

Security Accreditation
Scheme

Certificate No: MT-MR-SM-0624-2

Certificate

This is to certify that

Microsoft Corporation, Azure Cloud regions in USA, Europe and Japan.

has participated in the GSM Association Security Accreditation Scheme for Subscription Management (SAS-SM) and satisfied the scheme's requirements.

This certificate remains valid until the end of June 2024*.

Alex Sinclair
Chief Technology Officer
GSMA

* Dependent on continued supporting site certification (currently valid to end June 2024)

Scope of Certification

To be viewed as part of Security Accreditation Scheme Certificate No: MT-MR-SM-0624-2

Production Site: Microsoft Corporation

Site Address: Microsoft Azure data centres listed on page 3.

Supporting site(s) details: Type: Cloud region services and centralised policies, procedures and controls. Microsoft Corporation Headquarters, 1 Microsoft Way, Redmond, Washington, 98052, USA. Expiry date: June 2024

The auditors were provided with appropriate evidence that the processes and controls on the audit dates were consistent with those required by the SAS-SM Standard v3.1 and the SAS Consolidated Security Requirements and Guidelines v9.2., with the following scope:

Subscription Management – Data Preparation:	Out of scope	Subscription Management – Secure Routing:	Out of scope
Data Centre Operations and Management	Within audit scope for cloud hosting	Subscription Management – Data Preparation+ (ref. SGP.22):	Out of scope
Subscription Management – Discovery Service	Out of scope		

Notes & Exclusions: This certification (for Data Centre Operations and Management) excludes any management of SM applications or SM application data. HSM as a Managed Service is within audit scope. The certified cloud region does not provide SM clients with physical access to IT infrastructure. This audit used a data centre and service sampling approach. The audit team is satisfied that this approach has provided sufficient assurance of the cloud region's compliance with the SAS requirements.
