

Seminar: Data attributes as the new digital identity currency

February 26 2018

Time: 11.00 – 13.00 CET

Marie Austenaa

VP and Head of Identity Business Development, GSMA Identity

Not knowing who you deal with online is expensive and inefficient...

Peter Steiner and published by The New Yorker on July 5, 1993

Mobile Connect – digital identity from the mobile operators

A portfolio of mobile-based secure identity capabilities giving **simple**, **secure** and **convenient** access to online services

- Simple and ubiquitous **log-in** or **step-up authentication**
- **Authorise** digital transactions and payments
- **Verify** or provide user identity
- **Confirm insights** about user's mobile account or device

470m active users in over in 30 markets

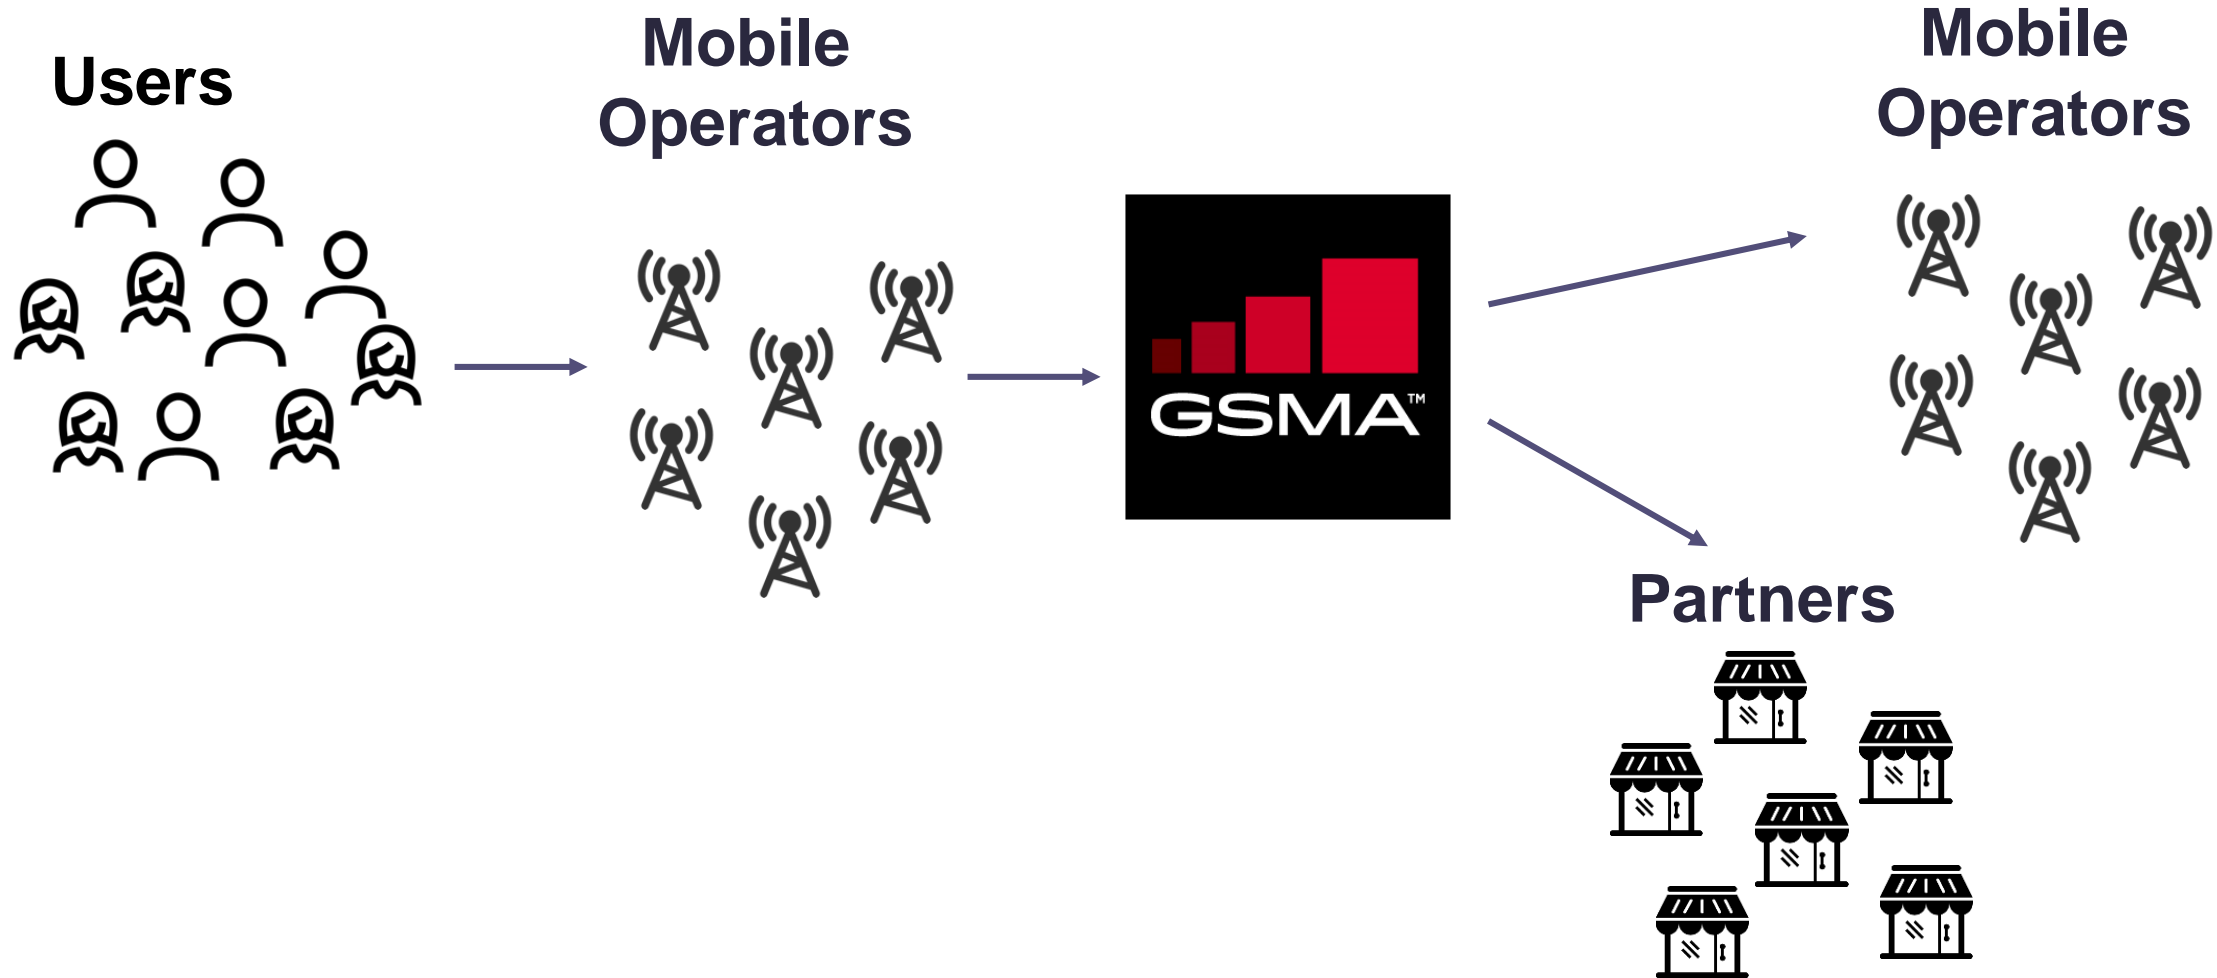

Mobile Connect is growing and adding value around the world

France
Connect

GSMA is simplifying use of Mobile Connect

Agenda

11.10– 11.20	Global and local demand for user attributes	Ravish Patel (BICS)
11.20– 11.30	US Mobile Authentication Taskforce and the drive towards a trusted identity enabled digital future for our customers	Aparna Khurjekar (Verizon) Johannes Jaskolski (AT&T)
11.30– 11.40	Digital identity attributes in Europe	Patrice Slupowski (Orange)
11.40– 12.15	Panel discussion: How are attributes helping to monetise the digital identity space in the UK?	Atredeeve Banarjee (Danal) Duncan Sturdy (Three) Fraser King (Vodafone) Glyn Povah (O2) Jennie Avery (EE) Stephen Ufford (Trulioo)
12.15– 12.25	An analysis of the market opportunity for cross border e-commerce transactions	Dr Jesse Weltevreden Amsterdam University of Applied Sciences
12.25– 13.00	Panel discussion: The trend towards new age cross-border transactions	Andzrej Ochocki (DT) Andy Doyoung Kim (SKT) Keiran Dalton (Aspect) Stacy Subblefield (Telesign)

