

# INTERNET OF THINGS

## Mobile IoT Marketing Update

19 July 2018

Andrew Parker, Programme Marketing Director IoT, GSMA  
Eric Yu, Marketing Manager IoT, GSMA

# GSMA Antitrust Policy

- Anti-trust law prohibits (i) agreements (written or implicit) between competitors which may negatively impact consumers or competitors and (ii) sharing of confidential information
- All GSMA participants **must** abide by the following rules:
  - ✓ **DO** clearly identify the positive purpose of each project and follow it
  - ✓ **DO** consult with legal in areas where you are unsure
  - ✗ **DON'T** enter into agreements that restrict other parties' actions or creates barriers to market entry
  - ✗ **DON'T** discuss or exchange information on pricing, business plans, or any other confidential or commercially sensitive data

# Mobile IoT Marketing Group

# Agenda

1. Intelligent Connectivity
2. Activity Updates
3. Mobile IoT Commercial Launches Update
4. GSMA IoT Marketing Resources
5. AOB

# INTELLIGENT CONNECTIVITY

LIFE 5.0

‘the fusion of 5G, AI and IoT’

Gigabit Mobile Internet | Enhanced Public Services | Industrial Automation  
Entertainment Everywhere | Sustainable World | Efficient Transportation

LIFE 5.0

**INTELLIGENT  
CONNECTIVITY**

Hyper Connectivity +  
Artificial Intelligence

Intelligent connectivity is underpinned by the hyper-connectivity that will be delivered through 5G and the Internet of Things, combined with artificial intelligence and big data

**IC = 5G + AI + IoT**

Intelligent connectivity will have significant impact for individuals, industries, society and the economy

Customers will enjoy immersive, contextual experiences; society will use technology to tackle our world's biggest challenges; industries will realise greater efficiency and productivity; and intelligent connectivity will sit at the heart of new ecosystems and growth

LIFE 5.0

Smart Platforms With AI

5G Mobile Networks

Intelligent Connectivity

'The confluence of high internet speeds, big data, the Internet of Things, analytics and artificial intelligence will fundamentally alter the way we live and work, intelligently connecting virtually every device, making our cities smarter and our lives easier and more productive.'

Mats Granryd 2018

Hyperconnected IoT

People

Houses

Infrastructure

Vehicles

Factories

Cities

the value created by the fusion of 5G, AI and IoT

Intelligent Connectivity

LIFE 5.0

# INTELLIGENTLY CONNECTING EVERYONE AND EVERYTHING TO A BETTER FUTURE

---

## EXAMPLE USE CASES

### Connectivity

Gigabit Mobile Broadband - Reliable, superfast Mobile Broadband everywhere

### Entertainment

Cloud Based Mobile Gaming - Immersive gaming anywhere, without hardware costs

Dynamic Advertising - Entertaining, relevant high definition video advertising

### Transportation

Autonomous Transportation - Convenient, safe, independent travel

Drone Delivery - Fast, secure unmanned delivery

### Enhanced Public Services

Connected Care - Real time healthcare & homecare monitoring

Connected Crime Prevention - Video enabled detection and deterrence

### Industry

Real Time Robotics - Tactile Internet for automation, telepresence and learning

### Sustainability

Proactive Environment Management - Reducing pollution in a smart city

Smart Agriculture - Enhanced food production & efficient distribution

## GIGABIT MOBILE BROADBAND

Reliable, superfast Mobile Broadband everywhere

Ubiquitous 12 Mbps – 1 Gbps download speeds will enable a consistent high quality Mobile Broadband experience enabling unbroken Internet access at home, office and on the move.

The seamless combination of 4G, 5G and networked WIFI will enable delivery of constant high quality mobile broadband.

### TECHNOLOGY ENABLERS

Source: GSMA AP, EY, GD, PM May 2018

## CLOUD BASED MOBILE GAMING

Immersive gaming anywhere, without hardware costs

Gaming is becoming more immersive with AR and VR, more social with multiple players and more realistic with higher definition graphics.

Fast, mobile, low latency access to the internet will enable gamers to enjoy new virtual reality games anywhere without the cost or inconvenience of expensive locally accessible games computing hardware.

### TECHNOLOGY ENABLERS

Source: GSMA May 2018

## DYNAMIC ADVERTISING

### Entertaining, relevant high definition video advertising

Wherever there is power, there is promotion. Intelligently connected high definition screens will enable exciting, ever changing and relevant advertising video messages delivered from low cost flat screens placed in any public space.

Remotely and intelligently managed video will change to maximise entertainment, relevance and impact.

#### TECHNOLOGY ENABLERS

Source: GSMA AP, EY, GD, PM May 2018

# AUTONOMOUS TRANSPORTATION

## Convenient, safe, independent travel

Your 5G connected ride may be summoned by mobile phone to pick you up wherever you are located with progress to arrival reported on your mobile. Climb in, tell the car, taxi, drone to take you home and you have a snooze in the back seat.

