

T-ISAC Summit: Prevention through collaboration

Day 2 – Tuesday 10th September 2024

Welcome coffee 09:00

Session 1 - Introduction **09:30 – 10:20**

Before diving into the minutiae of efficiently using MISP, we'll take a step back and explore the tool's objectives, as well as provide a high-level overview of its capabilities, usage, and evolution.

Session 2 - Mastering MISP: Powering Threat Intelligence **10:20 – 11:20**

In this session, we'll be diving into using MISP, starting from the very basics of how to build and publish data as well as some basic concepts that we consider to be foundational knowledge for MISP users. Participants will learn how to create and contextualise events and search data, and they will be introduced to some of the most used sub-systems of the platform.

Break

Session 3 - Elevating Your Expertise: Unlocking the advanced capabilities of the platform **11:50 – 12:50**

In this session, we'll explore further some of the more advanced features that the platform offers, including some of the newer features added to the tool. We will mostly focus on realistic use cases whilst interacting with the tool, including plenty of best practice advice for even advanced users.

Lunch

Powering Connections: MISP administration essentials **13:50 – 14:35**

We'll be shifting away from a user perspective for this session and will mostly focus on MISP from an administrative perspective. Deployment, configuration, MISP to MISP interconnections and community management are the main topics on the agenda.

Session 5 – Putting skills to the test - real-world MISP challenges await **14:35 – 15:35**

To summarise everything that participants have learnt during the day, we'll have a set of tasks where they get to use their new (or pre-existing) MISP skills in real-world scenarios.
