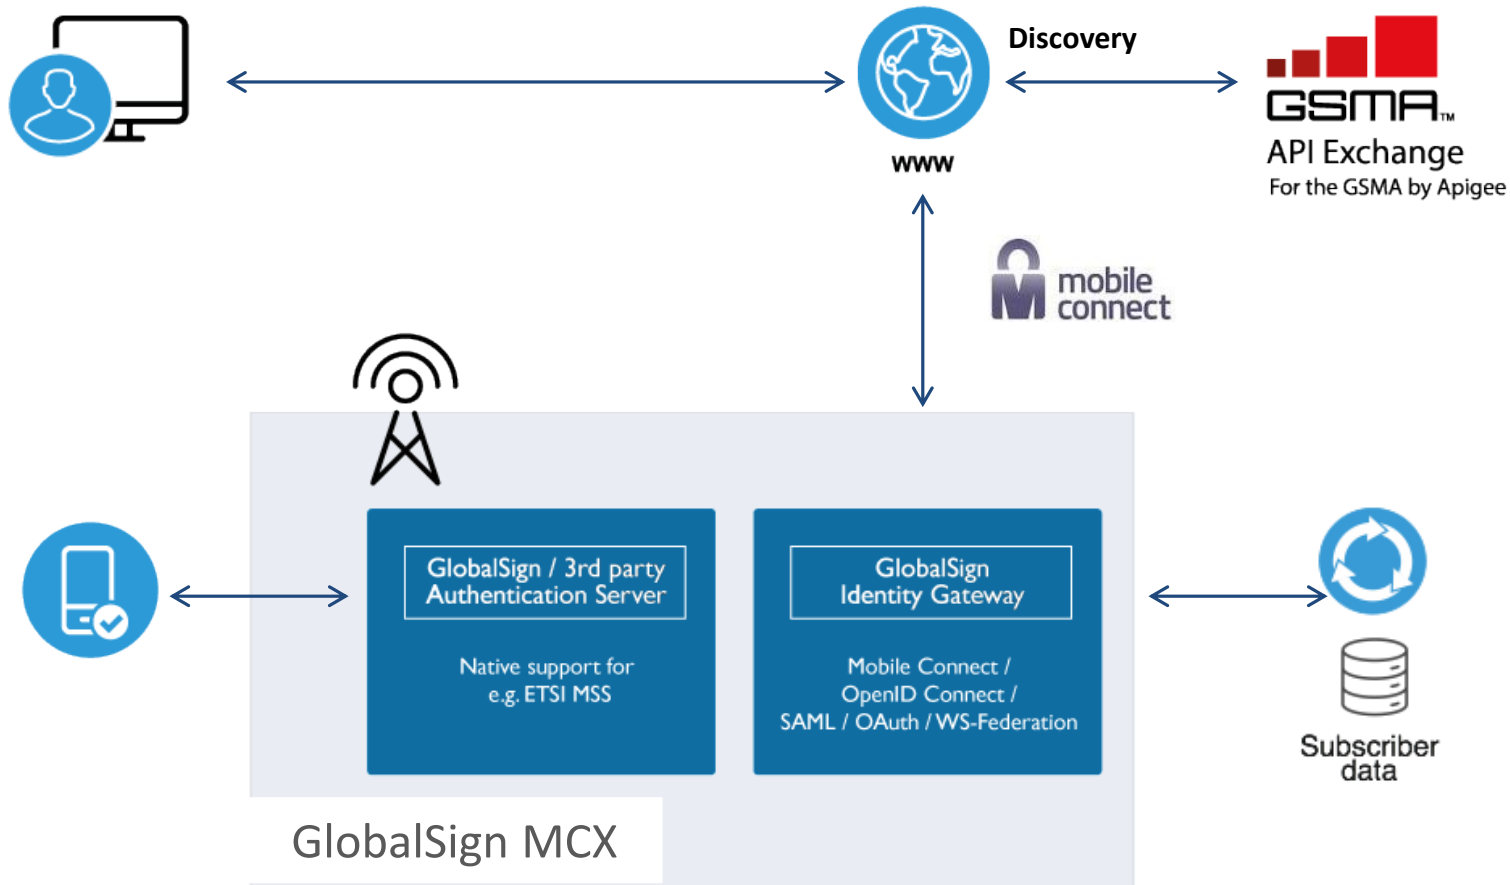

PKI, biometrics, multi-factor methods

MCX

- Mobile Connect Accelerator by GlobalSign
- Identity Gateway with multi-protocol support
- Out-of-the-box authenticator(s) through partnerships
- Option for the operator to choose their own authenticator(s)

ATTRIBUTE DATA

- REST APIs available for connecting to the back-end systems if needed
- Subscriber attributes for service providers
- Extensive and flexible authorization policies per service through the management console (no coding, no parsing)

BENEFITS

IT'S EASY

GlobalSign MCX can enable Mobile Connect in a matter of days (we've done it)

USERS LOVE IT
