Acknowledgement / Disclaimer

- Wiliot is one of many contributors to the Ambient IoT features in Release 19
- The standard will be shaped by many powerful entities within 3GPP
- Wiliot contributes experience of the first commercialized ambient IoT offering deployed at scale and work with many of the F500

This is how we run our supply chains today

Messages

Toulouse is finished building Archers.
 Year: 1768 AD
 Archers lost to an attack by the Iranian Destroyer.
 Archers lost to an attack by the Iranian Destroyer.

Overview map

Units

IoT in Infrastructure

From Dedicated Scanners and Readers to Ambient Networking

Snap Shots

Optical Scanner

RFID gate

Continuous

Sensor embedded directly in cardboard at productions

Auto-association at supplier

Smart vehicles track in transit

Seamless read at DC by robotic forklifts

Intra-DC tracking via robots

Passive reads via associate devices

Last Mile tracking via vehicles

● ● ● ● ● ● ● Ambient network

If tagged at item level: full empty detection via domestic vacuum robot

Signals sent to cloud via smart speaker

Box open detection

Delivery Confirmation Door Rings and home automation

Last Mile tracking via vehicles

IoT Pixels Details

SIZE

2.4 × 4.4 cm

COST

5.5c IC

RANGE

10–15+ meters

POWER

Battery Free.

Harvests sub 1 GHz and 2.4 GHz RF

COMMUNICATION

BLE 2.4 GHz

DATA

Identification, Temperature, Humidity

SECURITY

AES-128, end-to-end encryption and authentication

Wiliot – A Leader in Ambient IoT

Our approach to IoT is to make things smart — any location and with negligible infrastructure investment

200+ Employees Globally

Active projects with

2

of the **Fortune 5** Companies

First **Bluetooth Qualified & FCC Certified Battery Free Tag**

+70 million tags in 2023

Over **50** Patents

Offices in:

