The Future of IoT Convention

Session 1

Opening Keynote – The Future of IoT, 5G and Big Data

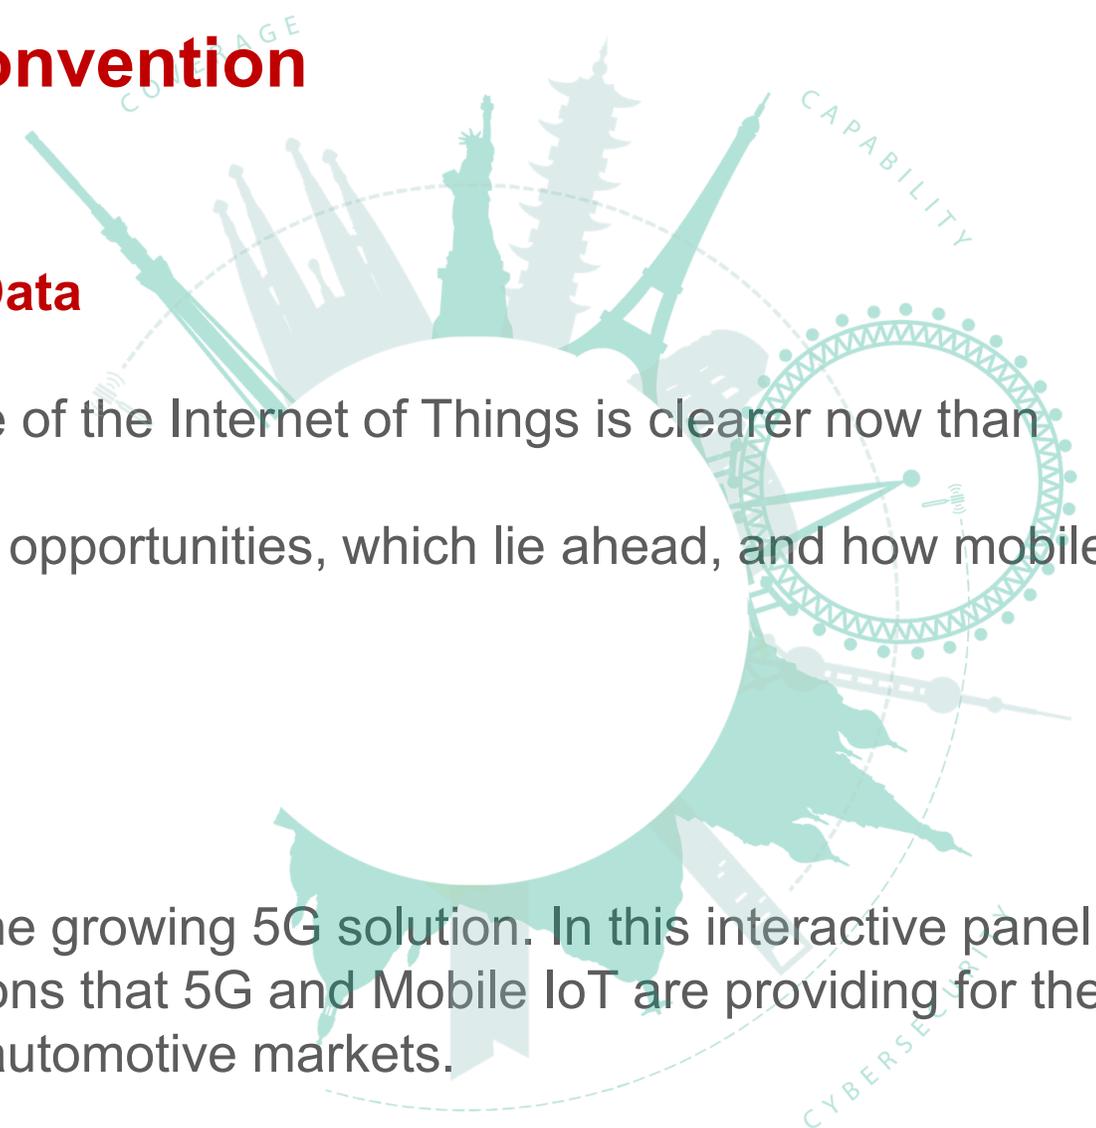

The future of the IoT is an exciting place, and the value of the Internet of Things is clearer now than ever before.

This opening keynote provides an overview on the key opportunities, which lie ahead, and how mobile operators are addressing these.

Session 2

Mobile IoT in the 5G World

Available Mobile IoT Networks are an integral part of the growing 5G solution. In this interactive panel discussion, with audience Q&A, hear about new solutions that 5G and Mobile IoT are providing for the range of IoT services in the industrial, healthcare and automotive markets.

