Making 5G NR a Commercial Reality for 2019

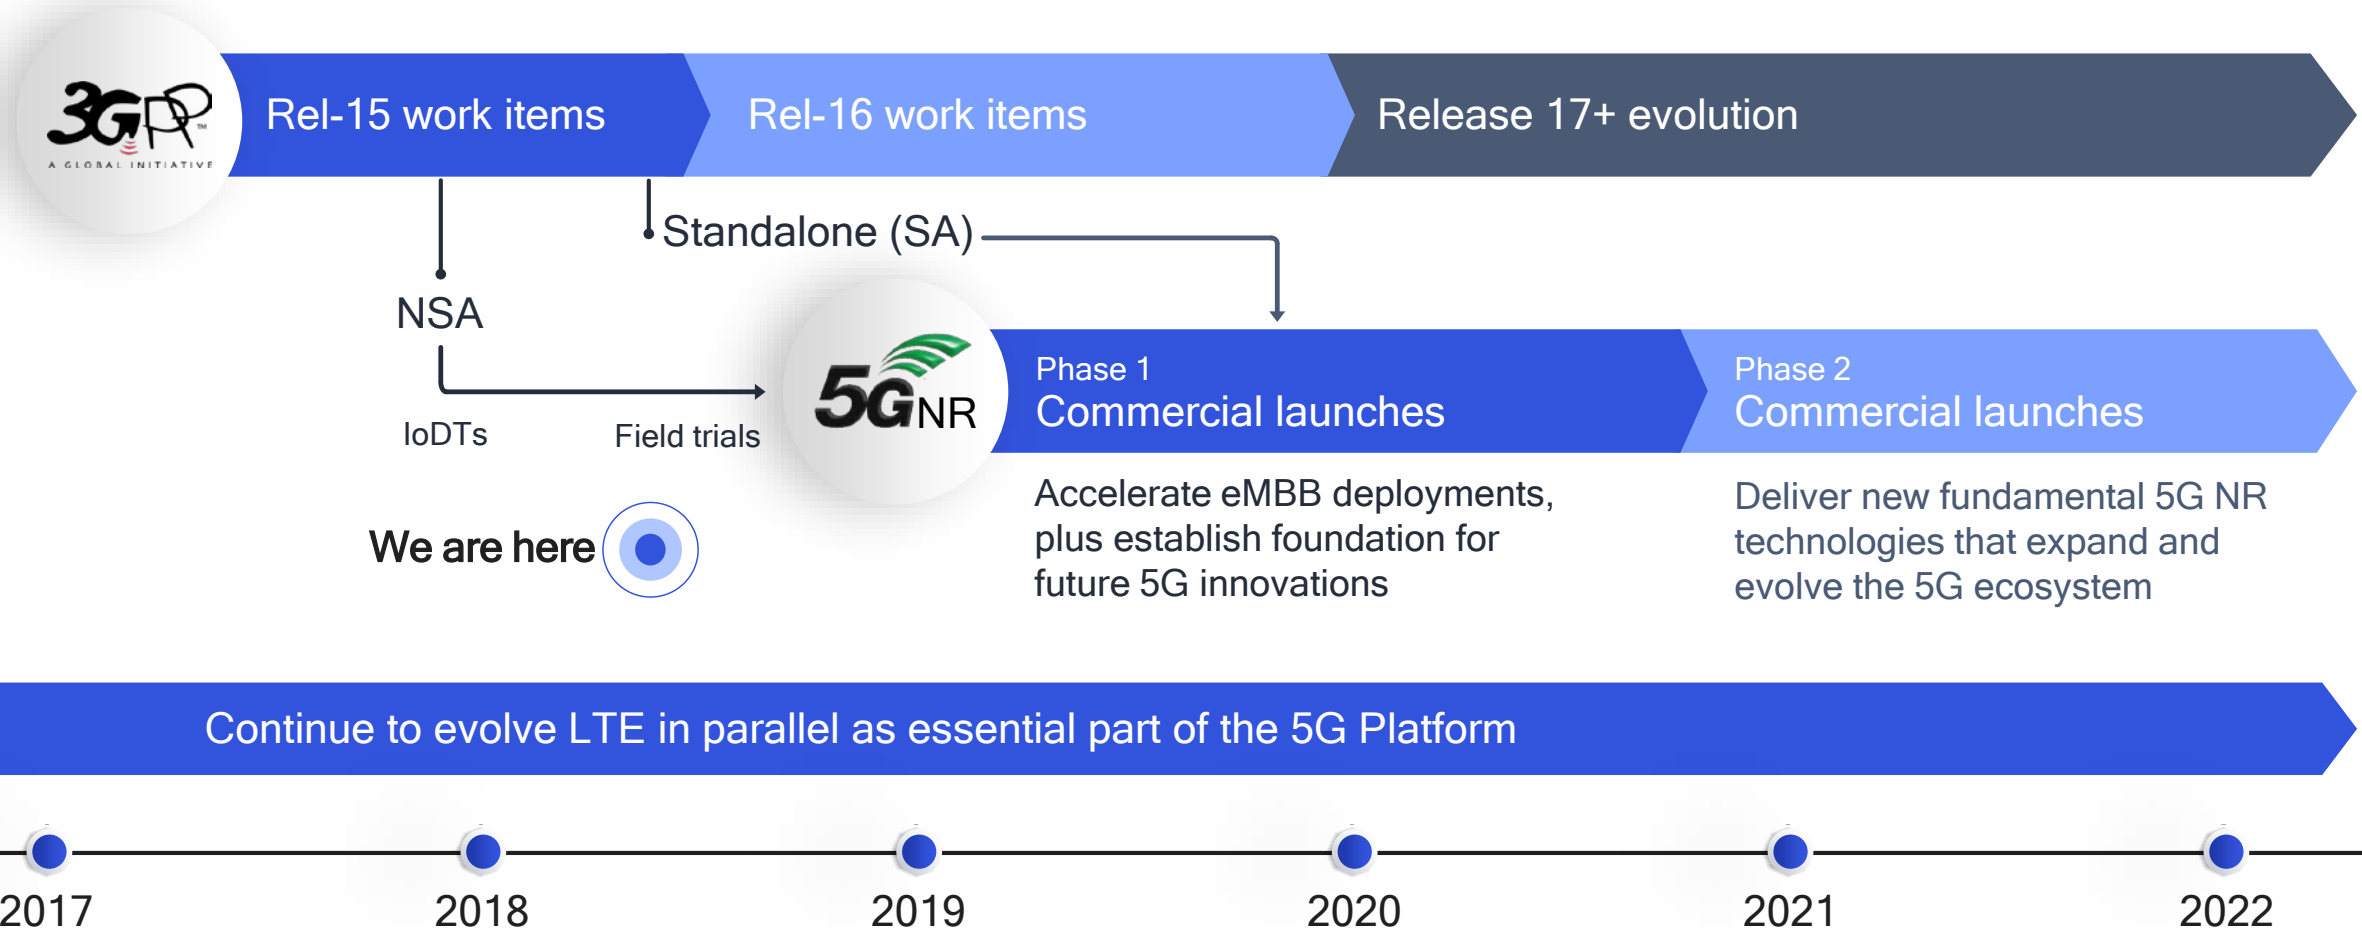

A unified, more capable 5G air interface

Dr. Hao Xu

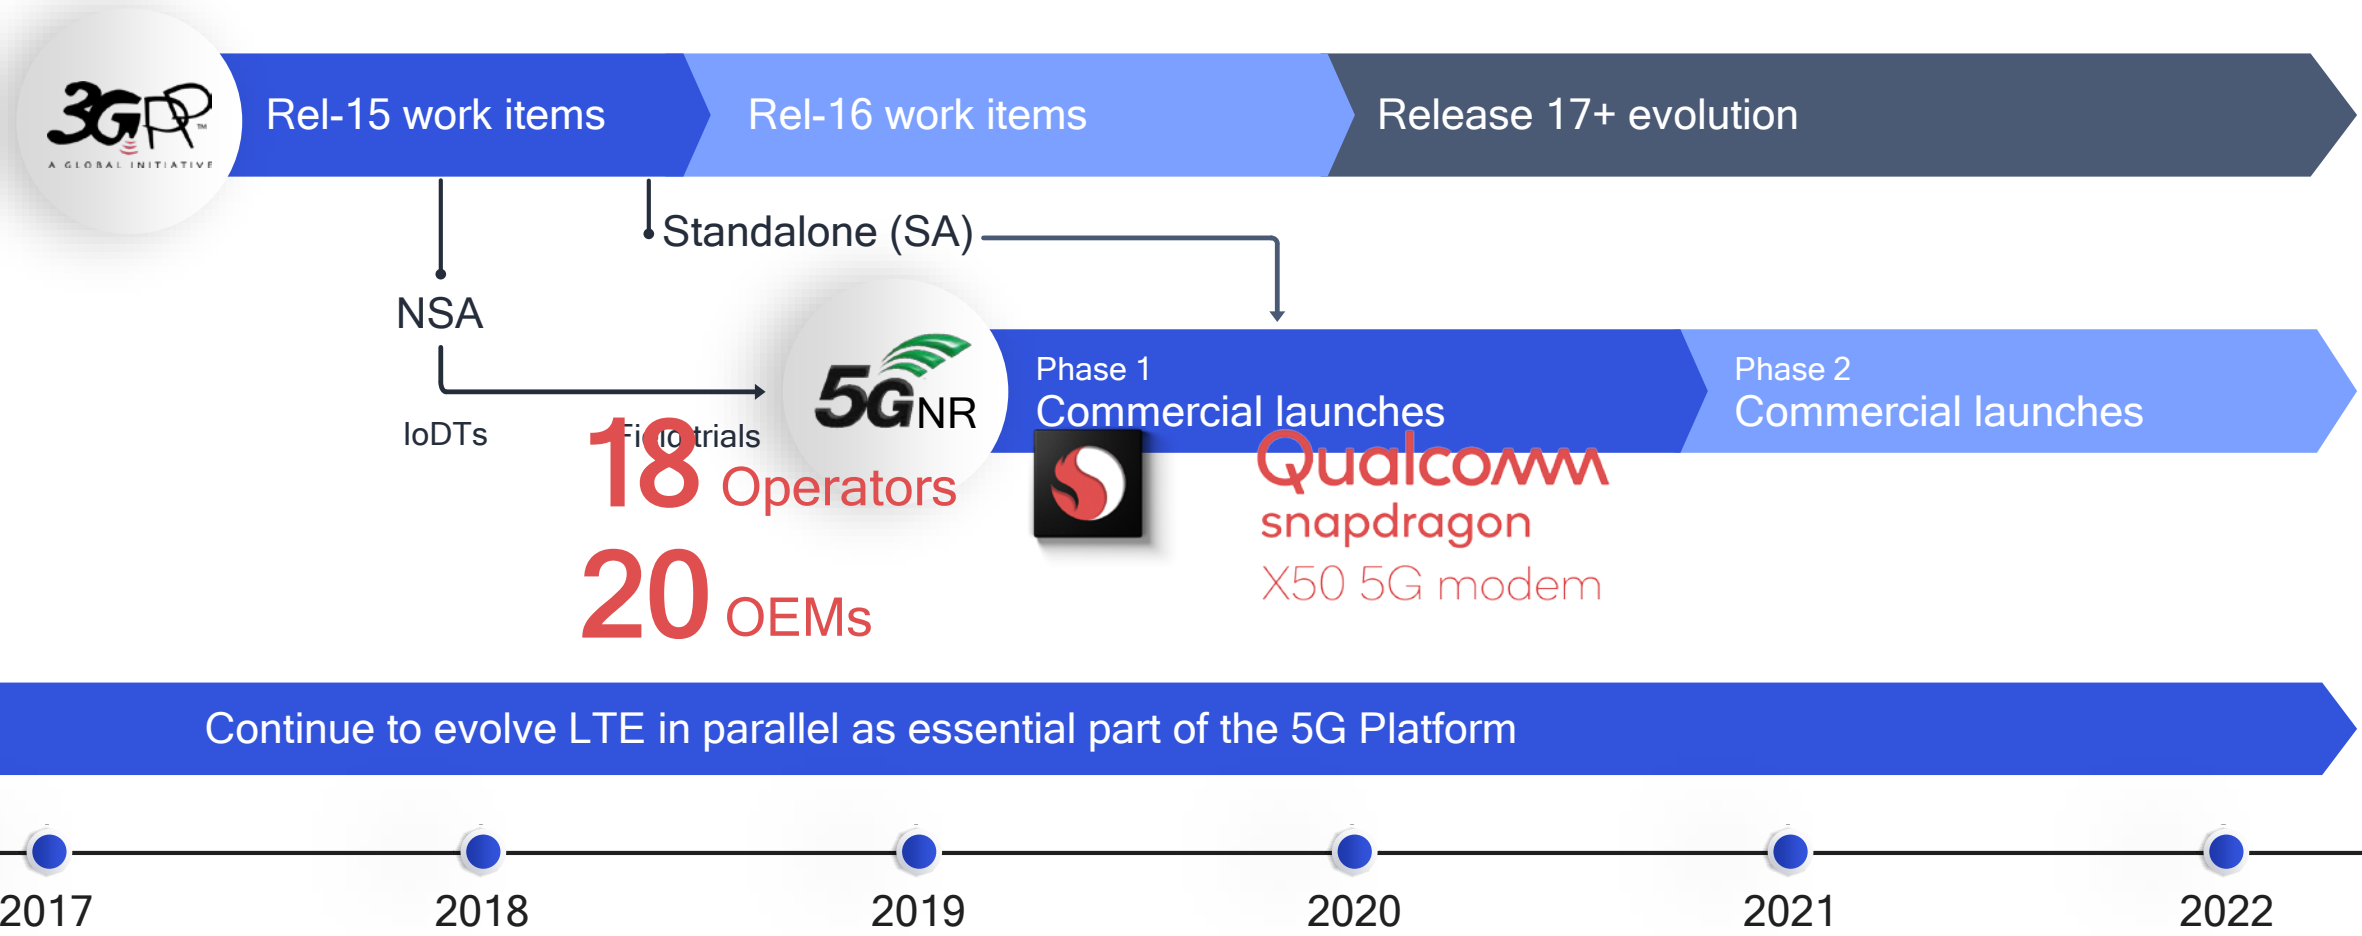

Head of Qualcomm Research China

Making 5G a reality in 2019

Making 5G a reality in 2019

Continue to evolve LTE in parallel as essential part of the 5G Platform

Making 5G NR a reality in 2019

Qualcomm

Best-in-class 5G prototype systems