On-board sensors enable the connected vehicle to be responsive and intelligent enough to travel safely and efficiently. Using data from multiple sources to adapt to changes in climate, traffic and other road users as necessary.

### TECHNOLOGY ENABLERS

Source: GSMA AP, EY, GD, PM May 2018

## DRONE DELIVERY

### Fast, secure unmanned delivery

Order on your shopping anywhere on your mobile and received delivery in the hour. Fleets of drones and road based unmanned delivery vehicles will enable fast, low cost, secure delivery straight to customer's front or back doors.

5G connection will enable high volumes of drones to navigate autonomously avoiding collisions with buildings, street furniture and other drones. AI platforms will optimise routes management enabled more efficient delivery.

### TECHNOLOGY ENABLERS

Source: GSMA AP, EY, GD, PM May 2018

## CONNECTED CRIME PREVENTION

### Video enabled detection and deterrence

High definition mobile connected video cameras will enable authorities to identify street crime and offenders automatically. Intelligently connected cameras will identify criminal behaviour. Once the offence is spotted, the criminal will be identified through video enabled facial recognition, digitally marked to be clearly identified on other cameras and police officers directed to the relevant location for arrest.

Once the criminal is convicted facial recognition, digital marking and physical electronic tagging will ensure court enforced curfew or travel limitation compliance.

### TECHNOLOGY ENABLERS

Source: GSMA AP, EY, GD, PM May 2018

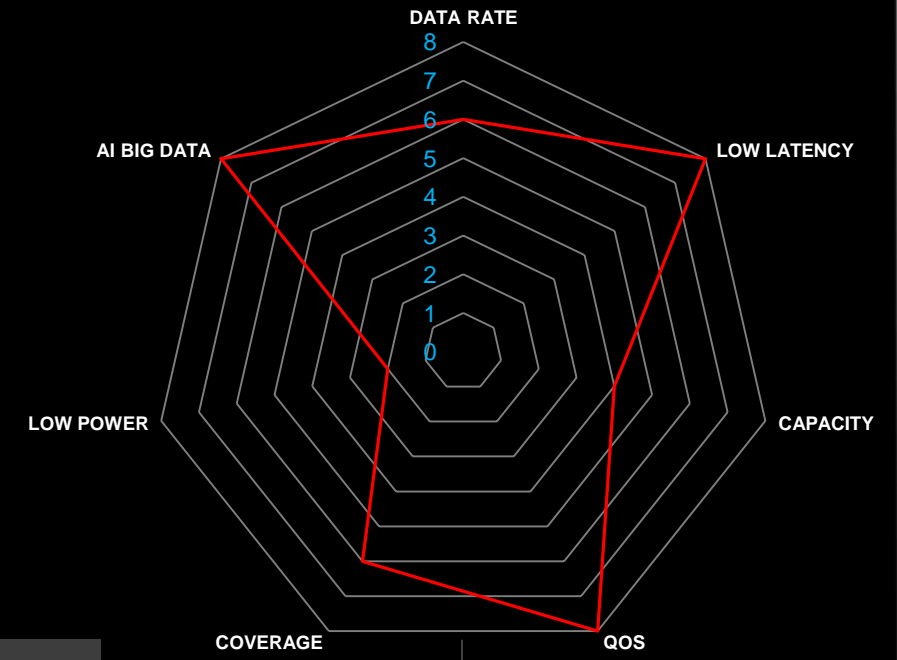

## REAL TIME ROBOTICS

### Tactile Internet for automation, telepresence and learning

The Tactile Internet will enable haptic interaction with visual feedback. Automation, robotics and telepresence are already growing in importance in industrial applications like smart factories and the remote operation of industrial machinery.

The Tactile Internet will take the possibilities still further, enabling the efficient manufacturing of highly customised products, remote mining in high-risk areas, and remote inspection, maintenance and repair of everything from industrial plant to airplanes

#### TECHNOLOGY ENABLERS

Source: GSMA AP, EY, GD, PM May 2018

## PROACTIVE ENVIRONMENT MANAGEMENT

### Reducing pollution in a smart city

Predictive IoT is being used by government and mobile operators to reduce pollution in smart cities. Mobile IoT has enabled many more connected pollution sensors to monitor pollution levels in cities.

Real time AI assisted monitoring platforms are using sophisticated data models combined with weather, commuter information and town planning information to predict times & areas of poor air quality. This information is then used to reduce local pollution levels by reducing traffic, damping down building sites or even reducing output from factories.

