Mobile money is central to the mobile industry’s contribution to 15 of 17 Sustainable Development Goals.
MOBILE MONEY IN 2019

Over 1bn
REGISTERED MOBILE MONEY ACCOUNTS

Over $1.9bn processed daily by the mobile money industry

77 Mobile money deployments have more than 1m 90-day active accounts

Compared to 27 in 2014

57% DIGITAL
Digital transaction values now exceeding cash-in/out values

$22bn IN CIRCULATION
More money is circulating than exiting the mobile money system

290 MOBILE MONEY DEPLOYMENTS ARE LIVE IN 95 COUNTRIES

50m NEW REGISTERED ACCOUNTS

SUB-SAHARAN AFRICA
2019 marked a major milestone for the mobile money industry: the number of registered mobile money accounts surpassed one billion.

Reaching the one billion mark is a tremendous achievement for an industry that is just over a decade old. The mobile money industry of today has a host of seasoned providers with a broad set of operational capabilities, a full suite of products and a global reach. With **290 live services in 95 countries** and **372 million active accounts**, mobile money is entering the mainstream and becoming the path to financial inclusion in most low-income countries. Mobile money services are available in **96 per cent of countries** where less than a third of the population have an account at a formal financial institution.

### The Core Trends of 2019

- **A growing number of providers are becoming commercially sustainable**
- **The industry continues to invest in distribution networks and sustainable agent income**
- **More providers are shifting to a ‘payments as a platform’ model**
- **The digitisation of payments has reached new heights**
- **More value is circulating in the mobile money system than exiting**
- **The industry is increasingly interoperable and integrated**
- **The regulatory landscape is evolving**

### The industry continues to invest in distribution networks and sustainable agent income

The mobile money industry has created opportunities for entrepreneurs in emerging markets to become agents. The number of **agent outlets has almost tripled** over the last five years, reaching **7.7 million**. A mobile money agent has seven times the reach of ATMs and 20 times the reach of bank branches. In rural and hard-to-reach areas, mobile money agents have had a transformative impact on financial inclusion. Meanwhile, agents are seeing their monthly incomes rise substantially with commissions that are not taking away from investment in other areas of the mobile money business.

### Increasing User Trust and Relevance

Overall growth in transaction values has been impressive in the past 12 months. Total transaction values grew by 20 per cent, reaching **$690 billion** in 2019, which means the industry is now **processing close to $2 billion a day** (over $1.9 billion). This growth and scale is a positive signal for the industry as it demonstrates higher levels of customer trust, greater relevance for users and the capacity of mobile money to digitise an increasing amount of capital.
INDUSTRY FIRSTS IN 2019

The digitisation of payments has reached new heights

For the first time, digital transactions represent the majority (57%) of mobile money transaction values. A larger proportion of money is entering and leaving the system in digital form, rather than through a cash conversion. This is primarily due to the industry becoming a more integral part of the financial ecosystem (i.e. interoperability), and lower barriers to third-party integration. This is a clear signal that providers have taken major steps to ensure digital transactions become a part of their customers’ everyday lives.

The number of markets where interoperability with banks and mobile money account-to-account interoperability is live: 48

The average number of banks connected to mobile money services: 13

The value of mobile money-enabled international remittances processed: $7.3bn

The ins and outs of mobile money¹

(USD, December 2019)

More value is circulating in the mobile money system than exiting

Another industry first - the total value in circulation (P2P and merchant payments) reached $22 billion in December 2019, more than doubling over the last two years and significantly surpassing the total value of outgoing transactions. The industry has clearly zeroed in on what keeps value circulating. For example, by creating more compelling value propositions for MSMEs with business management tools like customer analytics and inventory management, and offering credit lines to agents and merchants.

29% of respondents offer credit lines to agents

19% of respondents offer credit to merchants

74% of respondents offer additional management tools to MSMEs

---

¹ P2P (peer-to-peer transfers), IR (international remittances), B2M (bank-to-mobile transfers), Bill (bill payments), Bulk (bulk disbursements), M2B (mobile-to-bank transfers), MP (merchant payments), ATU (airtime top-ups).
