

GSMA IoT Community

Barbara Pareglio
Senior Technical Director

Welcome to the Internet of Things Community

AIM

- Making IoT simple for customers by adding value and accelerating the delivery of new connected devices and services in IoT

HOW

- industry collaboration
- appropriate regulation
- optimising ecosystems
- developing key enablers to support the growth of the IoT

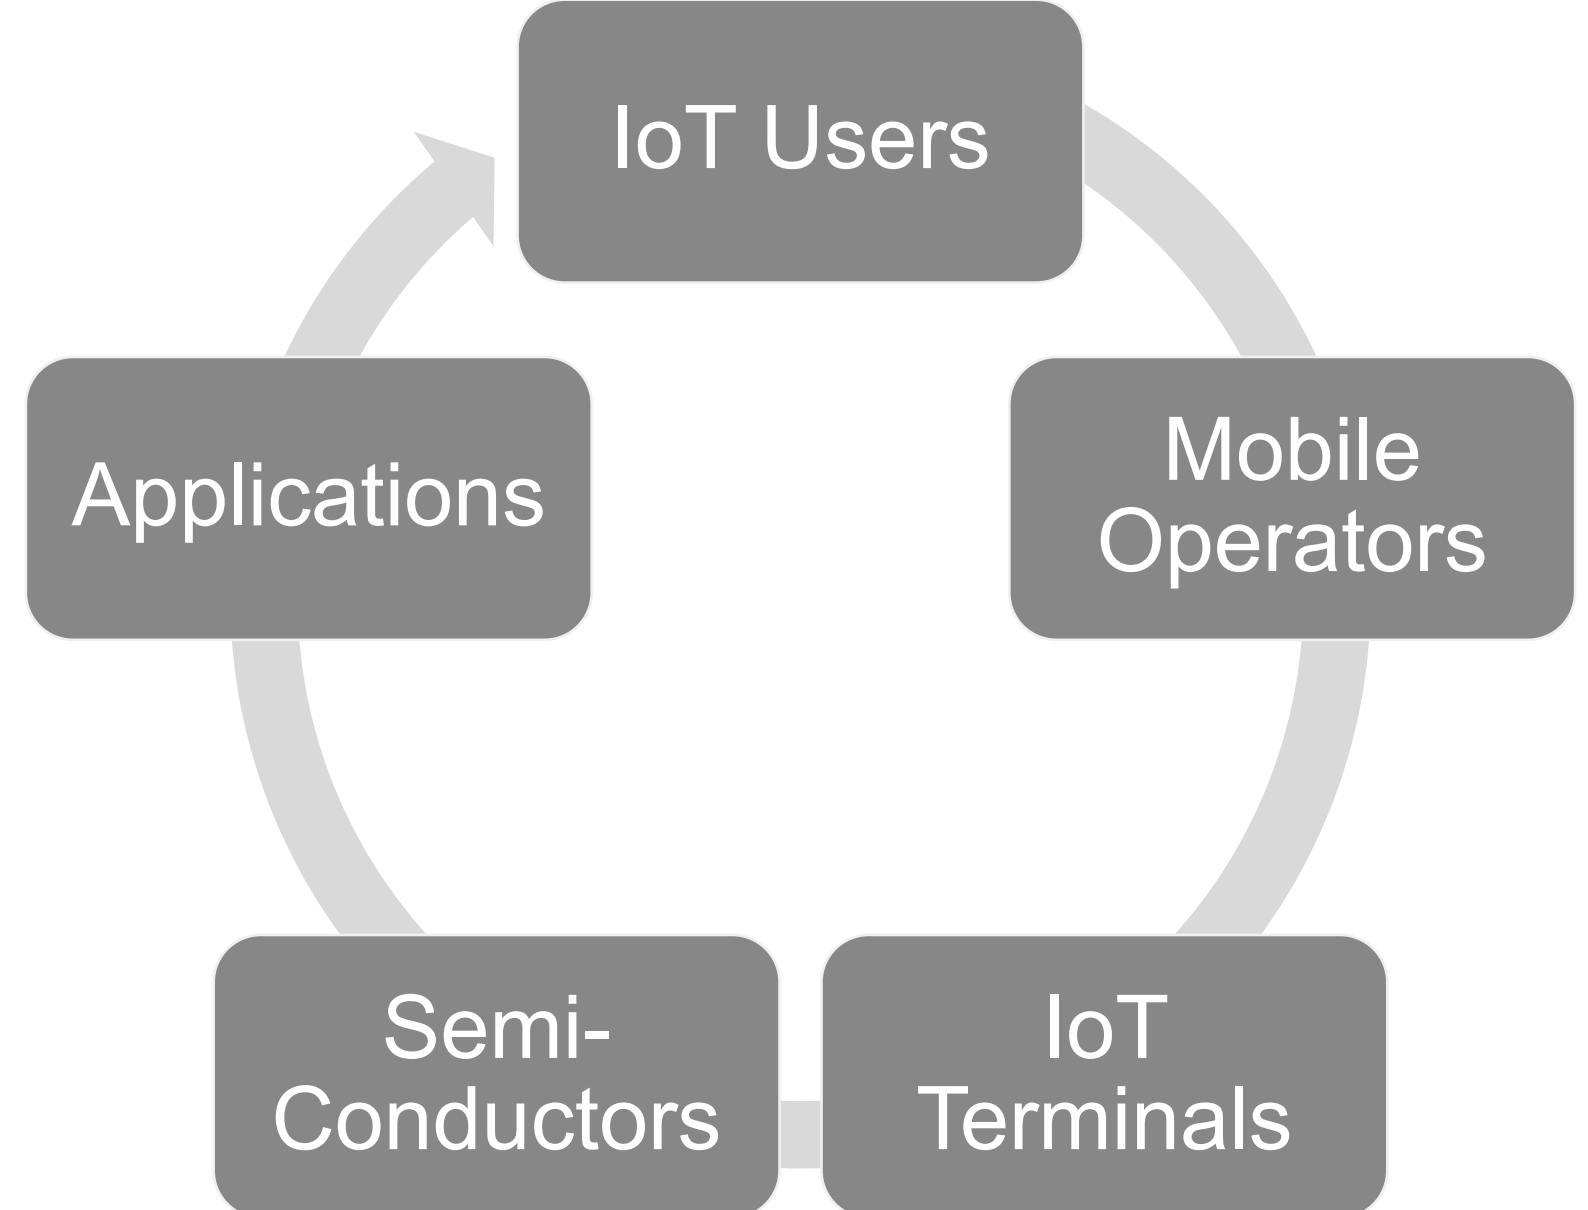

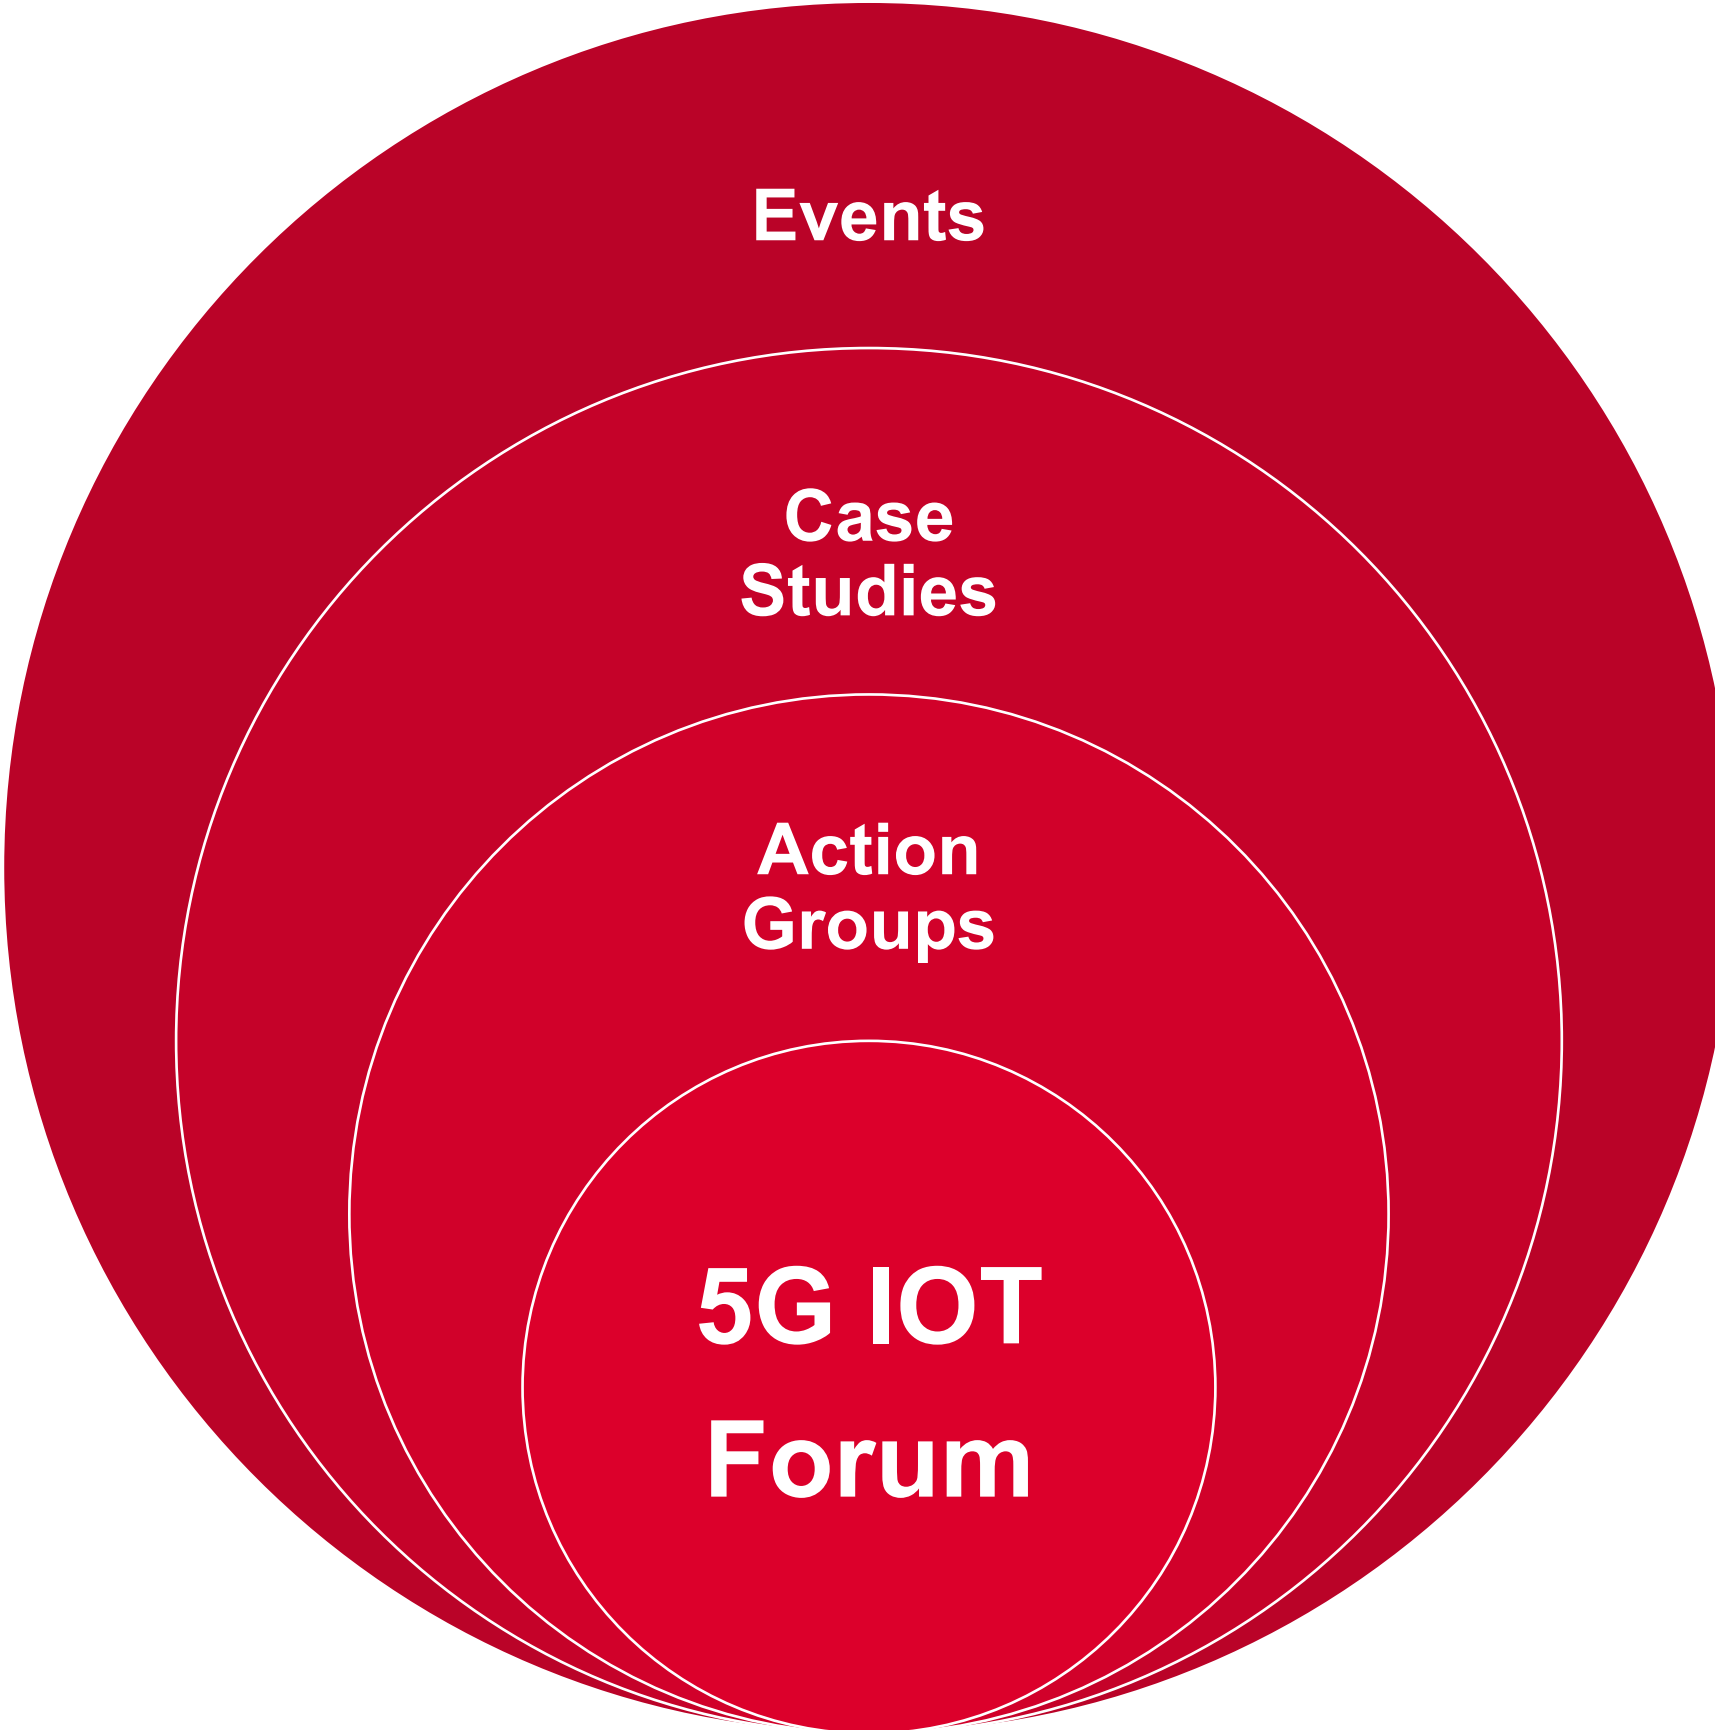

GSMA Resources

From educational guides, whitepapers and blogs

Together with the GSMA IoT Community, we produce a range of industry resources illustrating the acceleration and adoption of IoT Solution across different sectors