Australia
Israel
Portugal
Taiwan
USA
UK
Ukraine

Founded in **2017**

Over **\$270m** total funding

 SoftBank

Qualcomm

Ambient IoT Recognition

Real-time Visibility

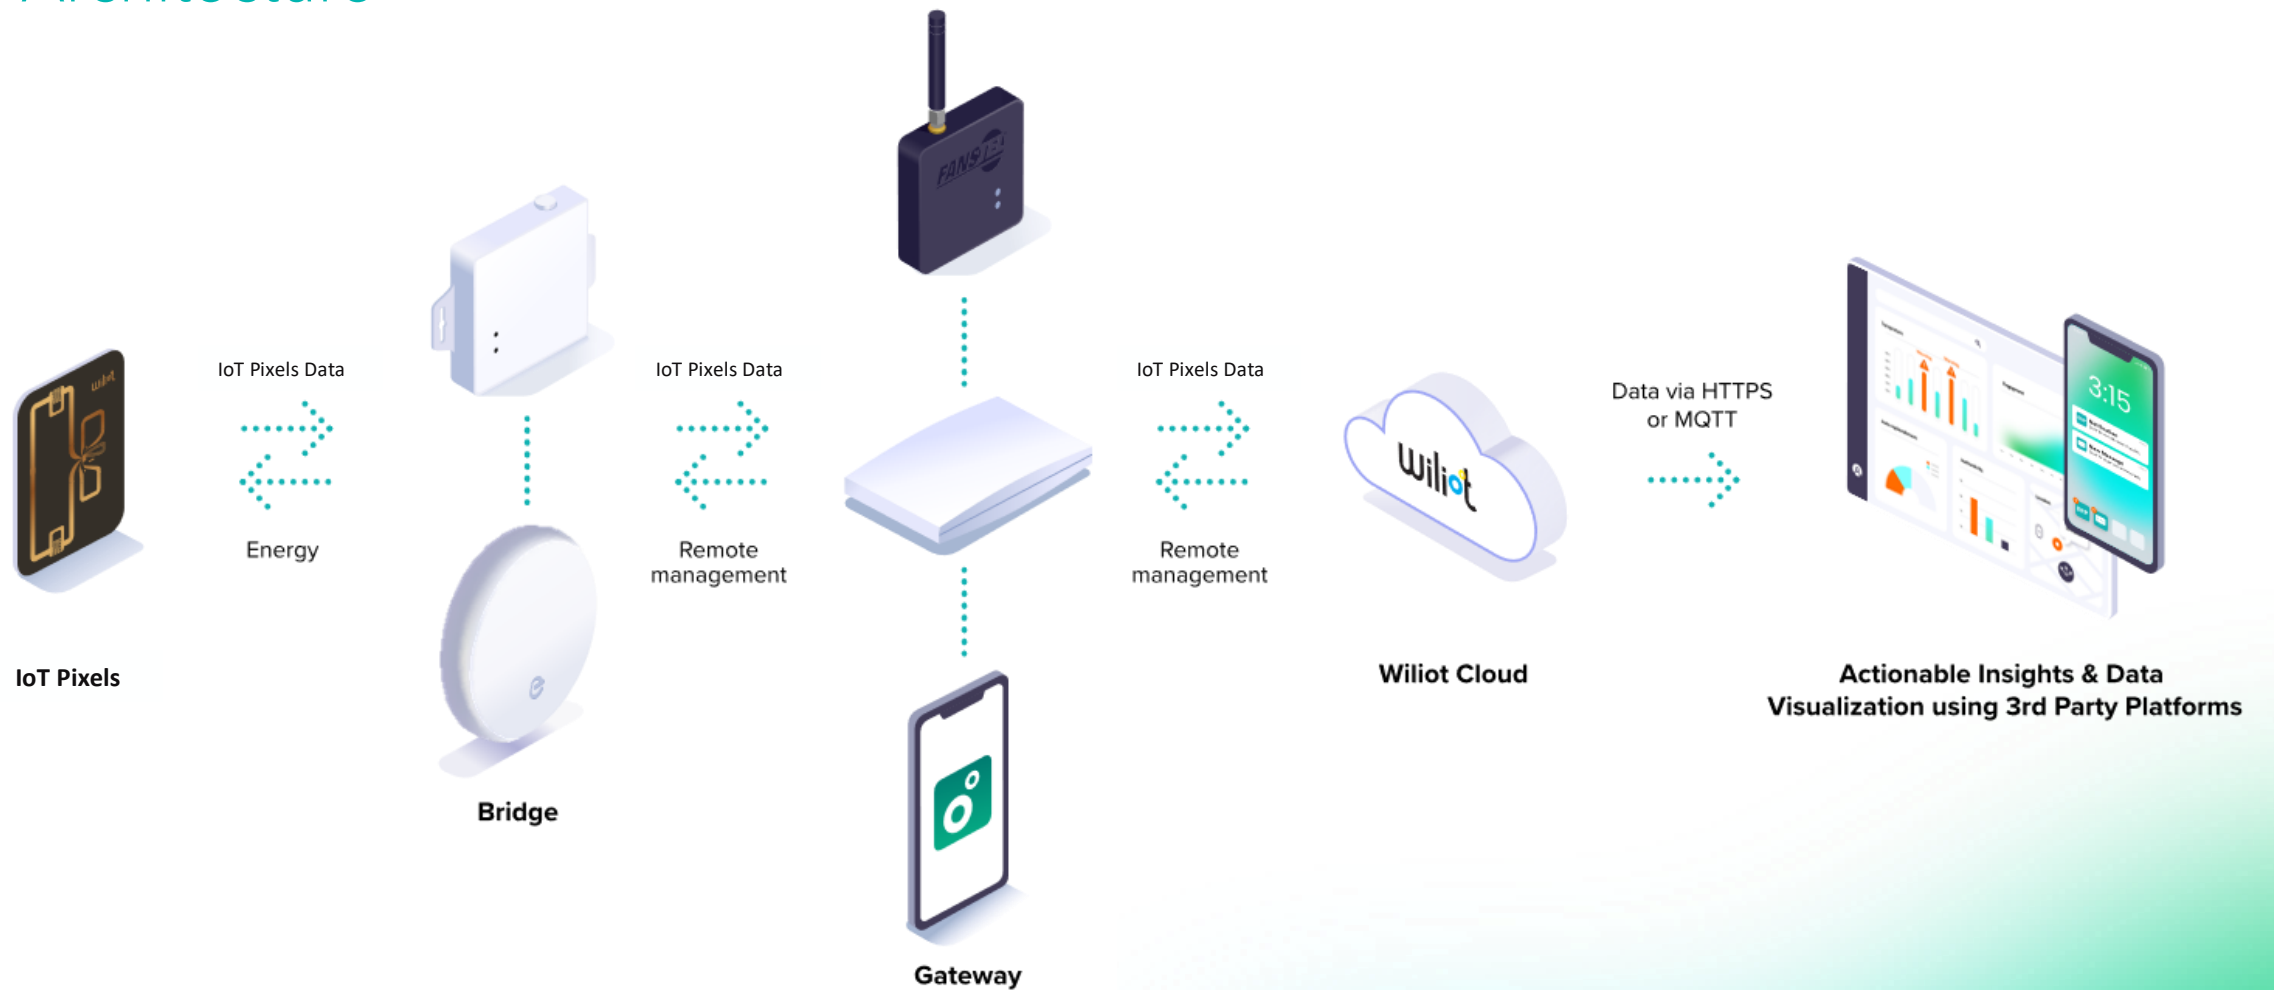

From Mainframes to Stickers

Connectivity and computing commoditized

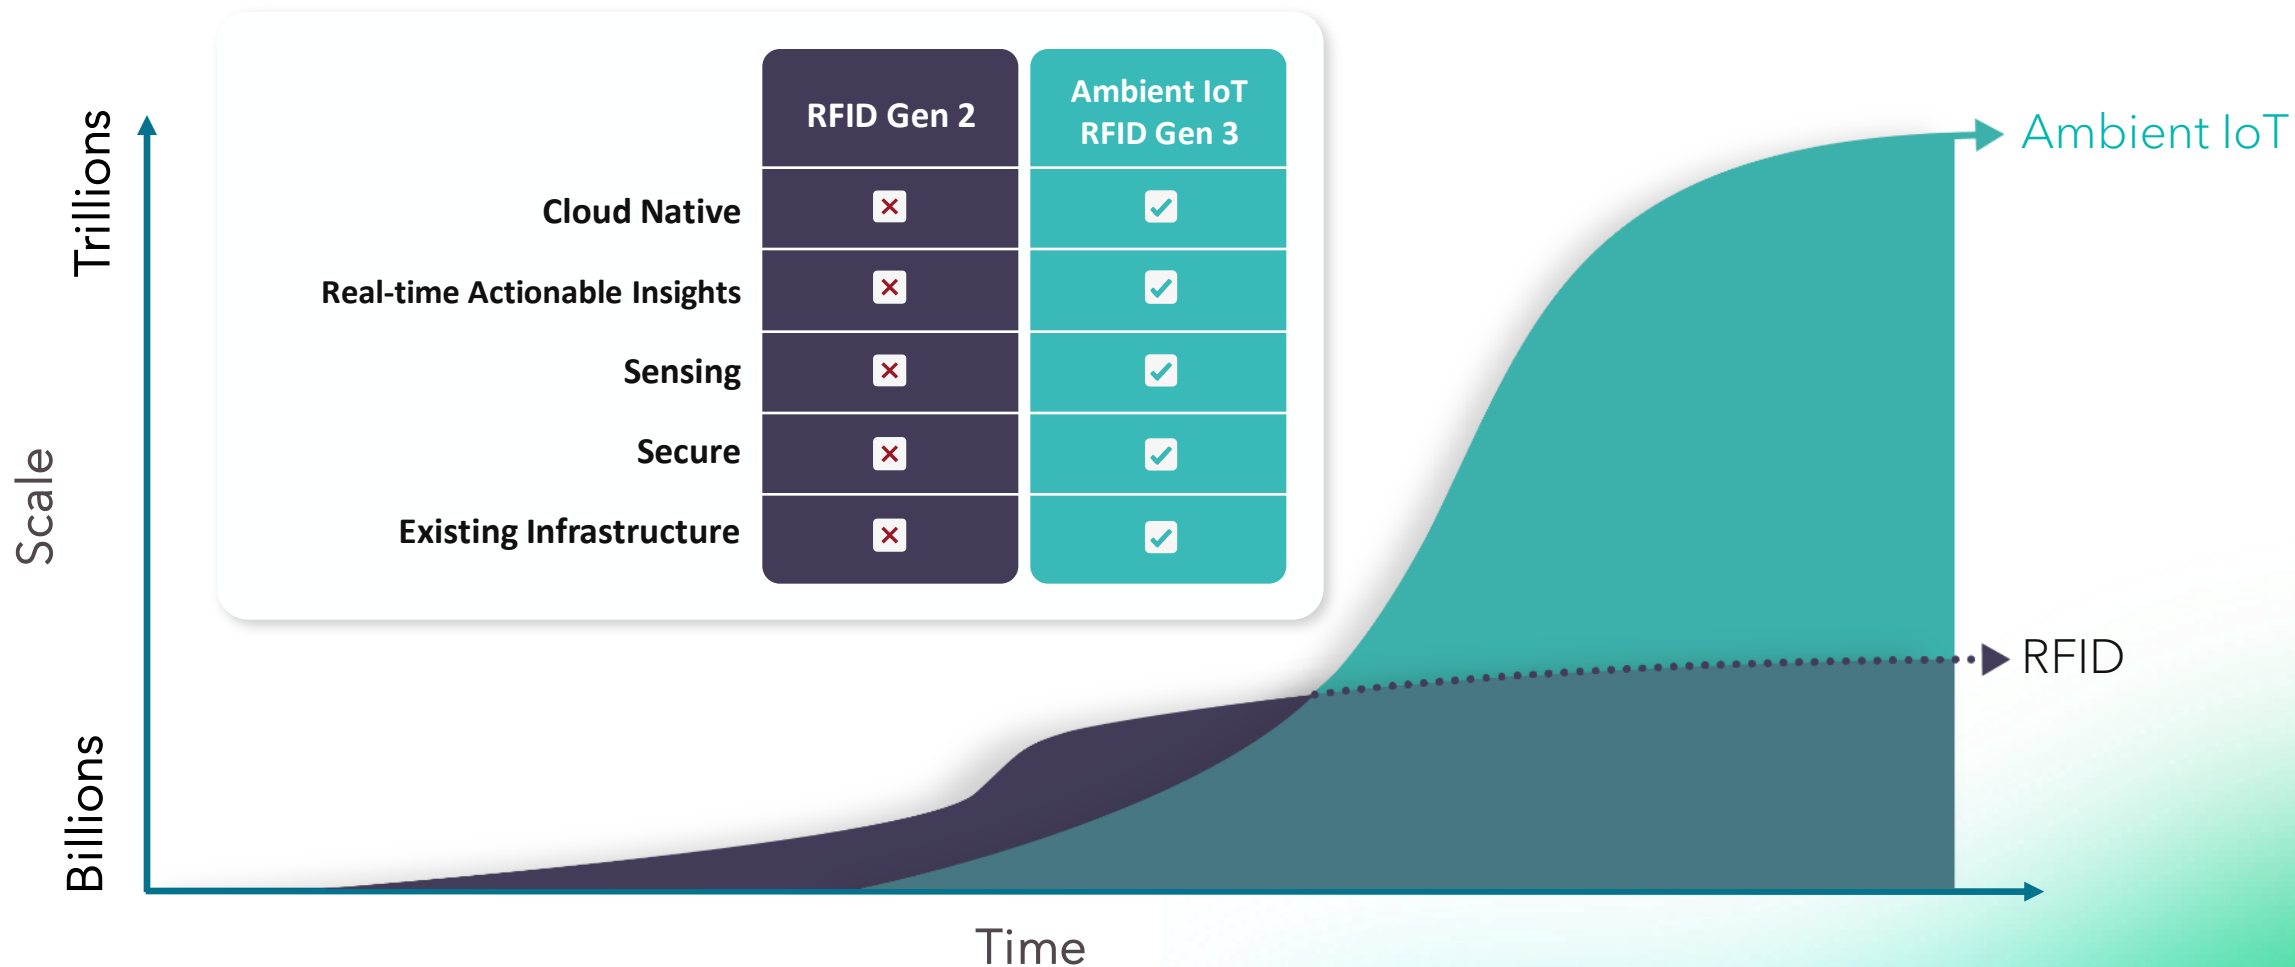

The Wiliot Solution Architecture

Ambient IoT – An Inflection Point

To know where we are going, let's begin with where it started

Ambient IoT

Ambient (Merriam Webster)

ambient adjective

am·bi·ent | \ 'am-bē-ənt

Existing or present on all sides : **ENCOMPASSING**

Ambient IoT

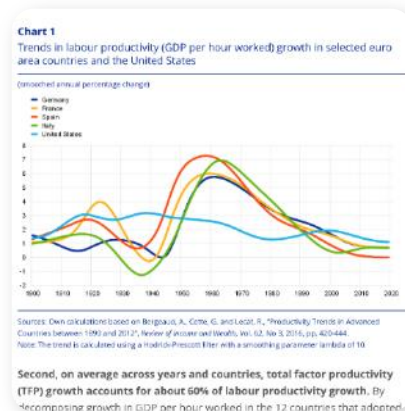

- In food, medicine, clothing, furniture, wallpaper...