Attributes as the new digital identity currency

Keynote: Global side of attributes

Ravish Patel

Introduction - Bridging the telecom and digital worlds

TeleSign leader in mobile identity & communication APIs

Global provider of international connectivity and interoperability solutions

- Creating the first world end-to-end CPaaS (Communication Platform as a Service) provider
- Providing mobile identity services & contextual communications globally

**20 billion dollars marketplace

Mahidharpura Street**

TRUST

Digital marketplace...

I expect a service

anywhere
realtime
any channel

How to enable **TRUST** on
digital marketplaces **GLOBALLY...**

GLOBAL IDENTITY NEWS

**Two billion files leaked in US data breaches in 2017
involving 500+ breaches**

**16 million+ US consumers affected by identity frauds leading
to over \$16.8 billion loss**

**Average ATO victim paid \$290 from their pockets & spend 15 hours to
resolve the fraud**

**Florida state opens investigation into fake social media accounts created using
stolen identities**

50% of internet users are falsifying the data at onboarding

**Phone number (27%)
Date of birth (17%)
Email address (16%)
Home address (15%)
Name (14%)
Age (14%)**

<https://www.infosecurity-magazine.com/news/rsa-security-consumers-falsify/>

Reports - India UID AADHAR data being illegally sold at \$0.10 per user

<https://scroll.in/article/857274/now-even-the-fingerprints-of-urban-indians-are-failing-during-aadhaar-authentication>