#### TECHNOLOGY ENABLERS

Source: GSMA AP, EY, GD, PM May 2018

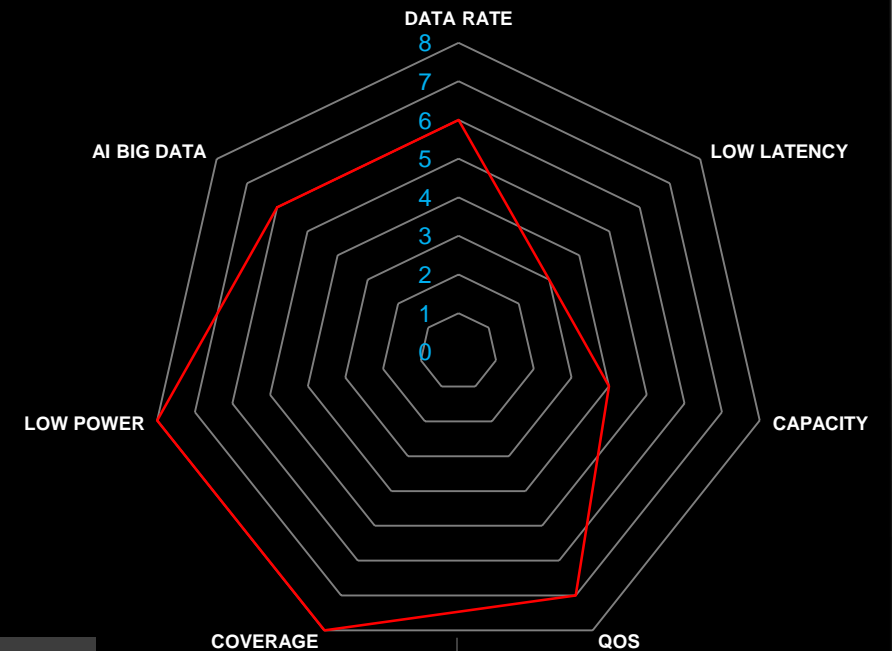

## SMART AGRICULTURE

### Enhanced food production & efficient distribution

Enhanced food production & efficient food distribution. Mobile IoT enables increased crop yields and crop quality through monitoring of soil conditions, improved use of pesticides and fertilisers and weather conditions. Connected vehicles increase efficiency of crop distribution through optimal routing and monitoring of temperature control of food in transit.

The better use of mobile refrigeration leads to crops being delivered in better condition with longer market and shop lives.

#### TECHNOLOGY ENABLERS

Source: GSMA AP, EY, GD, PM May 2018

# Intelligent Connectivity Examples

## Smart city air quality improvement :

- ▶ Widely deployed air quality sensors inc. future portable sensors, cost effectively networked by 5G / Mobile IoT
- ▶ Operators integrate mobile network analytics & other data to build better air quality models to forecast areas of high pollution
- ▶ Remedial action can be taken to reduce pollution in advance
- ▶ Machine learning / AI allows improved forecasting and deeper understanding of influencing factors

## Air Quality forecast

## Anti-pollution

## Industrial automation and efficiency :

- ▶ Connected robots provide information for enhanced remote management & collaboration
- ▶ Machine learning / AI management platforms enable process improvement and better coordination to maximise production performance
- ▶ Mobile connected industrial robots are more efficient as they can be utilized for multiple tasks in multiple locations

## Collaborative industrial robotics

# Go-to Market Campaign Activities

- **Intelligent Connectivity Demonstrations at MWCS, MWCA and MWC - Ongoing**
- **Intelligent Connectivity Report**
  - Illustrate the benefits from 5G, AI and the IoT from customer perspective by exploring 10 potential use cases
  - Emphasise the industry is rolling the technology for the greater good by describing how the customer experiences will be improved as the technology is rolled out and matures
  - Interviewing operators and industry analysts for views
  - Launch Time: MWCA18 – available in English & Spanish – TBC
- **Intelligent Connectivity Microsite**
  - Introduce Intelligent Connectivity and provide references to 5G (GSMA Future Networks), AI & IoT (GSMA IoT)
  - Provide key use cases and a better understanding of the market perspective including development of AI, expected market timing
  - Launch Time: MWCA18
- **Intelligent World Video**
  - Launch Time: MWCA18
- **Infographic**
- **PR**
  - Deliver messages/presentations, use cases and activities including press releases and media briefings at MWCS, MWCA and MWC - TBC