- Read by the devices that are everywhere & part of every “thing”
- Communicate continuously without human intervention

Ambient Power

- Battery-free, energy harvesting
- Harvesting energy from radio waves
 - Small, no line of sight required, no maintenance, lowest cost

Ambient IoT addresses our biggest challenges

Productivity

Supply Chain

Climate

Crime

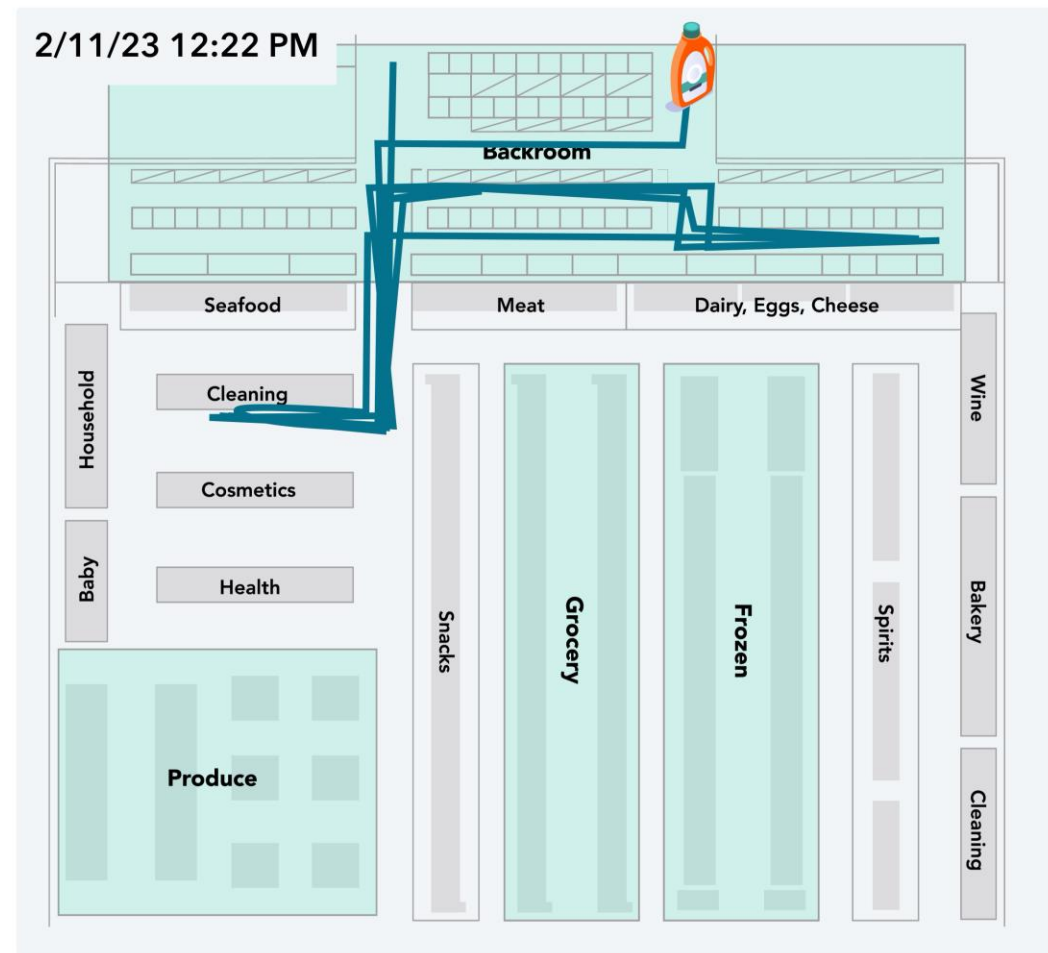

1 - European Central Bank Bulletin 7/2021
 2 - A shelf near you
 3 - San Diego Regional Disaster Fund – San Diego Foundation

Real-time Visibility

The future of retail is real-time inventory in stores

- Merchandising Compliance
- Planogram Compliance
- Out of stock alerts
- Time to replenish
- Employee satisfaction and efficiency