Designing and testing 5G technologies for many years

5G NR standards and technology leadership

Our technology inventions are driving the 5G NR standard

5G NR interoperability testing and trials

Leveraging prototype systems and our leading global network experience

Modem and RFFE leadership

Announced the Qualcomm Snapdragon X50 5G modem family

————— LTE foundational technologies —————>

Qualcomm®
snapdragon 

X50

5G Modem family

World's first 5G-NR
multimode modems

2G/3G/4G/5G chipset
support

Sub-6 + mmWave

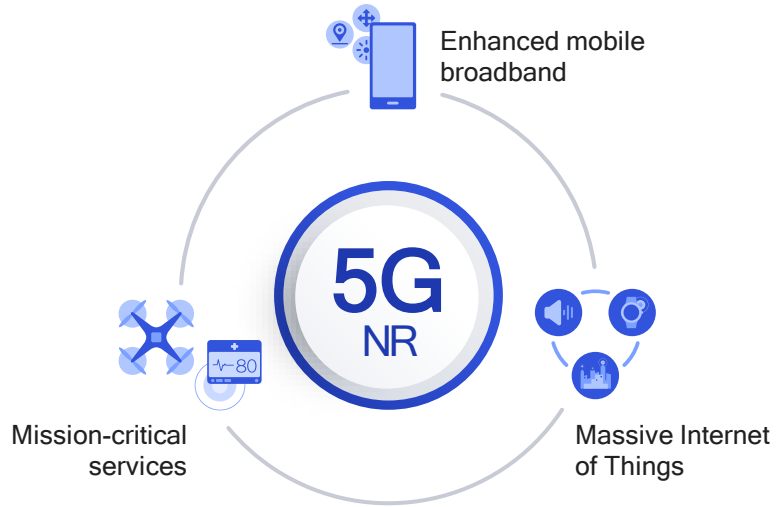

Premium-tier
smartphones in 2019

Designing a unified, more capable 5G air interface

Diverse services

Scalability to address an extreme variation of requirements

Diverse spectrum

Getting the most out of a wide array of spectrum bands/types

Diverse deployments

From macro to indoor hotspots, with support for diverse topologies

A unifying connectivity fabric for future innovation

A platform for existing, emerging, and unforeseen connected services

Overcoming numerous challenges to mobilize mmWave

Coverage

Analog beamforming with narrow beamwidth to overcome significant path loss in bands above 24 GHz

Robustness

Adaptive beam steering and switching to overcome blockage from hand, head, body and foliage