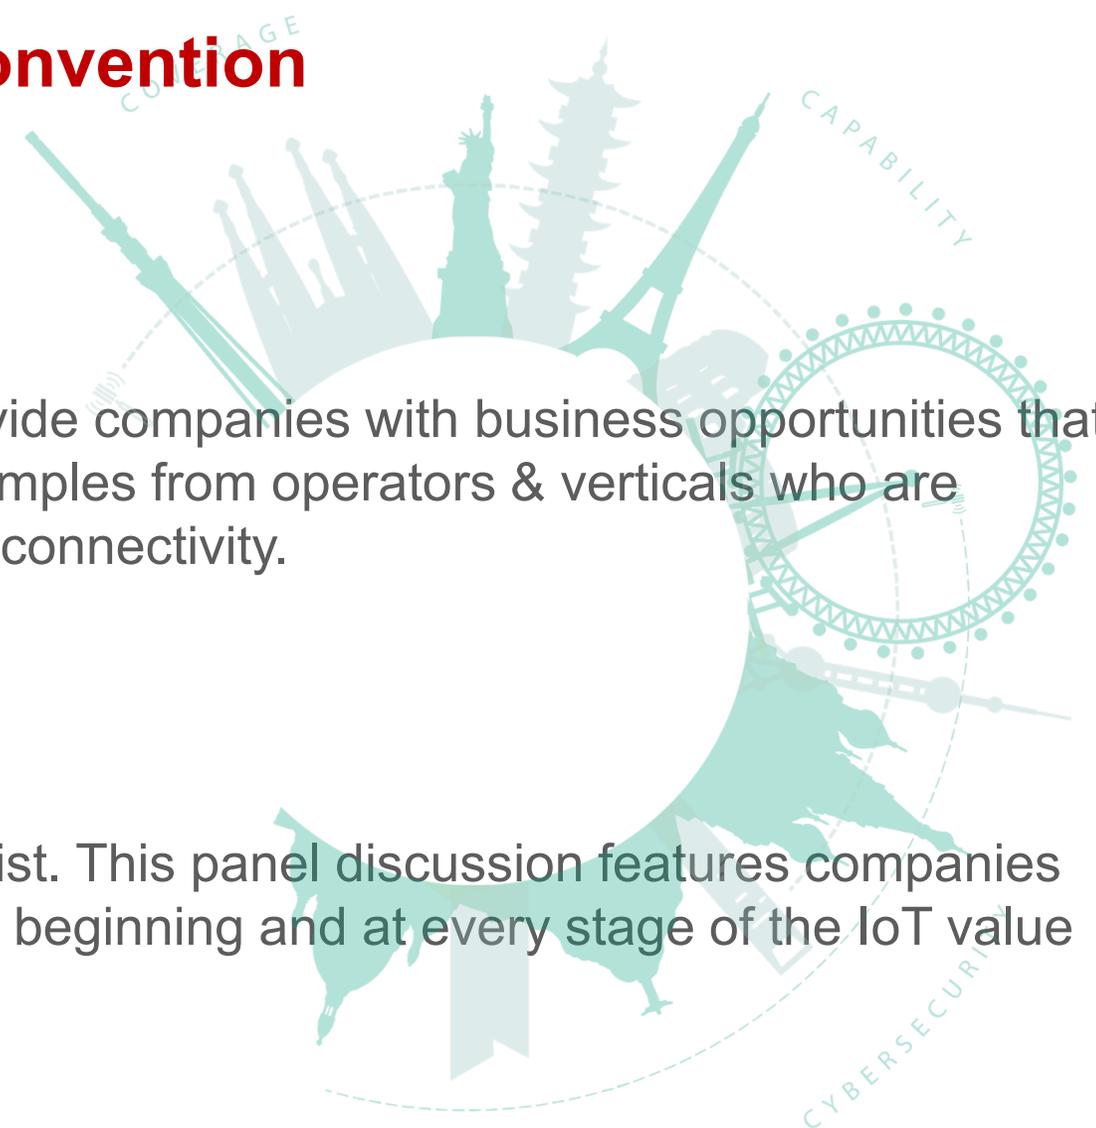

The Future of IoT Convention

Session 3 Beyond Connectivity

IoT Big Data, Analytics and Machine Learning can provide companies with business opportunities that stretch far beyond pure connectivity. Hear real life examples from operators & verticals who are building new strategies and pushing the boundaries of connectivity.

Session 4 Security to Scale the Long term Future of the IoT

Without security, the Internet of Things will cease to exist. This panel discussion features companies who are taking the initiative to embed security from the beginning and at every stage of the IoT value chain.

See you at the 10th Mobile IoT Summit.....

..... at Mobile World Congress Barcelona!

Sunday 23rd February 2020
12:00 - 18:00
HYATT REGENCY BARCELONA FIRA
(Formerly known as The Hesperia Tower Hotel)
