Show a KaiOS-enabled phone:

"A KaiOS-enabled phone is like a smartphone without a touchscreen. It is cheaper than a traditional smartphone. It comes with a camera, Wi-Fi, Bluetooth, GPS and apps so you can do more than calling and texting. KaiOS-enabled phones use less data and the batteries last longer."

"A KaiOS phone gives you access to the internet, so you can use it to search for information you need on Google, watch videos on YouTube, and share photos on WhatsApp and Facebook. Over 100 million people use KaiOS phones to connect to the internet and improve their lives."
