Scaling IoT: Through the device maker's lens

Vincent Korstanje
CEO, Kigen

5G IoT Summit
28 Feb 2024

The new IoT growth story

Mass scale in
new markets

Connected
manufacturing

Winning with
AI/ML

Security unlocks scale for impact

SMART METERING

Challenge: moving faster

Equipping every solar panel and inverter with an eSIM to optimize energy output

> Simplify

Unlocking wider access to secure manufacturing

SMART MANUFACTURING

A woman with short brown hair, wearing a light blue button-down shirt, is looking down at a tablet computer she is holding. She is standing in a factory or industrial setting, with a robotic arm visible in the foreground and various pieces of machinery in the background. The lighting is bright and even.

Challenge: Limited battery life

Secure provisioning of every metering device with the right connectivity in the factory

> Simplify

Secure Provisioning across offline, fully digital and Just-in-time setups

SECURE AI ECOSYSTEM

Challenge: Winning with AI/ML

AI Input attacks and data poisoning will become the biggest brand challenges

> Act today

Chip-to-cloud security is not a feature for AI and ML systems, it is a necessity

SMART CONNECTIVITY

Simplifying the
connectivity journey

> Together
