Market assessment studies for MNOs in 9 countries:

4 Studies for Orange

2 Studies for Etisalat

2 Studies for Ufone

1 Study for NCell

### DIRECT BENEFICIARIES

4,542,410

<sup>1</sup> The early-stage investment provided through our Innovation Fund has helped several companies demonstrate proof of concept for their models, which in turn has attracted large-scale private sector investment. The majority of this investment has been in PAYG solar companies Lumos (USD 90 million), M-KOPA (USD 80 million), Fenix, d.light, Mobisol and PEG.