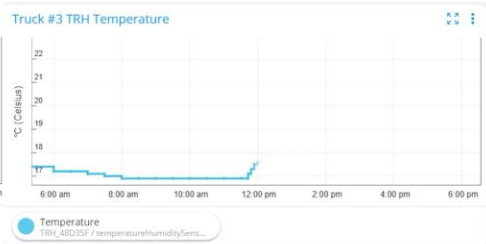

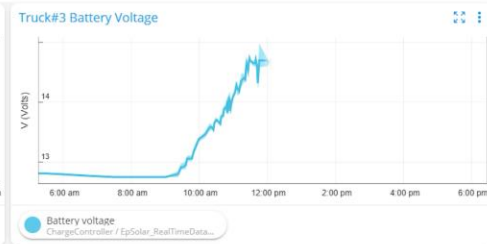

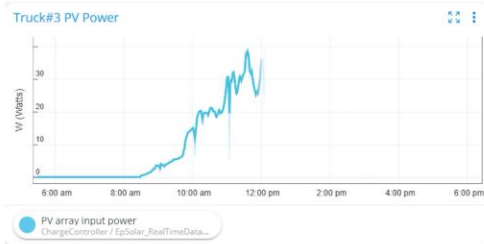

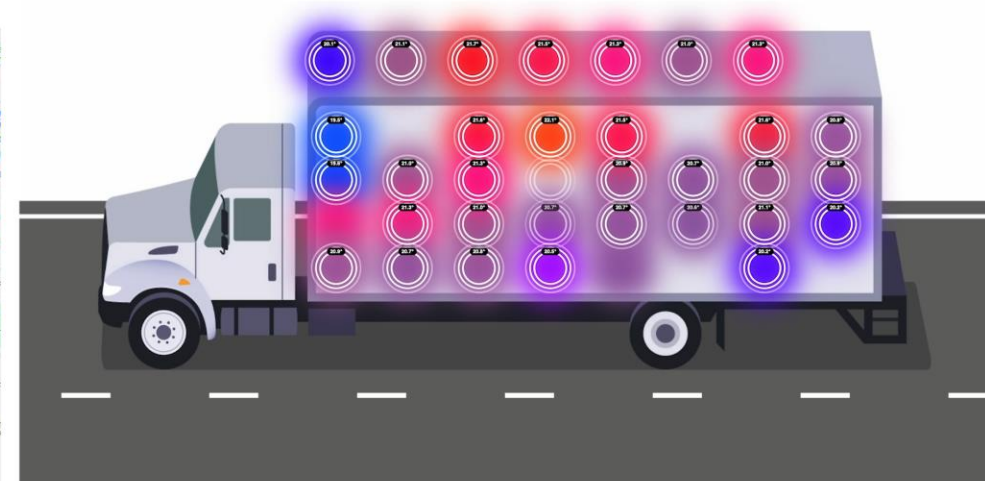

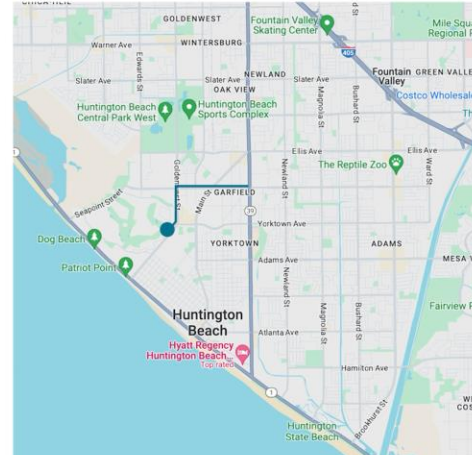

... Improved customer experience

Real-time Item-in-Transit Visibility

Live Demo ●

Living Web a Browser for the Physical World

Hear, Sense, See, Remember

- Browse places and things around you
- No type – No tap – No scan
- The Digital Product Passport for everything visible
- Open sourced
- Web standards-based

MARKET RESEARCH NOTE

The Ambient IoT: The Emergence of a New Class of Bluetooth® IoT Devices

Key Statistics for Ambient IoT Markets

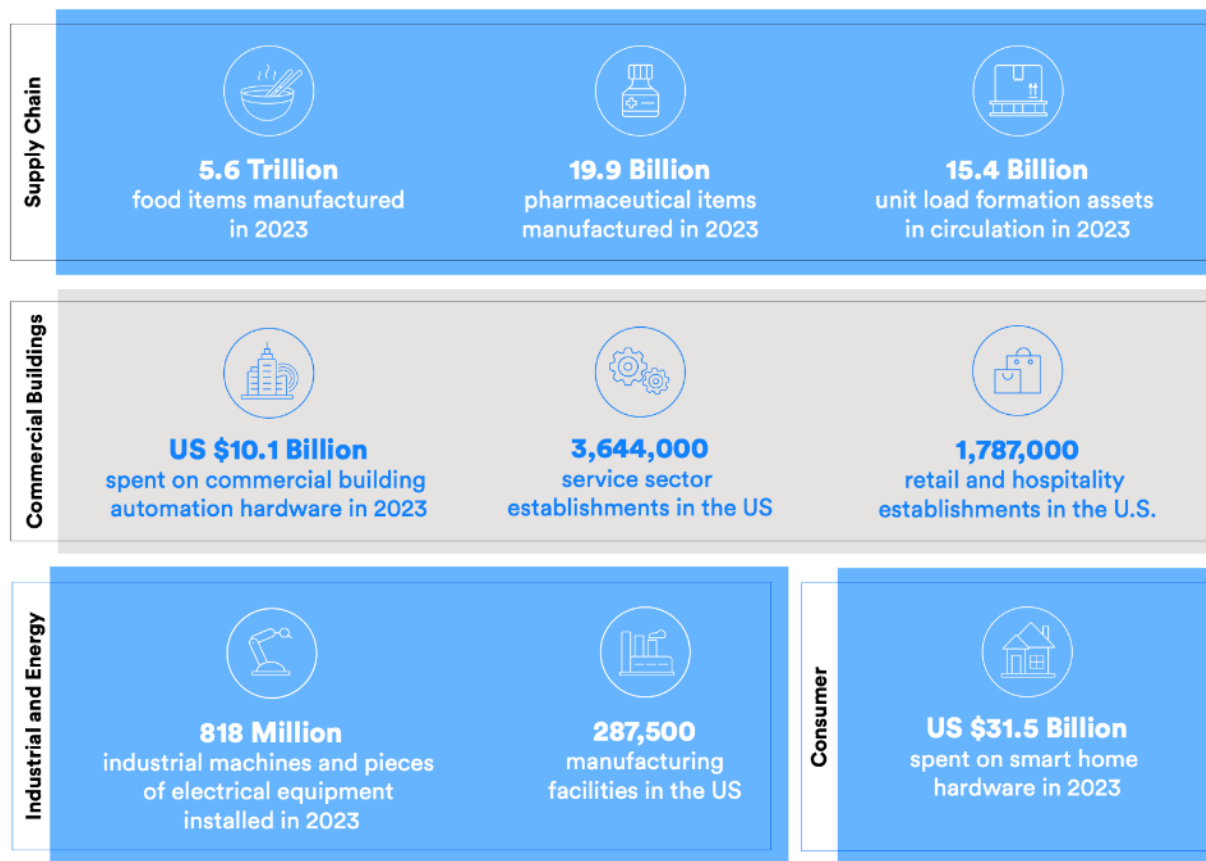

Figure 3: Ambient IoT Opportunities and Key Market Statistics (Source: ABI Research)

3GPP 5G Advanced Release 19

Why? - It's the Network

- QoS and Support
- \$Billion Marketing
- Networking
 - Any brand, any product, any where
 - Without Apple, Amazon or Google