1000 fake likes for \$ 9

Thai police raid WeChat 'click farm', find 347,200 SIM cards

Global services & applications

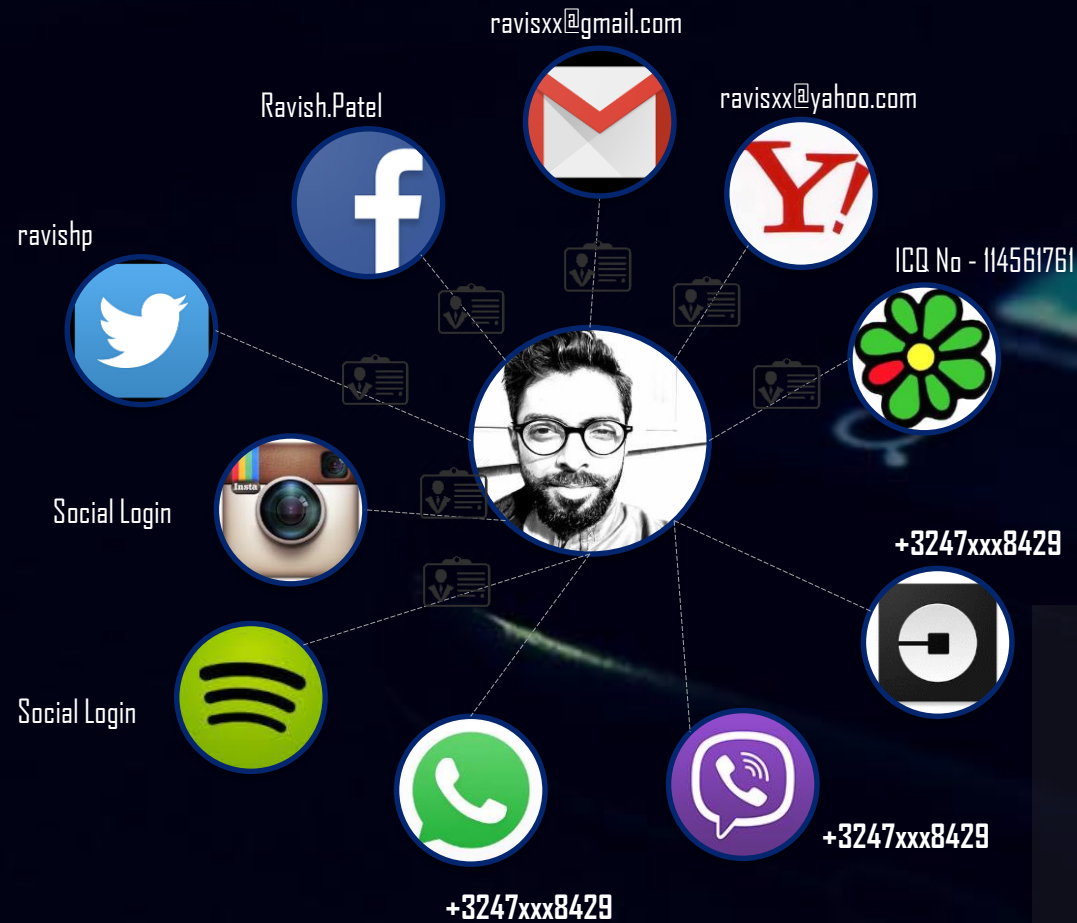

Growth – profitable users
Trusted Ecosystem
Raise User Experience

Fake users
Spam / fake reviews
Fraudulent transactions

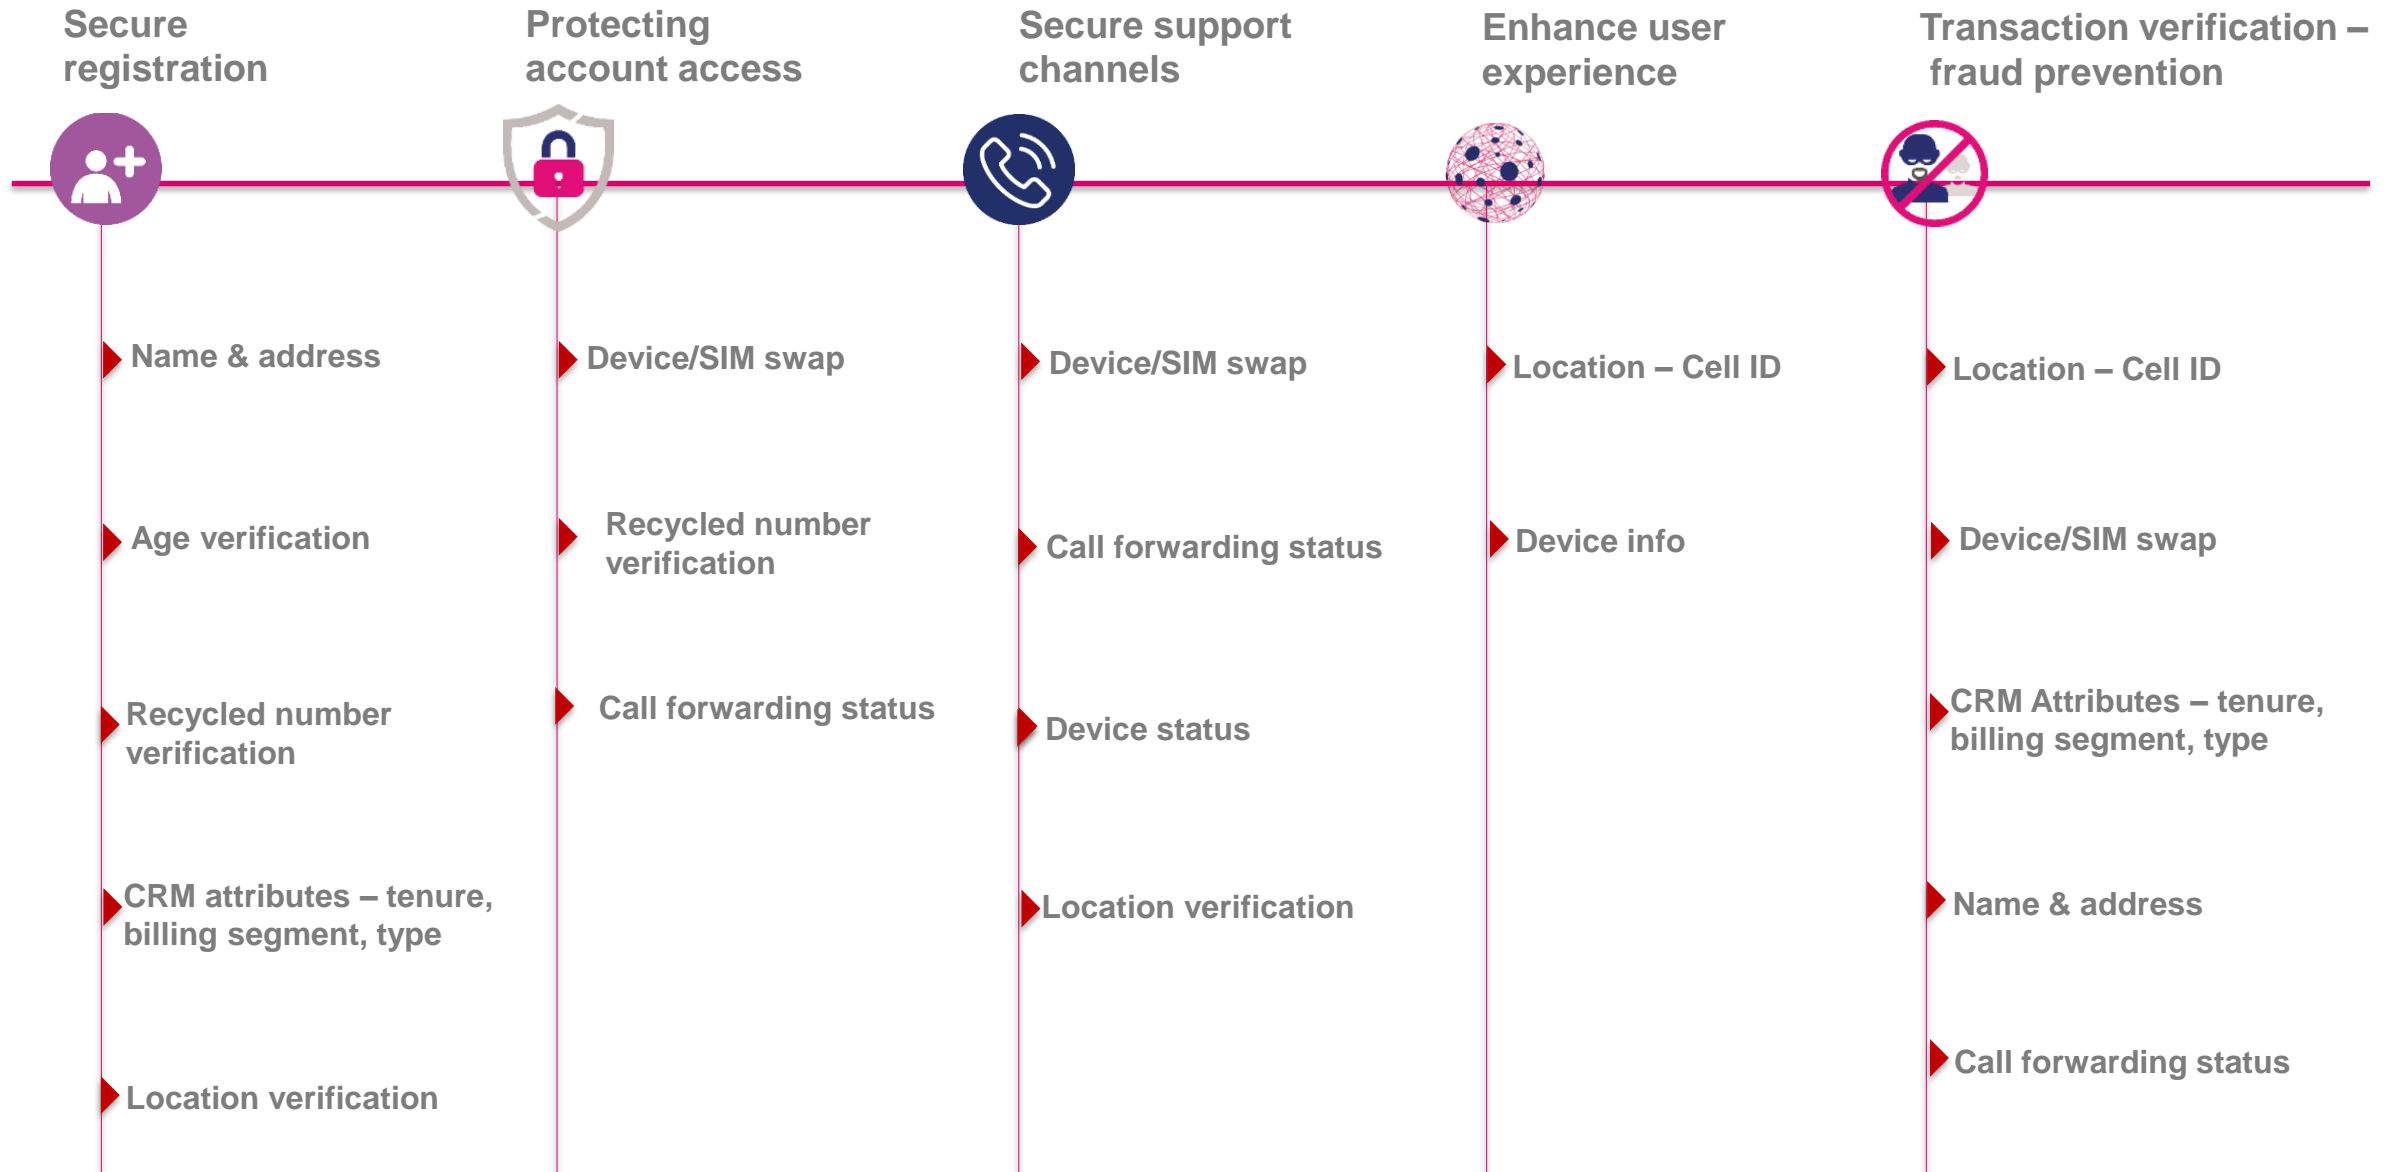

Poor brand image
Fraud loss
Compliance issues

By 2021, 350 billion apps will be downloaded by users across multiple devices, geographies

Evolution of phone number as an identity will drive the demand of data attributes globally

Example use case: data attributes needed

Inhibitors and contributors to data monetisation

Way forward – Regional opportunities

Challenges	Opportunity
<ul style="list-style-type: none">• Data breaches & comprised identity	<ul style="list-style-type: none">• Increasing attribute needs for behavioral risk based authentication

Challenges	Opportunity
