The auditors were provided with appropriate evidence that the processes and controls on the audit dates were consistent with those required by the SAS-SM Standard v3.1 and the SAS Consolidated Security Requirements v8.0, with the following scope:

<b>Subscription Management – Data Preparation:</b>	Out of scope	<b>Subscription Management – Secure Routing:</b>	Out of scope
<b>Data Centre Operations and Management</b>	Within audit scope for cloud hosting	<b>Subscription Management – Data Preparation+:</b>	Out of scope
<b>Subscription Management – Discovery Service</b>	Out of scope		

**Notes & Exclusions:**

This certification (for Data Centre Operations and Management) excludes any management of SM applications or SM application data. The certified cloud region does not provide SM clients with physical access to IT infrastructure. This audit used a data centre and service sampling approach. The audit team is satisfied that this approach has provided sufficient assurance of the cloud region's compliance with the SAS requirements. Due to the Covid-19 pandemic travel restrictions, one of the data center audits was performed remotely in accordance with the GSMA SAS Covid-19 Audit and Certification Policy. This did not impact the ability of the auditors to assess the full scope of compliance.
