

Certificate

This is to certify that

Kigen (UK) Limited, Dublin, Ireland

has participated in the GSM Association Security Accreditation Scheme for UICC Production (SAS-UP) and satisfied the scheme's requirements.

This certificate remains valid until the end of September 2024*.

Alex Sinclair
Chief Technology Officer
GSMA

* Dependent on continued supporting site certification (currently valid to end September 2024)

Scope of Certification

To be viewed as part of Security Accreditation Scheme Certificate No: KN-DN-UP-0924-3

Production Site: Kigen (UK) Limited

Site Address: Interxion DUB3, Grange Castle Business Park, New Nangor Road, Dublin, D22 NN24, Ireland

Supporting site(s) details: Type: Remote admin support. Kigen (UK) Limited, City Quays 2, 7 Clarendon Rd, Belfast, BT1 3BG. Expiry date: September 2024

The auditors were provided with appropriate evidence that the processes and controls on the audit dates were consistent with those required by the SAS-UP Standard v9.1 and the SAS Consolidated Security Requirements v8.1, with the following scope:

Generation of data for personalisation:	UICC, eUICC	Personalisation:	Not carried out at this site
Management of PKI certificates:	GSMA PKI Live	Post-personalisation packaging:	Not carried out at this site

Notes & Exclusions: The Primary Site functions as a self-contained UICC/eUICC data generation environment inside a dedicated tenant server room operated and controlled by Kigen, within the Interxion DUB3 data centre. All generation of production, response and subscription management data takes place within the data generation environment under Kigen’s control, operating independently of the company’s SAS-UP certified activities at other Primary Sites. eUICC data generation utilises EUM certificate key pairs that are stored within HSMS in the Kigen data generation environment at the Dublin site. The operation, monitoring and management of the logical and physical data generation environments, and the maintenance of the overall security management system, are conducted remotely, under the control of the Supporting Site. Personnel from Kigen’s Belfast office provide on-site support at the Primary Site where required.
