UGANDA NATIONAL BUREAU OF STANDARDS

Pre-Export Verification of Conformity to Standards (PVoC)

Operational Manual

Introduction

Uganda National Bureau of Standards (UNBS) is a statutory body established by Act of Parliament, under the Ministry of Trade, Industry and Cooperatives (MTIC), and is responsible for matters of Standardisation, Quality Assurance, Metrology and Testing (SQMT). The aim of UNBS is to promote trade, enhance competitiveness of local industries and protect the health and safety of consumers.

Within its mandate, UNBS has the duty to inspect Commodities imported into the country, to ensure that they conform to mandatory Uganda standards. In its desire to improve the quality of imported Commodities, UNBS implements the Pre-Export Verification of Conformity to standards (PVoC) program for general goods through three (3) companies namely: -

TUV Rheinland, Intertek International Limited and Société Générale de Surveillance S.A (SGS) to carry out inspections on its behalf in the countries of origin. UNBS implements the Pre-Export Verification of Conformity to standards (PVoC) program for used motor vehicles through two (2) companies namely: - Jabal Kilimanjaro Auto Electric Mechanical Company and EAA Company Ltd.

PVoC is a conformity assessment procedure based on Article 5 of the WTO Technical Barriers to Trade Agreement (WTO/TBT Agreement). The program is designed and streamlined to be fully consistent with the rules, regulations and legitimate instruments incorporated in the relevant agreement of the World Trade Organisation (WTO). It takes into account: -

- the safety hazards inherent to the specific product (such as mechanical, electrical, thermal, fire or explosion, chemical, biological or radiation hazards)
- the severity of the hazards
- the homogeneity of the consignment ensuring that Commodities in a container are of consistent quality
- the final buyer and end user with respect to value for money
- Manufacture or sale of sub-standard commodities is a criminal offence under the UNBS Act Cap 327, Laws of Uganda. PVoC draws its legal mandate from legislation as contained in the Statutory Instrument No. 26 of 2018.

All stakeholders and service providers are expected to use this manual to guide them on how to undertake the PVoC process.

General Information

1.1 Definition

Pre-export verification of conformity (PVoC) is a type of conformity verification performed in the country of export/ origin that is essentially the assessment of the exporter/manufacturer's statement that their Commodities conform to agreed set of requirements which may include an audit of the production processes, documentary check of Conformity with regard to regulations, general inspection and

testing to ensure that specific commodities conform to the relevant Compulsory Uganda Specification or any other approved International Standards.

1.2 Objectives of PVoC

- To protect Consumers and the environment by ensuring importation of only quality-assured goods and preventing shipment into Uganda of substandard and hazardous products.

- To protect Uganda manufacturers from unfair competition of cheaper imitations of manufactured goods abroad and booster confidence of investors whose industries are currently under threat from the menace of substandard goods

- To reduce the cost of doing business by reducing clearance time of imported goods at ports of entry thus contributing to the competitiveness of Uganda in trade and investment.
- To ensure value for money for consumers and traders by preventing consumers from spending their hard-earned money on worthless and harmful goods that do not last.
- Improve tax revenue collection by preventing deceptive practices like mis-declaration of type and quantities of imported products.
- To create a better business environment for firms dealing in genuine quality and safe products thus bolstering the economy by increasing consumer confidence through trade in better quality and safer products.

- The efforts as well as resources of UNBS that would be channelled to testing imports, which amount to 60% of the total number of samples tested, would be diverted to testing products meant for export thereby promoting the growth of exports.
- Optimal use of resources by UNBS where the resources saved through PVoC can be channelled into market surveillance, promotion of quality standards and competitiveness in small scale industries in Uganda.

1.3 Benefits of PVoC

- Protect the health and safety of consumers and environment
- Protect the local industry from unfair competition
- Reduces fraudulent transactions by creating transparent trading ambiance
- Saves costs by eliminating demurrage,re-exportation and destruction
- Conforming commodities at a lower price; the PVoC program does not increase the price of the commodities. It instead encourages importers to select reliable suppliers who can provide available conformed commodities at a reduced price
- Facilitates timely clearance of goods

1.4 Obligations of the Importer

- Importer Buys Uganda standards from UNBS for the products regularly imported so as to know the standards requirements

- Before planning to make an order or buy the goods abroad, the importer contacts any of the PVOC service providers in Uganda to be guided on the physical location and contact of their office abroad, nearest to where the items are procured

- The importer can also Contact UNBS, or visits UNBS website to get contacts for the PVoC Service Providers in Uganda.

