Notes & Exclusions: BCC's primary business is personalisation and packaging of card form-factor UICCs on an OEM basis using production data generated by its customers. Data is protected by keys that are managed by customer organisations; decrypted at the point of personalisation by customer-supplied tools. BCC has also demonstrated its own systems to generate production data on-site, protected by keys managed by BCC. These mechanisms were not, however, in regular use at the site at the time of certification, so they have been awarded provisional certification.
