Welcome to the new standard in digital authentication

Introducing a brand new service that allows developers of digital services to authenticate users quickly and securely without the need for user names and passwords. Mobile Connect is a global platform, run by mobile network operators.

About Mobile Connect

Offering people a simpler way to log-in is proven to reduce log-in friction and increase engagement. By signing up to Mobile Connect you can access the customer base of all participating mobile network operators worldwide via the API Exchange.

[Read more](#)

Using Mobile Connect

This portal has everything you need to incorporate Mobile Connect into your own applications and services. Read API references, download test apps and SDKs and find out which mobile network operators offer Mobile Connect today and how to register with them.

[Read more](#)

Test drive Mobile Connect

We've created an integrated Sandbox where you can experience the Mobile Connect API for yourself.