- Ensure that all product units issued with a COC irrespective of the PVOC Route bear a sticker of the UNBS Distinctive Mark obtained from the Bureau (The implementation for the application of the distinctive mark shall be amended as per the Tax Procedures Code (Tax Stamp) Regulations, 2018 for exercisable goods and the Uganda National Bureau of Standards (Use of the Distinctive Mark) Regulations, 2018).

- Ensure that all goods comply with Uganda standards requirements and that they are well marked for ease of traceability.

1.5 Procedure of PVoC

The procedure for assessment shall be as follows: -

a) Importer's (exporters) shall apply for the assessment of their commodities to one of the appointed service providers by filling in a copy of the request for Inspection.

   - Satisfactory Test reports from an accredited laboratory to ISO 17025,not more than one year old for food commodities and two years for non-food commodities
   - Payment of fees as per the route chosen
   - De-registration certificate for used motor vehicles

c) After presentation of the relevant documentation, the trader shall then choose to have their Commodities assessed for conformance to the relevant standards according to the product clearance route chosen.
d) The appointed service provider shall then check the conformity proof provided by the Applicant.

e) When there are no other conformity proofs or those availed are not accepted, then testing of the commodities is required.

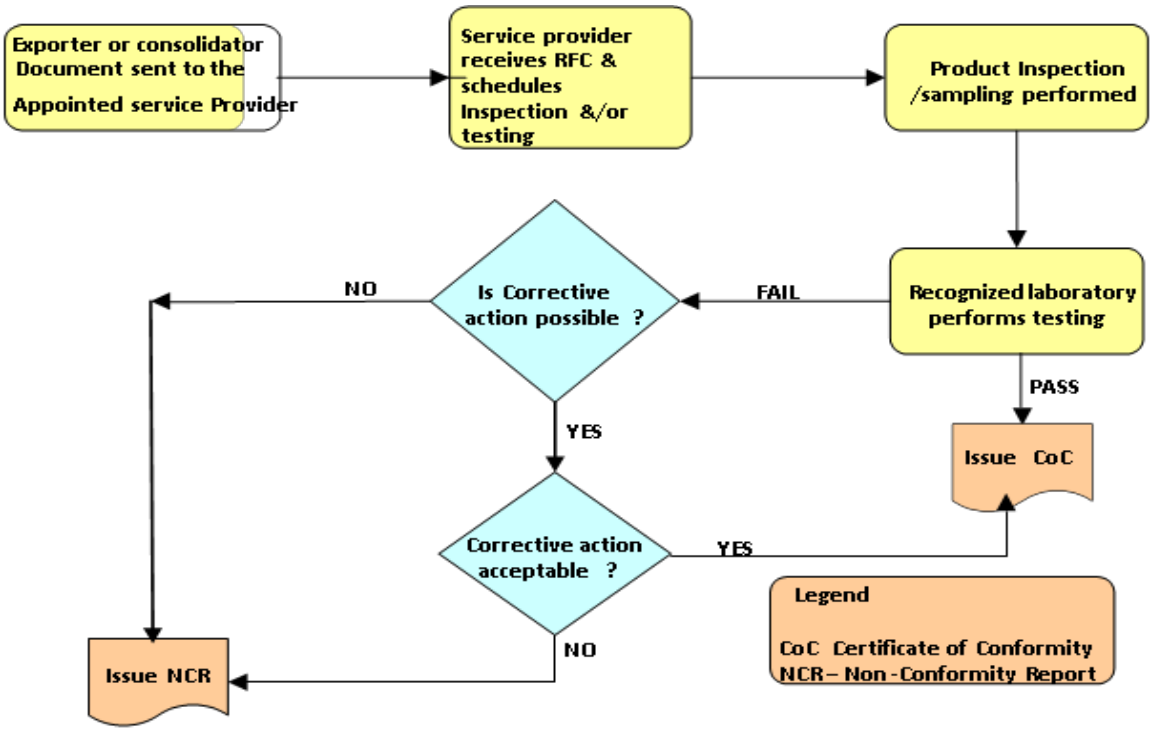

f) When testing is required, the
   - Testing shall be carried out by a Laboratory accredited by a full member of ILAC based on ISO 17025
   - Testing shall be carried out according to the essential requirements of the relevant standards agreed upon by UNBS
   - Test reports shall provide full identification of the sample, the test results, verdict and if possible photo of the tested items as per requirements of the ISO 17025

g) When inspection is carried out, the inspector shall: -
   - Perform visual verification of the specification of the line items
   - Performs visual verification of the available quantity of each line item
   - Carry out performance tests if feasible
   - Take photos of the commodities of the consignment (except when not allowed at inspection site)

