We define "Tech hubs" as: Physical spaces designed to foster the success of tech projects. Among them we distinguish:
• Incubators & accelerators designed to accelerate the growth of start-ups through business support resources and services
• Other types of spaces supporting tech projects: innovation spaces, maker spaces, hacker spaces, fab labs, co working spaces

*Tech hubs are defined as active when they show recent online activity (on their website or on social networks) or have been reported as active by local experts interviewed. 257 were selected on a total of 330 screened

**Estimated number, India has not been covered by an in-depth analysis. Other key data presented here do not include India. source: Entrepreneur Magazine India