# Activity Updates

Hannover Messe

“Mobile IoT in the 5G Future” Webinar & IoT Webinar Series

MWC Shanghai 18

MWC Americas 18

IoT Solutions World Congress

CES 19

Mobile IoT Summit at MWC19

# Mobile IoT = **TRUSTED IoT FOR INDUSTRY**

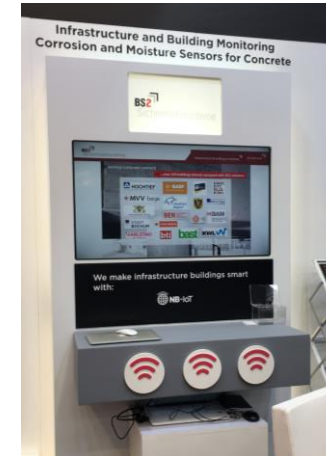

**Visit us at Hannover Messe:**  
**Hall 6, B35 | 23 - 27 April 2018**

- Sponsored by **Huawei**
- Key objective: promote Mobile IoT licensed LPWA to industrial sector
- Collected more than **900** leads, with close to **11,000** visitors to the GSMA Stand
- GSMA Exhibition Stand
  - Animal Farm: demonstrate the wide usage of Mobile IoT tracker in animals
  - 4 partner demos: BS2, Horus/Vodafone, Huawei/Shiip/Telia, Intellinium/Sierra Wireless
- IoT Security Presentation: “How to Prove you are Cyber-Secure in the Age of the IoT?”
- Mobile IoT for Industry Networking Reception
  - Aimed to gather industry experts and attendees who were interested in applying Mobile IoT into their products
- “Designing Efficient and Reliable NB-IoT Solutions” Seminar – Sponsored by Deutsche Telekom
  - Demonstrated various technical aspects on NB-IoT: prototyping approach, chipset/module certification programme, UX & battery life optimisation, security aspects and use cases
  - About 100 attendees attended

NB-IoT Seminar followed by Networking Reception

Smart Infrastructure BS2

Smart Machine Monitoring Horus/Vodafone

IoT Security Session: "How to Prove you are Cyber-Secure in the Age of the IoT?"

Smart Industry Worker Intellinium/Sierra Wireless

Smart Agriculture/Connected Cow Huawei/Shiip/Telia

# IoT/Intelligent Connectivity at MWCS18

<https://www.gsma.com/iot/event/iot-at-mwcs18/>

遇见 Discover a  
Better Future  
美好未来

**#MWCS18**

Global Partner 全球合作伙伴

- Tue, 28 Jul in Auditorium A, Hall N5
- Morning Session:
  - Keynotes: AT&T ERICSSON Ayla Networks SUNSEA AIOT
  - Presentations on IoT & 5G: Qualcomm
  - IoT Security Panel: HUAWEI Internet Society IEEE NOKIA pwc
- Afternoon Session: The 7<sup>th</sup> Mobile IoT Summit
  - 3 panel discussions (operator, big data & ecosystem) & 3 customer presentations

- Well attended by **406** delegates (vs **273** in MWCS17) – 300 complimentary upgrade vouchers sold out
- Total **31 expert speakers** across multiple aspects and discussions on IoT

Mobile World Congress Shanghai | 28 June 2018  
世界移动大会-上海 | 2018年6月28日

- Hall N5
- **20,000 visitors** to the Innovation City
- Forefront showcase for the most innovative demos of Intelligent Connectivity (5G/AI/IoT)
- **6 operator demos:**

