

Spectrum and Policy Forum: A reality check on planning and implementation of mobile networks in Latin America

Tuesday, 31st October 2017

This Forum will focus on spectrum and policy issues prevalent in Latin America today with a look towards the future and 5G technology deployments. The discussions will highlight the deploying and enhancing of 4G networks alongside the challenges and most appropriate timing for getting platforms and policies ready for 5G services.

As a region, Latin America has been very active in releasing spectrum for mobile services and deploying 4G technology. This session will showcase how the release of spectrum and associated supporting policies have supported economic growth and social equality.

There is a strong belief that common policy and regulation for mobile in the region will bring about a better future for all.

OPENING KEYNOTES	
14.30 – 14.40	GSMA Welcome – mobile delivering on regional broadband goals
14.40 – 15.00	Making the most of spectrum – using mobile services to empower citizens
15.00 – 15.20	Infrastructure deployment – policies need to support ease of network rollout
15.20 – 16.00	PANEL: Spectrum bands to support coverage for all
16.00 – 16.15	Networking Break
16.15 – 16.55	PANEL: 5G – how, when and why for LatAm?
16.55 – 17:00	Close and Thanks