3.1 Route A:

This route is applicable to any type of Commodities and any trader/ exporter; no prior registration is required.

Flow Chart for PVoC Basic Process - ROUTE A

3.2 ROUTE B:

This route is recommended for frequent exporters with homogeneous commodities and those registered commodities that may be shipped with other commodities. The route requires a self-declaration of compliance supported by substantiated evidence of conformity and consistency (test reports, certificates, Quality Management Certificates, etc). The exporter applies for Registration and forwards the request to the PVOC service provider. The service provider reviews the request including previous compliance history. Upon compliance to the technical review, a statement of registration is issued.

Registration for this route is annually renewable, subject to continual compliance. The PVOC service provider shall undertake surveillance audits on the exporter twice annually and test the commodities at the

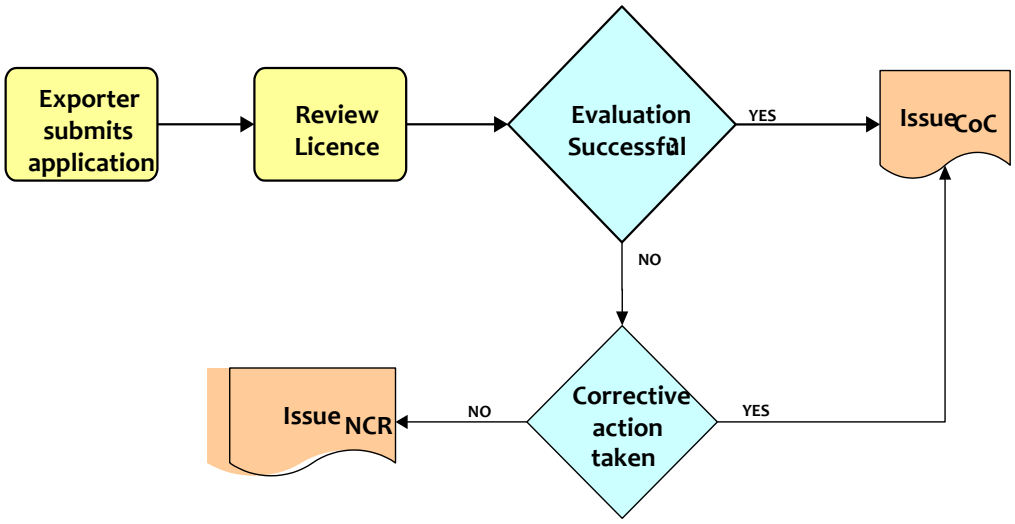

service provider laboratories. Each time the exporter needs to ship to Uganda, a request for certification shall be made to the SP. Attachments including traceable test reports to the shipment and other quality documents shall be reviewed. If they comply a COC shall be issued and if they do not comply an NCR shall be issued. Issuance of CoC is based on the risk management system agreed upon by UNBS and SP.

3.3 ROUTE C:

This route is only for manufacturers and distributors who are duly authorized by manufacturers to represent them. It involves consistent shipment compliance, evaluation of test reports and additional testing to demonstrate full compliance with the Standards. The PVOC service provider shall undertake surveillance audits on the exporter twice annually and also test the commodities at the service provider laboratories two times in a year. This process closely follows the ISO / IEC Guide 28 – General Rules for a model 3rd party Certification Systems for commodities.

Licensing for this route is annually renewable, subject to continual compliance.

3.5 Used Motor Vehicles

All used motor vehicles imported from Japan,UK ,South Africa, Hong Kong, Singapore and UAE shall undergo PVoC before they are shipped into Uganda. The exporter/importer shall submit the commercial invoice, export certificate and any other relevant documents to the PVoC service provider.