• Integrated Industrial IoT Solution to Enhance Manufacturing Efficiency

• Intelligent Community Management for Housing & Living spaces

• AI Visual Recognition/Surveillance System for Flood Prevention

• 5G Network Capability Exposure on Rokid's Alien & Pebble

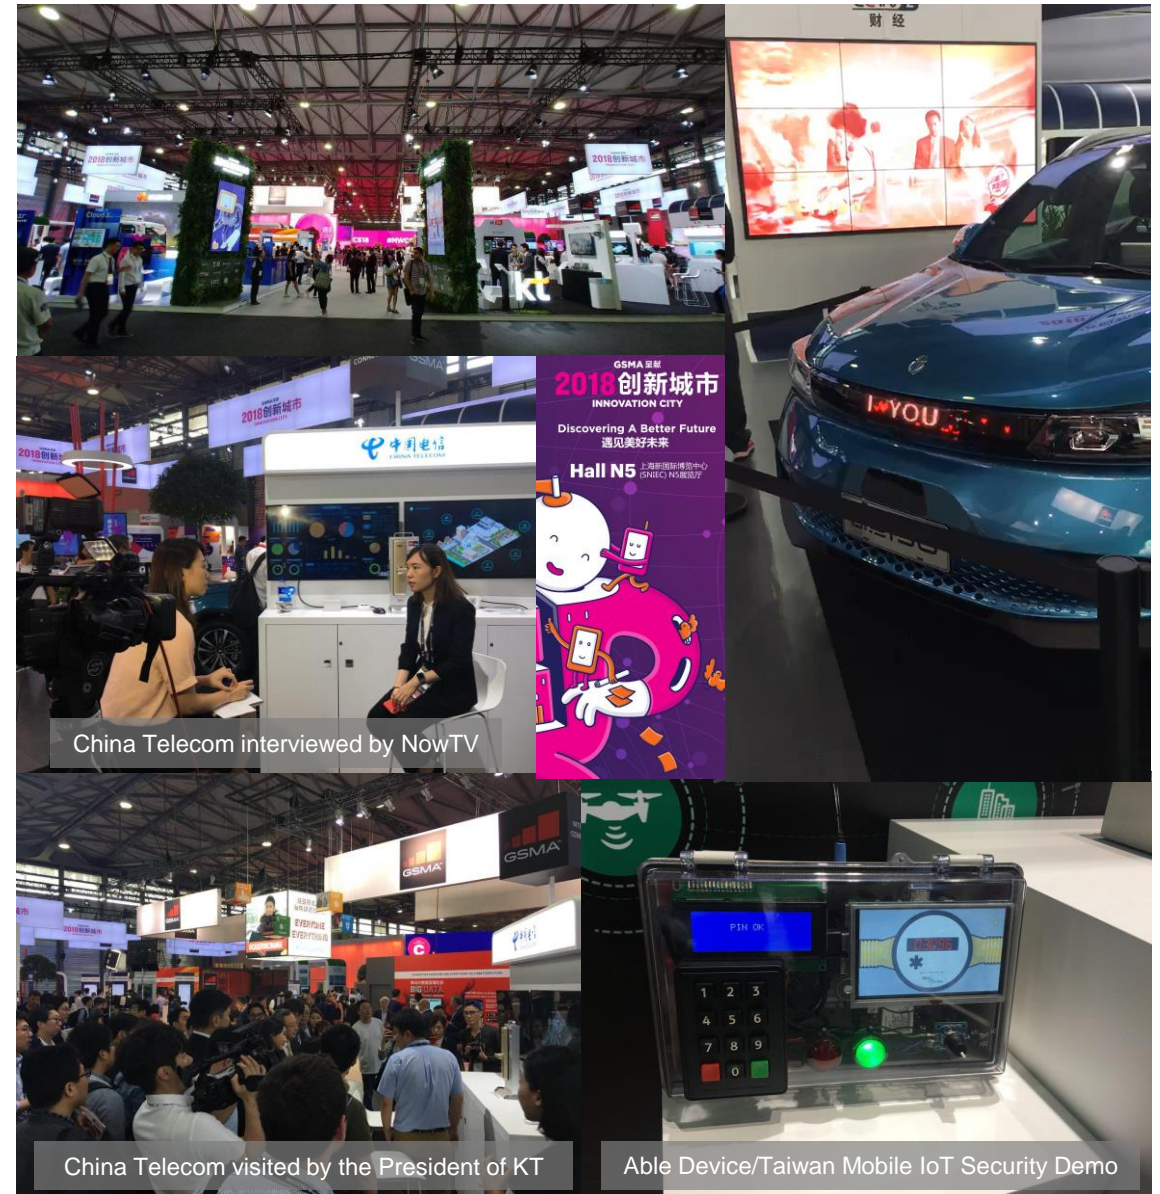

• Air Quality Improvement using IoT Big Data Analytics

• SIMbae: Standards Based IoT Security using the SIM

- Multiple media coverage: Hong Kong Economic Times, NowTV, Business Next, DIGITIMES, etc.

China Telecom interviewed by NowTV

China Telecom visited by the President of KT

Able Device/Taiwan Mobile IoT Security Demo

- Hall W5
- Mobile IoT showcase by some of the most innovative companies in China
- **12 demos in 6 key industry verticals:**

- Fire Safety 中国移动 China Mobile ALPHA Networks 万象智能 Wanxiang Intelligence
- Industrial IoT China unicom 中国联通 POLYSENSE 万象集团 WANXIANG GROUP
- Logistics goSafe SIERRA WIRELESS 机智云 Gizwits

# HOW GREATER CHINA IS SET TO LEAD THE GLOBAL INDUSTRIAL IOT MARKET

大中华区引领全球  
工业物联网发展与创新

# IoT Report: How Greater China Is Set To Lead The Global Industrial IoT Market

- Objectives:
  - Illustrate how Greater China is developing the Industrial IoT market
  - Demonstrate the positive impact of accelerated adoption of Mobile IoT in Greater China and how Mobile IoT is accelerating the growth of Industrial IoT
  - Be the role model for the world how Greater China will intelligently connect Mobile IoT LPWA technologies, 5G, AI, automation in the industrial sector
- Highlights:
  - Up to June 2018, there have been 53 Mobile IoT live networks launched globally – LTE-M & NB-IoT, provided by 29 mobile operators – nationwide in Greater China (this has been updated on slide 52)
  - GSMAi forecasts that there will be **4.1 billion Industrial IoT connections in Greater China by 2025** – equivalent to a third of the world connections
  - Gartner predicts, **by 2020, total global expenditure on IoT is set to top US\$3 trillion**, with cross-industry business applications accounting for US\$570 billion and vertical industry applications US\$910 billion
  - IDC forecasts that the overall market for IoT kit of various forms in China will rise from US\$193 billion in 2017 to US\$361 billion in 2020
  - China's Ministry of Industry and Information Technology says that Industrial IoT market in China is growing by **about 25% per annum** and is set to reach almost **300 billion Yuan (US\$47 billion) in 2018**
  - Deloitte conducted a survey of Chinese manufacturers and identified 3 biggest challenges for the Industrial IoT: (1) interoperability standards (2) data ownership & security (3) relevant technical personnel

# IoT Report: How Greater China Is Set To Lead The Global Industrial IoT Market – Cont.

- Focused Interviews from 6 Operators with 5 case studies in key sectors including utilities, logistics, smart agriculture and smart city:
  - Asia Pacific Telecom Group
  - China Mobile
  - China Telecom
  - China Unicom
  - Far EasTone
  - Taiwan Mobile