<ul style="list-style-type: none">• Alignment on GDPR	<ul style="list-style-type: none">• Value for verified contact data• Operators more inclined to start with match based services

Challenges	Opportunity
<ul style="list-style-type: none">• Lack of awareness• Incomplete customer data	<ul style="list-style-type: none">• Prioritise CRM & network attributes in absence of identity data• High volumes

Challenges	Opportunity
<ul style="list-style-type: none">• Lack of awareness• Incomplete customer data	<ul style="list-style-type: none">• Prioritise CRM & network attributes in absence of Identity data• High volumes

Challenges	Opportunity
<ul style="list-style-type: none">• Lack of awareness• Incomplete customer data	<ul style="list-style-type: none">• Prioritise CRM & network attributes in absence of Identity data• Alternate usage of mobile data

How soon will autonomous vehicles be on the road (and are we ready for them)?

My building has been hacked...

**The future of
digital identity
will be strong,
frictionless
& multi-factor**

Digital identity is identification & authentication

Identification

Authentication

1 CAPTURE
EVIDENCE OF
IDENTITY

Capture the identity with accurate and complete details of the person responsible for the mobile (Trusted)

2 VERIFY
IDENTITY
ATTRIBUTES

Tools required and what supporting of identity and KYC (Know Your Customer)

3 DIGITAL
IDENTITY
REGISTRATION

Storage of relevant information of the identity

4 CREDENTIALS
AUTHENTICATION

Authentication (Credentials for digital identity usage) is given at the end of this process

Trusted
Digital Identity

Digital life / real life identity link is needed

Identity attributes

A man and a woman are smiling and looking at a tablet together. The woman is pointing at the screen with her finger. The background is a warm, yellowish light, possibly from a window.