Passive and active approaches likely

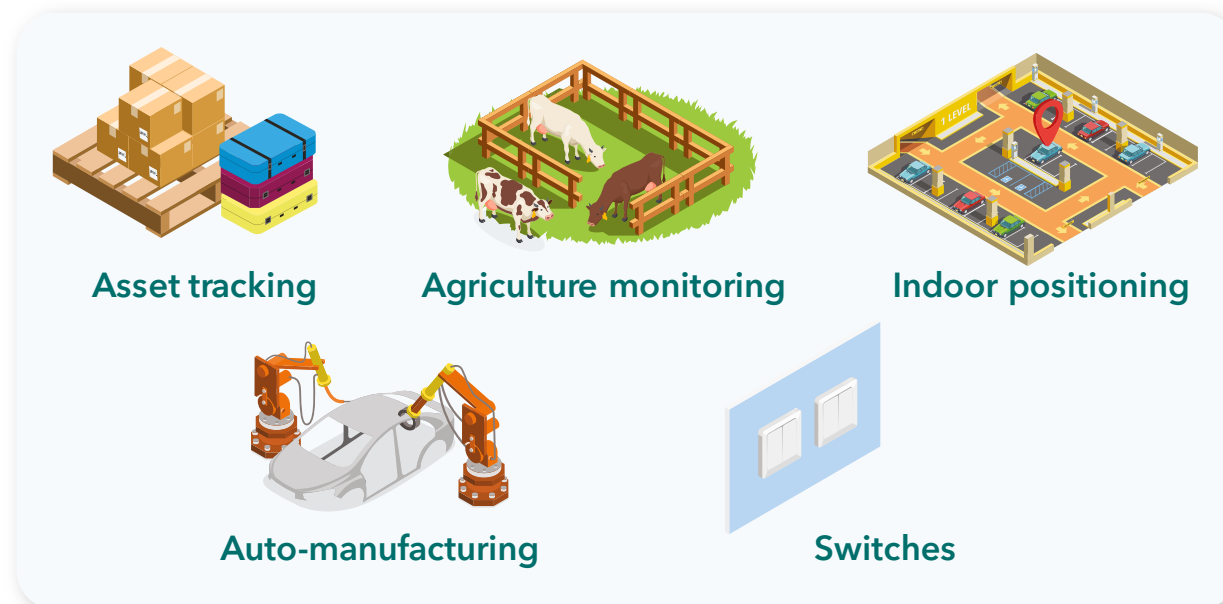

Peter Finch

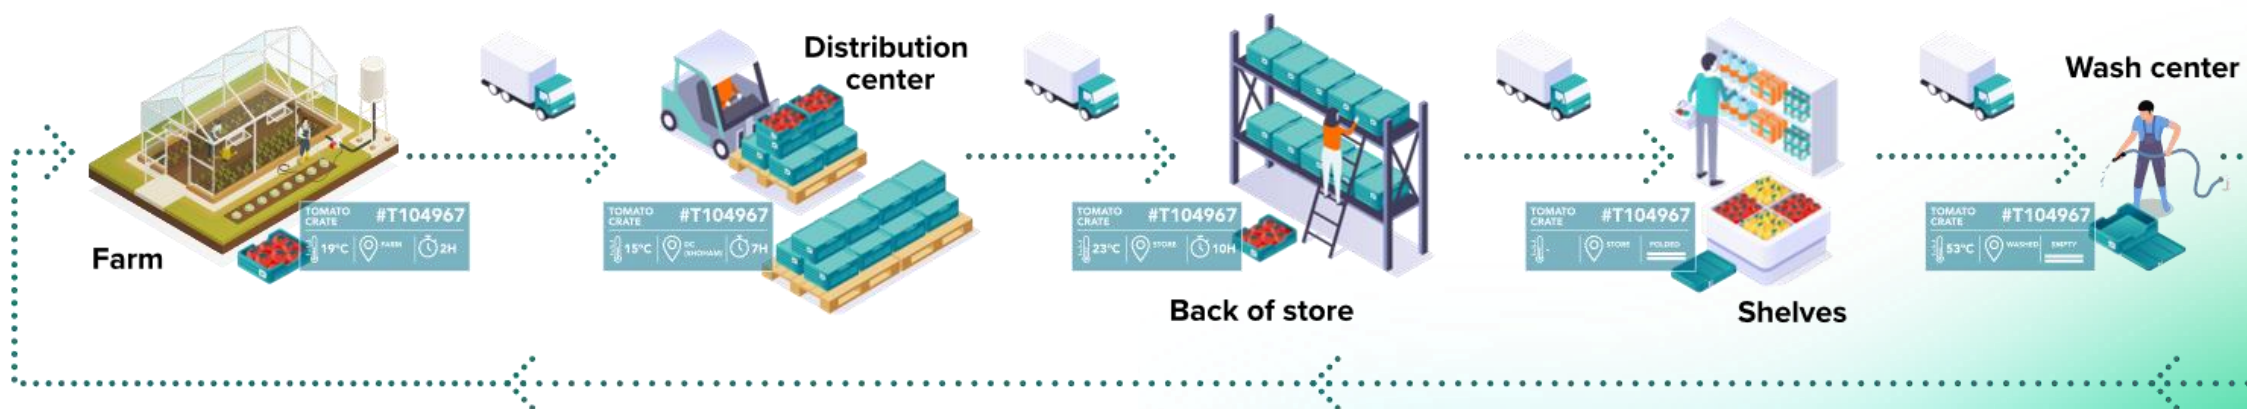

Metro-Gold

3GPP Ambient IoT

- Use cases established
- 3GPP Rel19 to be first release to include the ambient IoT
- Active and Passive Options
- Wiliot has Proven the Active Option

Example Supply Chain Use Case: Fresh Food

Ambient IoT – Standards Direction

	Tag Cost	Reliability	Coverage	Scalability	Security	Ecosystem
3GPP		+++ Operator – thunderstorm	Outdoor	++	+++	+++
IEEE		++ IT dept. – power down	Indoor	++	++	++
Bluetooth		+ stand alone – connection loss	proximity	+	+	+

SA1 requirements (22.840)