- Mobile IoT technologies – LTE-M & NB-IoT, will play a key role in the 5G networks of the future and, in particular, the development of ‘Massive IoT’. **Massive IoT** is one of three principle 5G use cases, alongside **Critical Communications** and **Enhanced Broadband**, which will enable smart cities, industrial automation and other applications involving large numbers of connected devices.
- Download the reports – available in both English and Simplified Chinese: <https://www.gsma.com/iot/greater-china-industrial-iot-report/>

Date	Wednesday, 12-14 September 2018
Venue	Los Angeles Convention Center - 1201 South Figueroa Street Los Angeles, California 90015
Activities	IoT Conference GSMA Innovation City 4FYN Startup Pavilion Mobile IoT Working Group Meeting (LTE-M Task Force + NB-IoT Forum)
Details	<a href="https://www.gsma.com/iot/event/mobile-world-congress-americas-2018/">https://www.gsma.com/iot/event/mobile-world-congress-americas-2018/</a>

- Confirmed the **Connected Bee Hive** – live LTE-M demonstration
- Demo criteria:
  - Real customer cases/products already been deployed or will be deployed shortly into the market
  - Demonstration on **live** networks preferred: LTE-M, NB-IoT or 5G
  - Cutting-edge/latest innovations
  - Use case considerations (not limited to these):
    1. **Gigabit Mobile Connectivity**  
e.g. Digital Assistant, Social Videostyling, High-Speed Video Streaming, etc.
    2. **Entertainment Everywhere**  
e.g. Interactive Gaming, Omnipresent Advertising, etc.
    3. **Smart & More Efficient Transportation**  
e.g. Autonomous Vehicles, Fast Drone Delivery, etc.
    4. **Smart Industry / Affordable Products**  
e.g. Networked 3D printing, Automated Industrial Robotics, etc.
    5. **Enhanced Public Services**  
e.g. Connected Healthcare, Robotics, Critical Communications, etc.
    6. **Sustainable World**  
e.g. Pollution Management, Smart Agriculture
- Please submit your proposal to Eric ([eyu@gsma.com](mailto:eyu@gsma.com)) as soon as possible

# IOT

SOLUTIONS  
WORLD CONGRESS

**BARCELONA**

16-18 OCTOBER 2018

THE LEADING  
IOT INDUSTRY  
EVENT

# GSMA IoT at IoT Solutions World Congress

- Lab event with Telefonica – Monday, 15 October 2018
- Co-located workshop/operator roundtable led by GSMA Strategic Engagement Team
- Demo Stand
  - Mobile IoT Modules & Dev Kits Showcase with 3 to 4 Mobile IoT Industrial demos
  - Soft launch of the IoT Security “What-if?” campaign with Security Robot demo
  - Networking receptions – Tue & Wed 16 & 17 October 2018 – TBC
- Speaking opportunities: Eric is discussing with Fira
- We welcome demo proposals. Criteria:
  - Using Mobile IoT technologies: LTE-M or NB-IoT or both
  - Demo on live network: not necessary
  - Commercial readiness: not necessary
- Please email Eric ([eyu@gsma.com](mailto:eyu@gsma.com)) and show your interest. He will share more details by end of July

**Planned  
Activity  
Update**

**8 – 11 January 2019  
Las Vegas Convention Centre**

# Planned IoT Activities @ CES19

Activity	Date	Location
Mobile IoT Breakfast Briefing	Wed, 9 Jan – AM	Luxor
Mobile IoT Innovators Workshop	Wed, 9 Jan – PM	Luxor
IoT Networking Event	Wed, 9 Jan – Late PM	Luxor
Mobile IoT Solutions Demonstrations	Tue 8 Jan – Fri 11 Jan	CES Exhibition Halls - TBC

We are keen to understand your plan and any proposals for CES. Please share any information with Andrew ([aparker@gsma.com](mailto:aparker@gsma.com)) or Eric ([eyu@gsma.com](mailto:eyu@gsma.com)). Eric will also reach out to you individually for details.