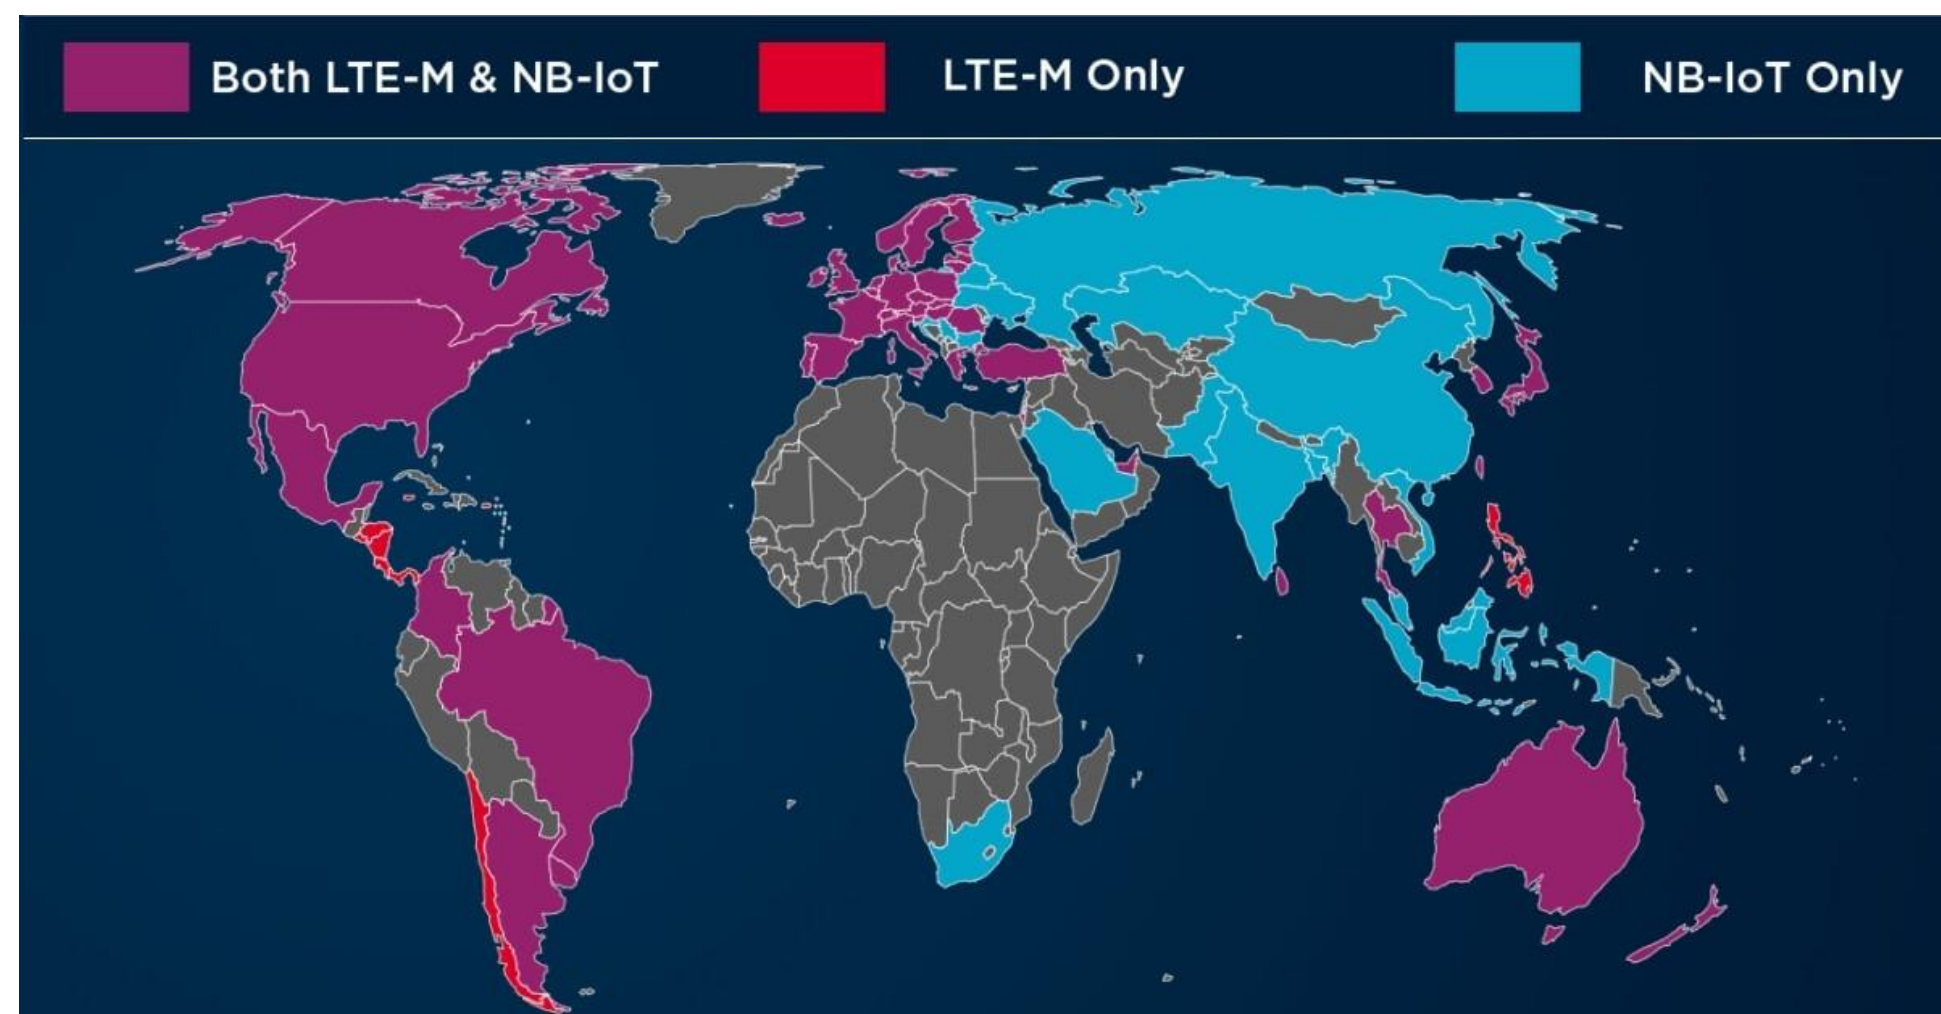

What is the GSMA IoT Community?

Our Mission
Making IoT Easier for Customers

GSMA Members
Creating an ecosystem of collaboration

Celebrating 1 Billion Cellular LPWA Connections

287 NB-IoT/LTE-M Networks

Transforma Insights forecasts that there will be 1.15 billion mMTC IoT connections by the end of 2026. Reaching over 1 billion mMTC devices isn't just a milestone for cellular connectivity, it's a clear signal that the physical world is becoming fully connected

Let's hear from the GSMA IoT Community

Who made 1 Billion connections happen !

Watch the video [here](#)

Thank You !