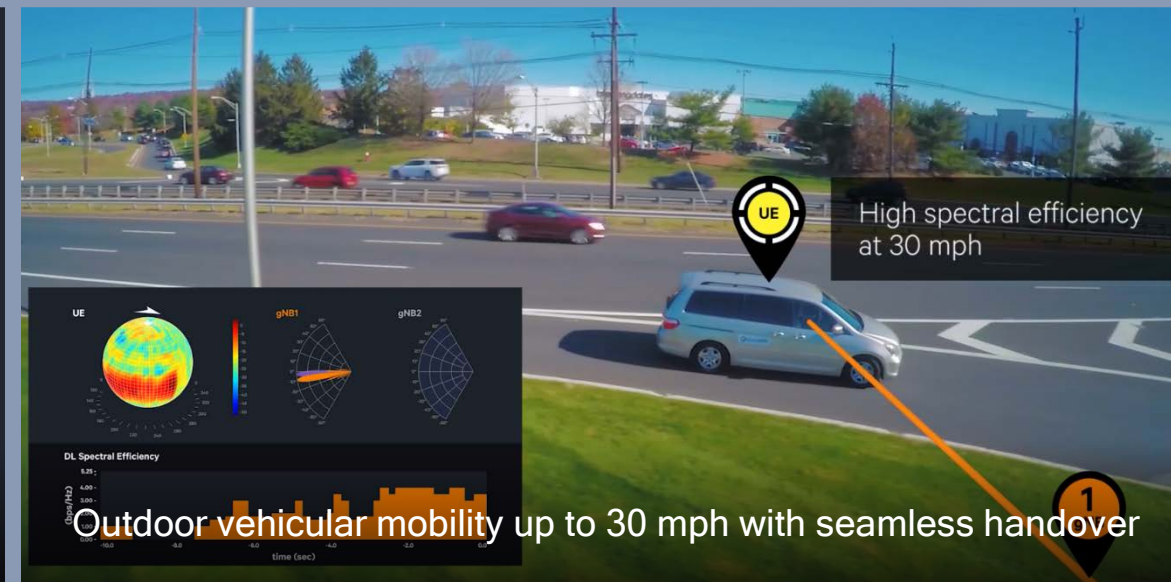

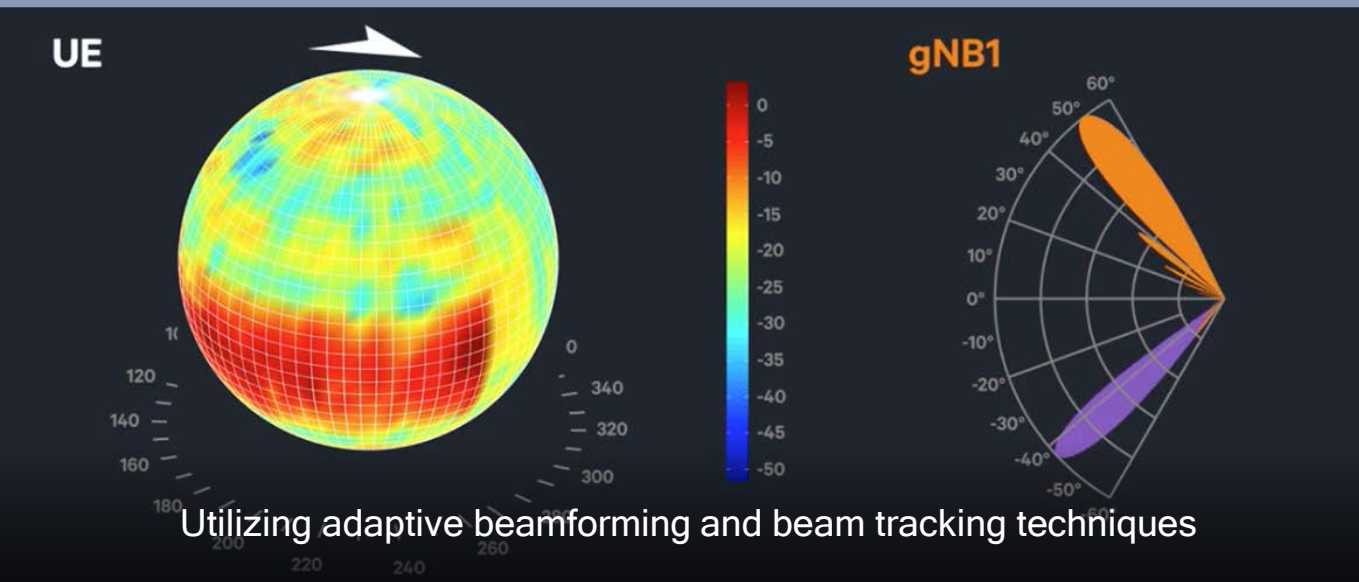

Device size/power

Different antenna configurations (face/edge) to fit mmWave design in smartphone form factor and thermal constraints

Mobilizing 5G mmWave in real-world environments

Demonstrating NLOS operation and robust mobility

Outdoor OTA testbed

Enables the evaluation of mobility/handover, hand/head-blocking, and other scenarios

Handover testing

gNB

UE Handset Module

San Francisco Simulation

65%
outdoor
coverage

1.4 Gbps
median
burst rate

5x
increase
in capacity

Collaborating with global operators to simulate 5G NR mmWave capacity and coverage

- Significant outdoor coverage possible utilizing actual existing LTE sites (10+ global cities)
- Will further benefit from LTE infrastructure (LAA small cells) to support Gigabit LTE launches
- Outdoor coverage only; frees up sub-6 GHz resources for out-to-indoor capacity
- Based on our extensive over-the-air testing and channel measurements

Frankfurt Simulation

5G NR Sub-6 GHz

Industry-first simulation of real world performance reveals immense 5G user experience gains over 4G

Median burst rate

Cell-edge burst rate

Assumptions: Actual Frankfurt city layout; Max LTE bandwidth 80 MHz (carrier frequencies ranging from 700 MHz to 2.7 GHz); 5G NR total bandwidth 100 MHz (carrier frequency 3.5 GHz); Mix of macro and small cell base stations; Bursty Poisson traffic model; 50% indoor and 50% outdoor UEs; 75% LTE only devices / 25% 5G NR capable devices; NR TDD 3:1 DL/UL slot configuration.

