

Income generating energy solution, Uganda Fenix International (in partnership with MTN Group)

Fenix International designs and manufactures income-generating energy solutions for mobile telecoms in emerging markets. The Fenix ReadySet is an intelligent plug-and-play energy system that can power mobile phones, lights, and water purifiers as well as medical applications. MTN Group has sold over 2,000 ReadySet energy systems across East Africa, each empowering an entrepreneur to become a micro-utility to their communities. They are in turn powering 100,000 off-grid mobile subscribers, providing an estimated 5.2 million phone charges, generating more than \$1.5 million in income for ReadySet entrepreneurs and saving subscribers over \$2 million each year in charging expenses.