RAN-work scoping started

Rel19
(Ambient IoT service)
~2025—2026

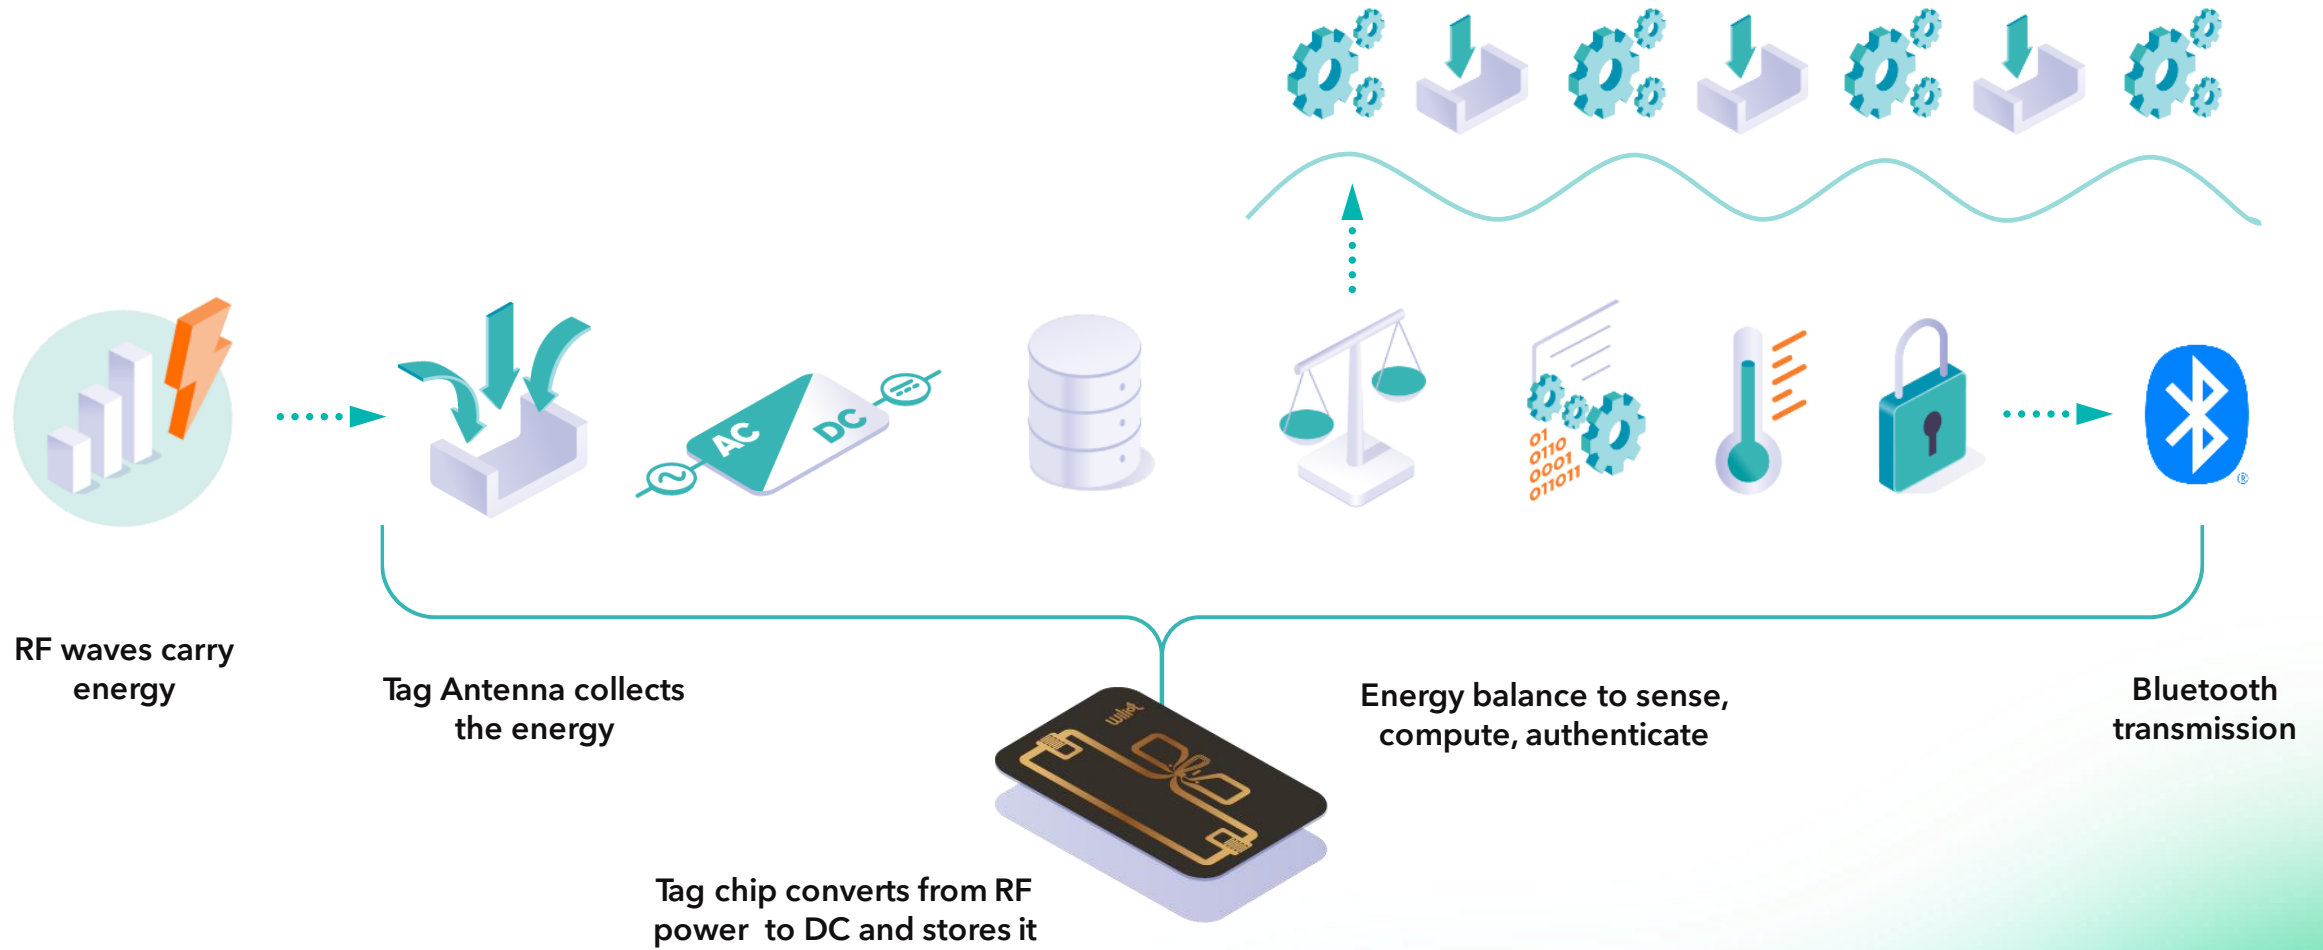

AMP-TIG formed

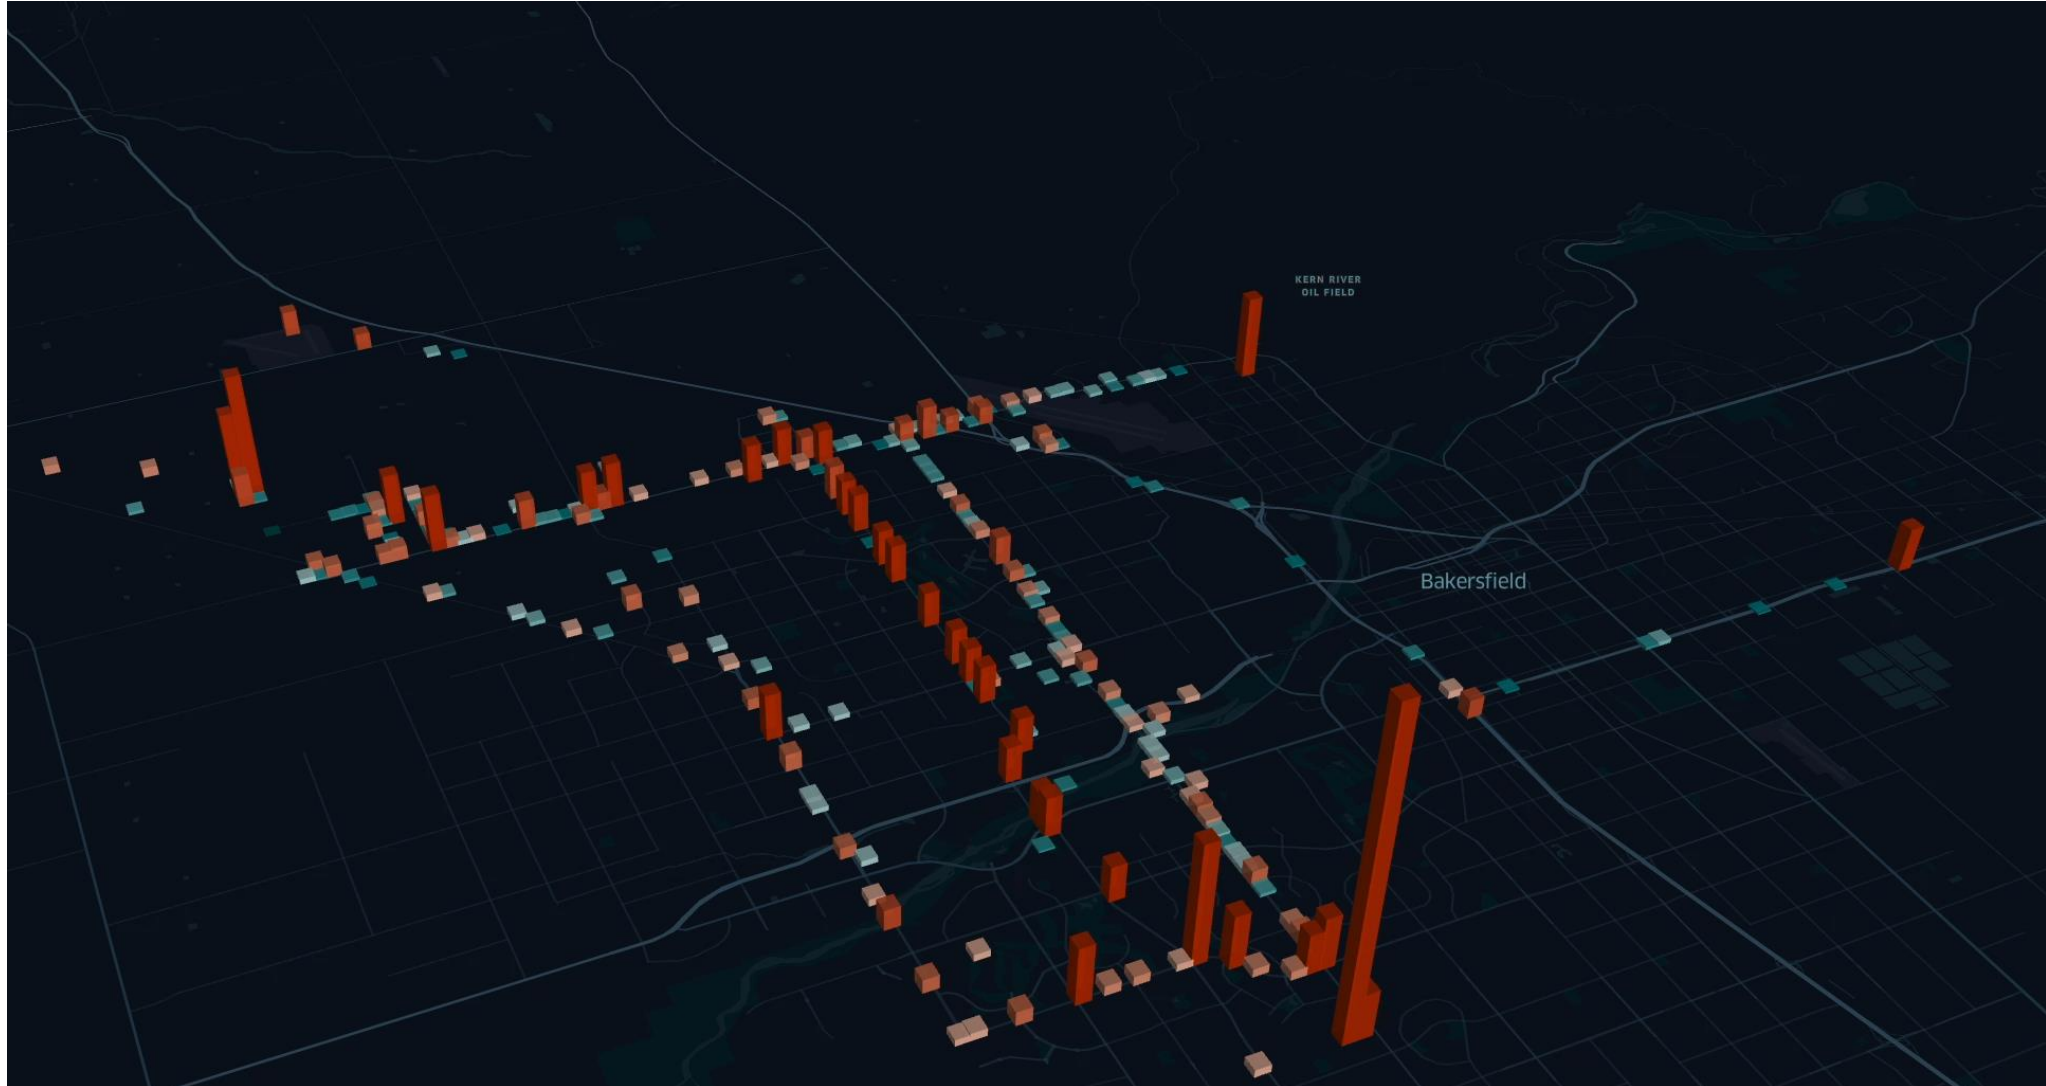

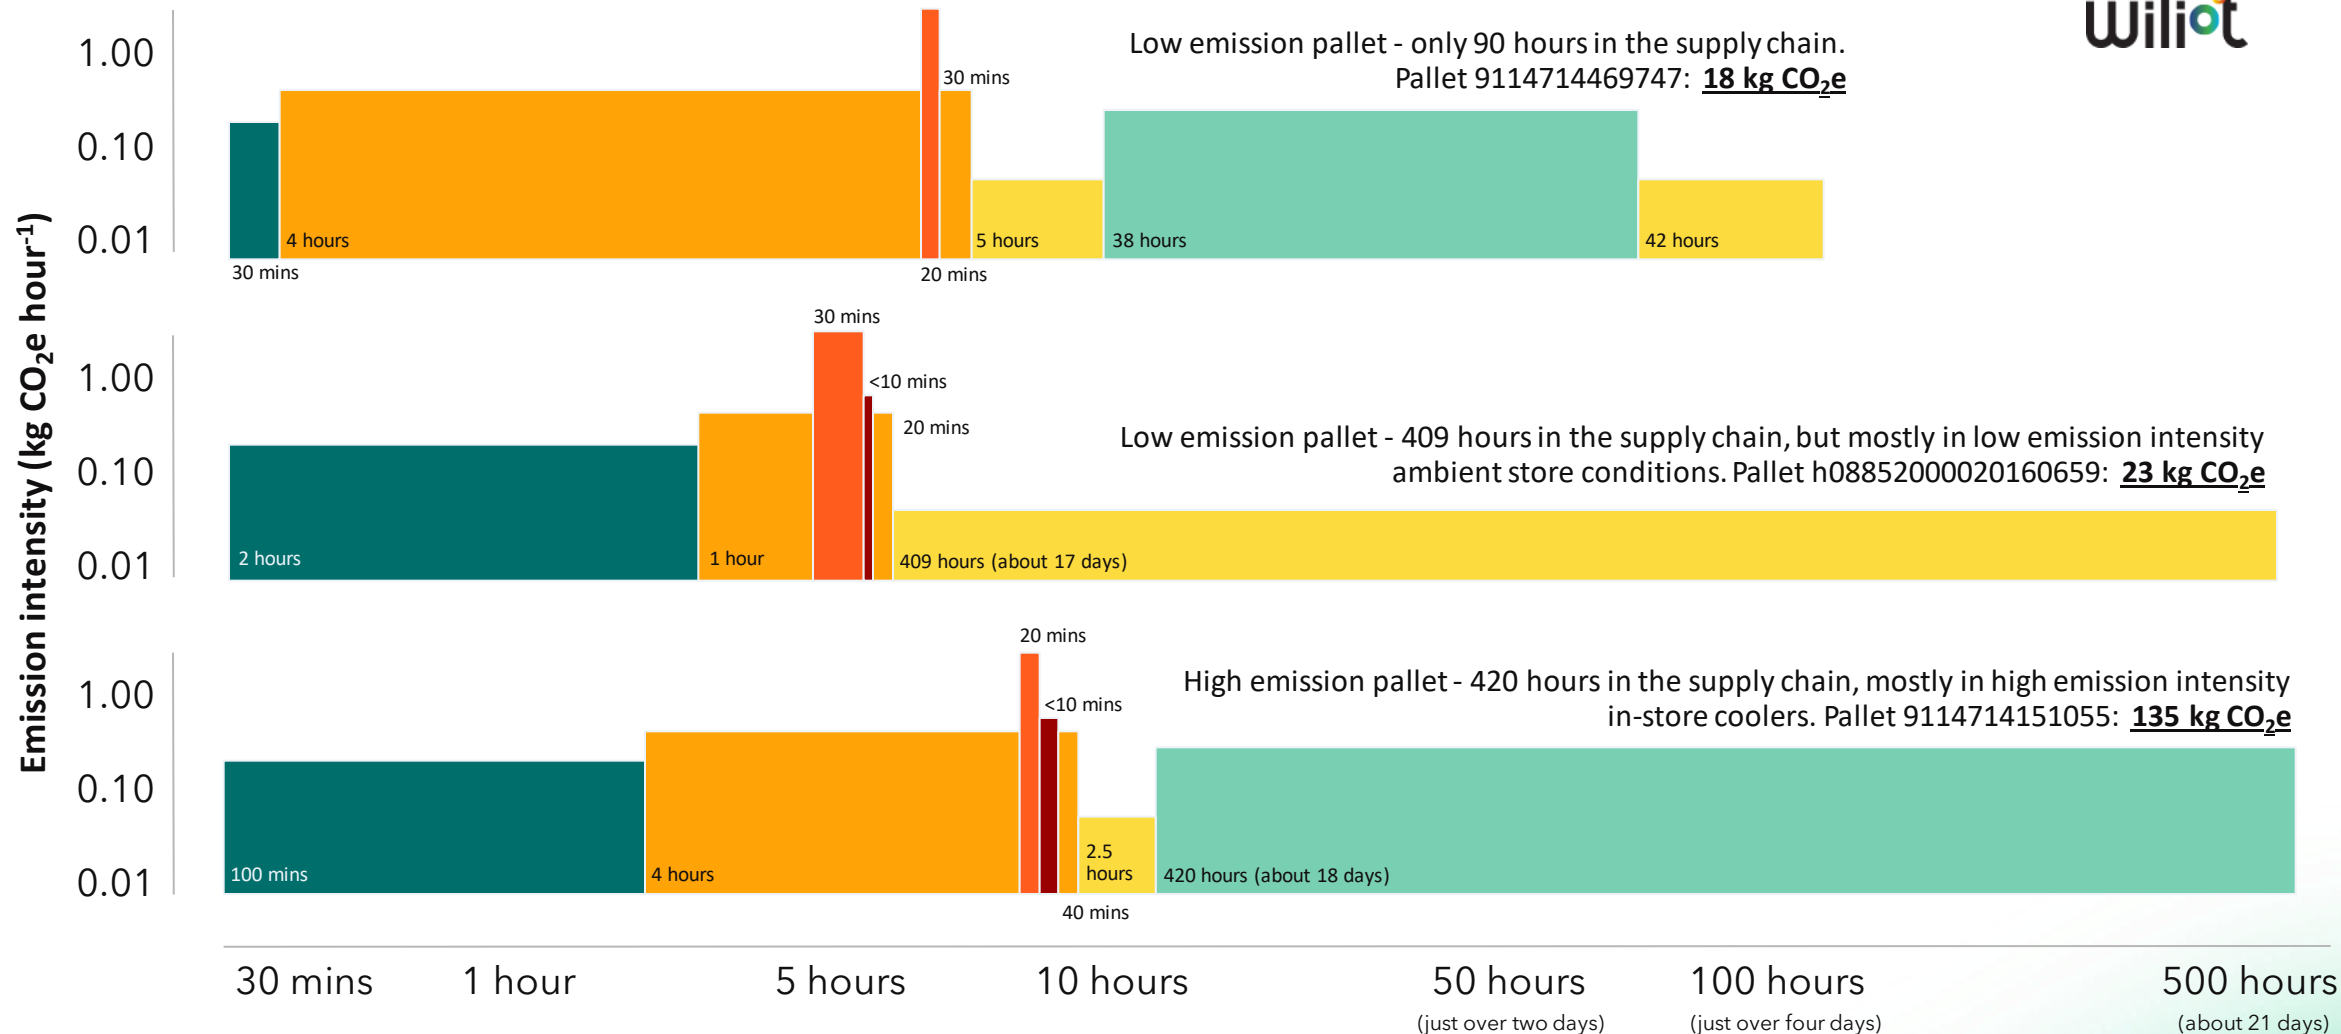

802.11 AMP Task Group
(Ambient Power)
~2027

Wave Computing

Carbon visibility **real-time** across supply chain

Time spent in supply chain

Help Planet, Profit & People

Carbon = Cost

Implications

Good News For All - Action Required

Carriers

Device & Infrastructure Vendors

Consultants

Enterprises

Consumers

Strengths	Open Access for CPGs and Retailers	Scale New Product Introduction	Strategy, SI, Dev Capacity	Resources Incumbency	Power of the Purse
Weakness	New Paradigm - Pricing, Services, Solutions	Innovators Dilemma	Experience with the New Paradigm / Serialization	Gap in skills and systems required	Understanding and Choosing Offerings
Opportunities	Massive Value & Recurring Revenue	Massive New Categories of Systems	Helping a World Changing Transform	Demand Chain, Efficiencies, XaaS	The Power of Visibility
Threats	IoT Networks	New Entrants	New Entrants	New Entrants	Data Ownership
Action	New BU Prepare Using Existing BLE Standards	Pre-standard devices Learn in existing BLE market	New BU Develop Competency	New BU Bring in New Skills Enterprise Architecture Plan	Demand Transparency Demand Data Protection