# 8<sup>th</sup> MOBILE IoT SUMMIT

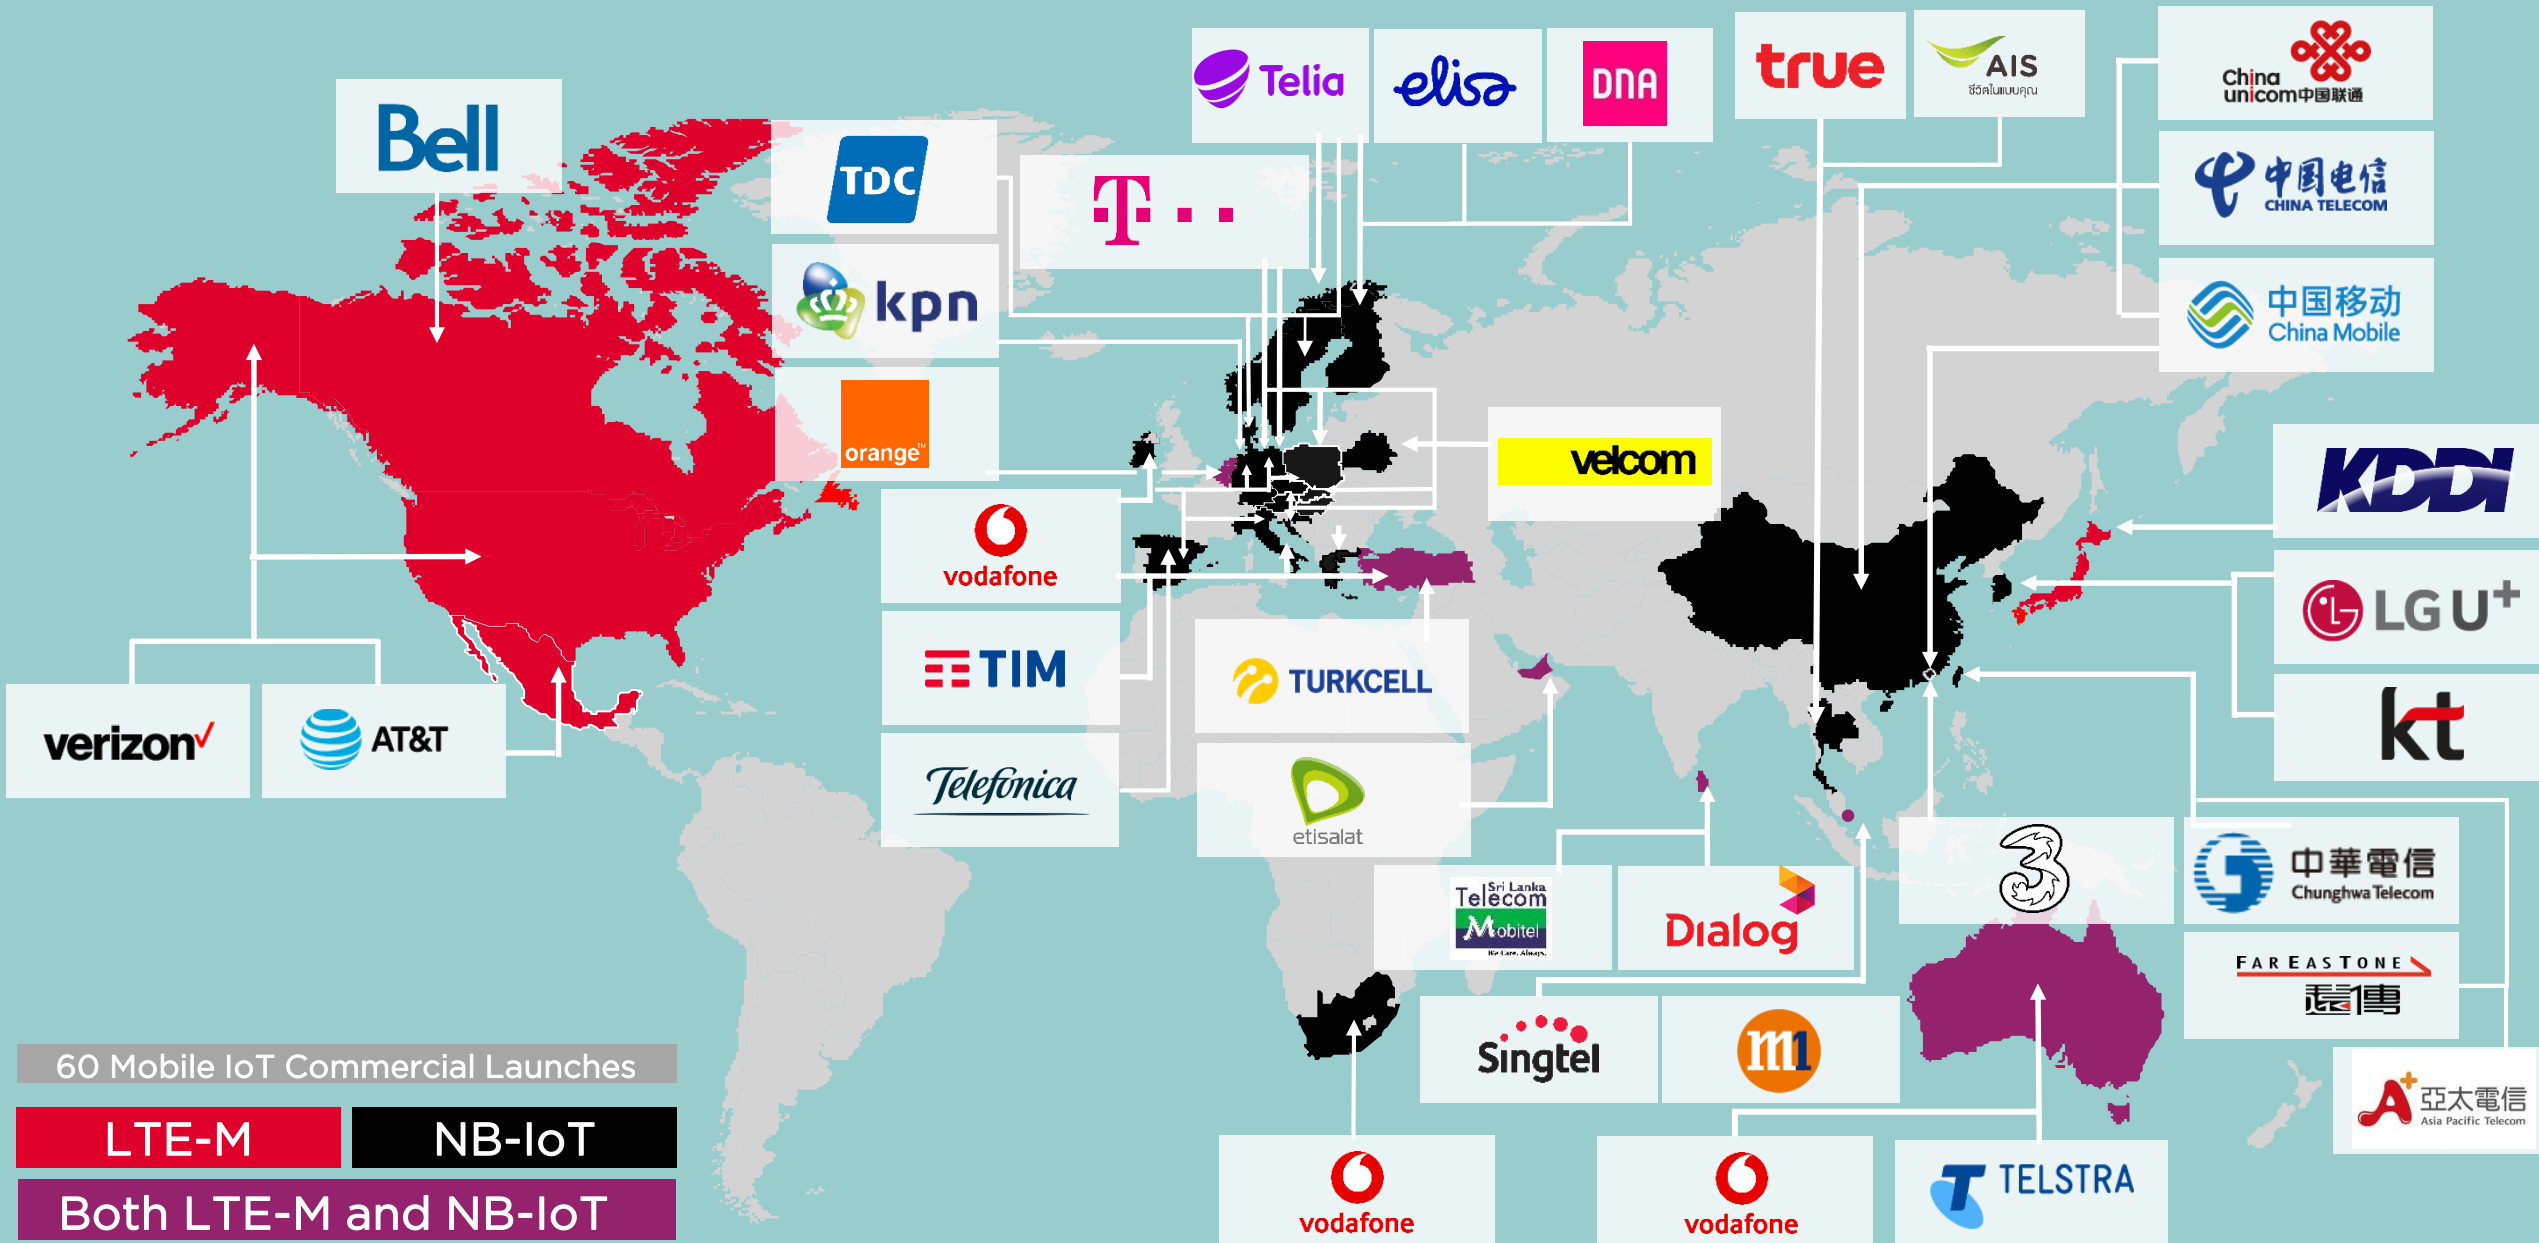

- Date: Sunday, 24 February 2019 (MWC19 Day 0)
- Venue: [Hotel NH Collection Barcelona Tower](#)
- Similar format as last year: half-day conference in the 500-seat auditorium with 6 to 8 Mobile IoT demonstrations
- 6<sup>th</sup> Mobile IoT Summit at MWC18: **467** delegates attended; **650** registrations
- Platinum Sponsor x 1, Silver Sponsor x 2 and Networking Sponsor x 2 are open

# Mobile IoT Network Launch Update

# Mobile IoT Global Network Coverage

- New operator interview: [Dialog Axiata](#)
