## Authorisation

User **authorisation** of SP requests

## Identity

Assertion of user **identity**

## Attributes

Insights about the **user, device or transaction**

Helping users manage their identity across their **digital footprint**

## Simple and secure user authentication on a global scale

### How it works?

**AUTHENTICATION  
REQUESTED**

**USER  
CHALLENGED**

**ACCESS  
GRANTED**

### Use cases

-  Universal password-less login
-  Convenient 2-Factor authentication
-  Hard tokens replacement

## Contextual & explicit approval through a mobile device

### How it works?

REQUEST  
INITIATED

AUTHORIZATION  
APPROVED

TRANSACTION  
COMPLETED

### Use cases

- High value payment approvals
- Parent approval of child's purchase
- Simple captcha replacement

## Verified personal data retrieval with user consent

### How it works?

**IDENTITY  
REQUESTED**

**CONSENT  
ACQUIRED**

**USER DATA  
SHARED**

### Use cases

-  Provision of user's phone number
-  One click signup & guest checkout
-  Regulatory compliance ID checks

## Mobile subscriber checks for ID verification & fraud mitigation

### How it works?

INTELLIGENCE  
REQUESTED

NETWORK CHECK  
DONE

RESULTS  
SHARED

### Use cases

-  Knowledge based ID verification
-  SIM swap fraud prevention
-  Seamless device verification