More autonomous manufacturing

PRODUCTION AND MAINTENANCE

Safer, more autonomous transportation

Reliable access to remote healthcare

Smarter agriculture

More efficient use of energy and utilities

Improved public safety and security

Sustainable cities and infrastructure

Digitized logistics and retail

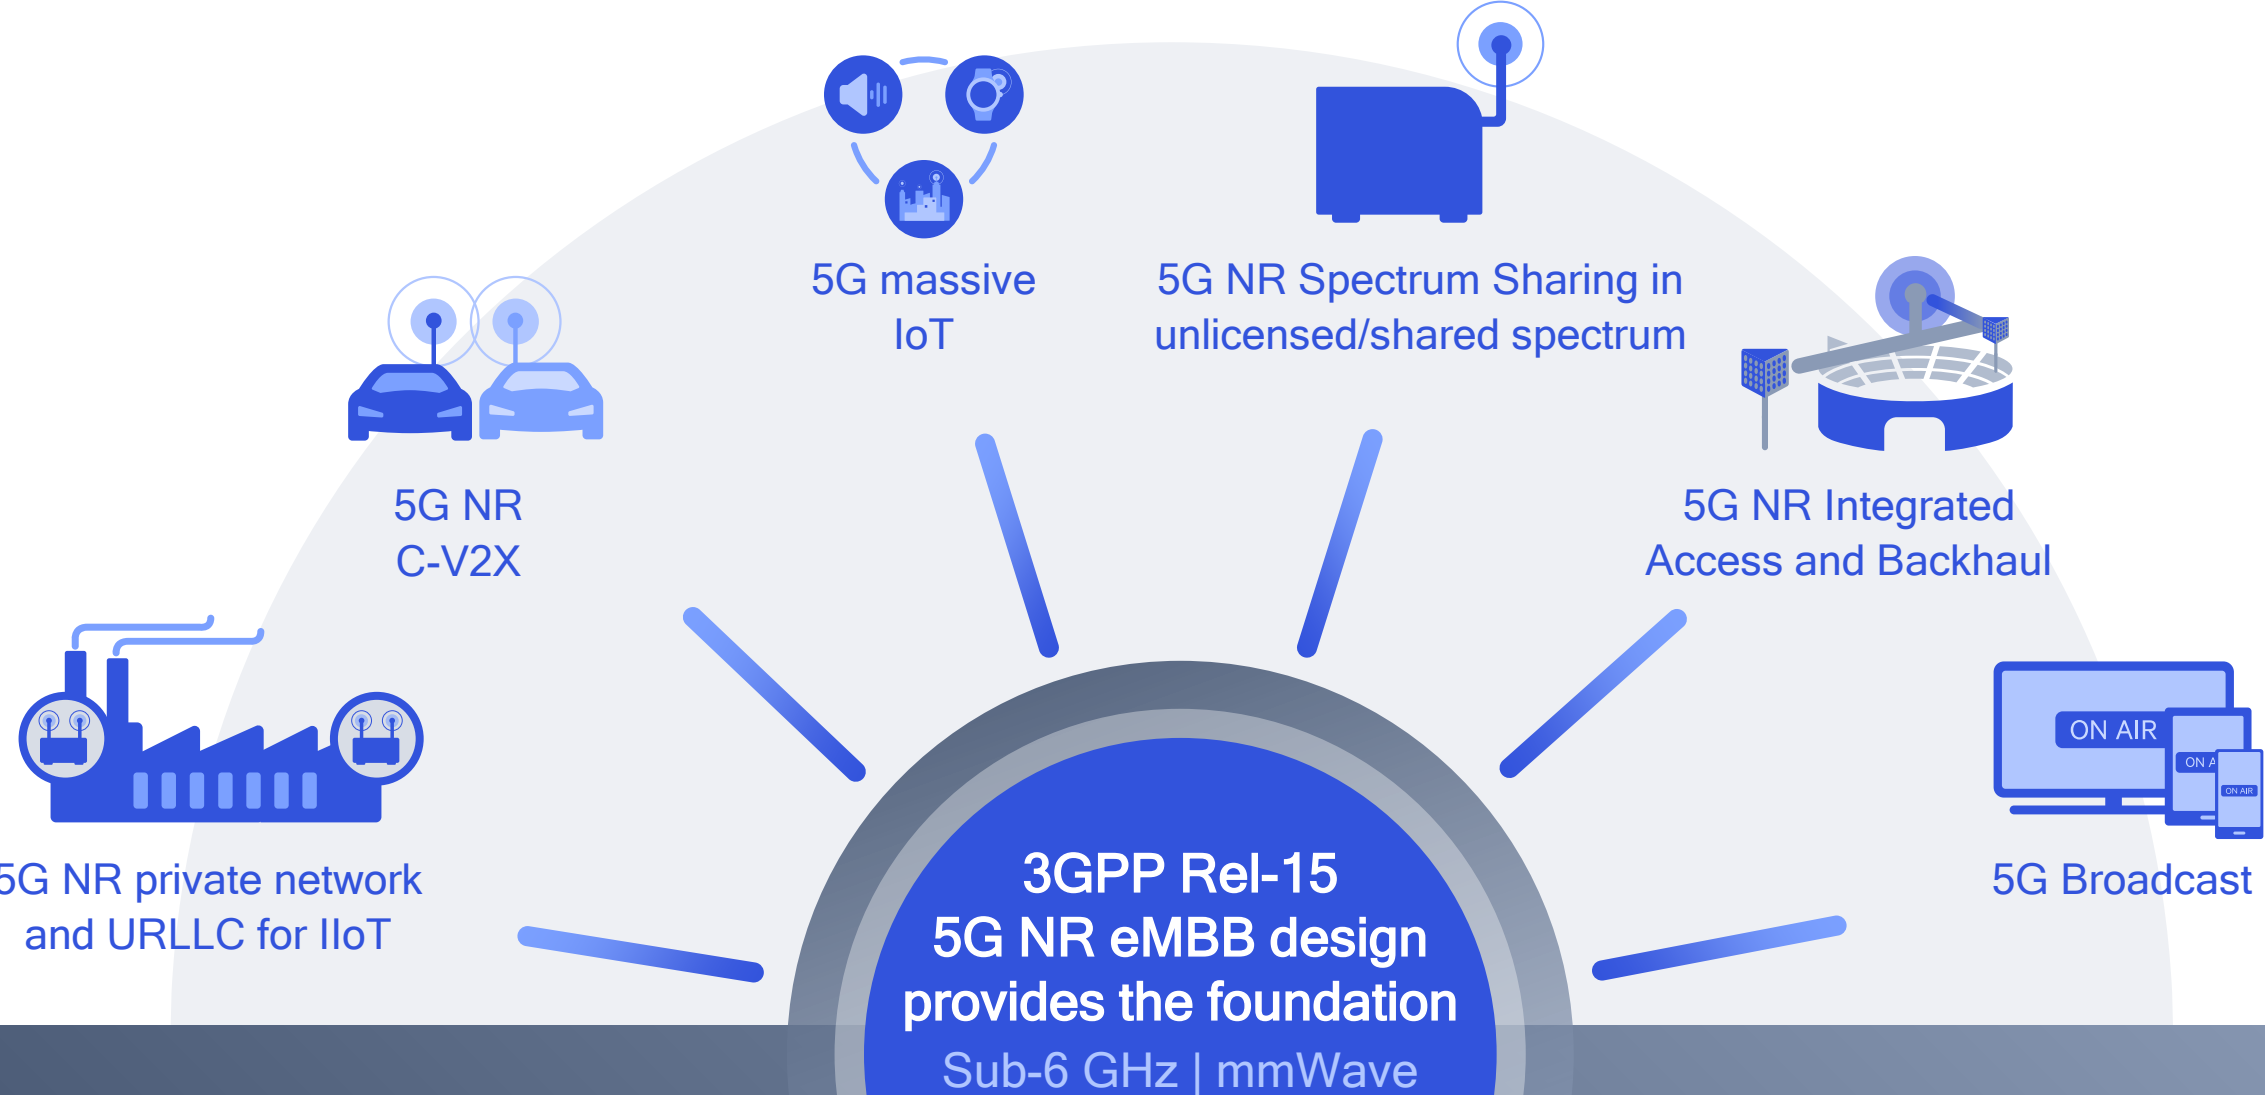

5G will expand the mobile ecosystem to new industries

* The 5G Economy, an independent study from IHS Markit, Penn Schoen Berland and Berkeley Research Group, commissioned by Qualcomm

Powering the digital economy
>\$12 Trillion
 In goods and services by 2035*

Driving a rich 5G NR technology roadmap beyond eMBB

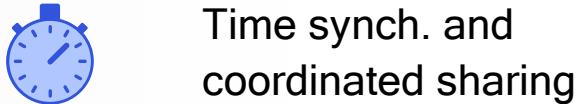

5G NR – opportunity for new spectrum sharing paradigms

Building on spectrum sharing technologies that we are pioneering today for LTE

Evolution Path

Revolution Path

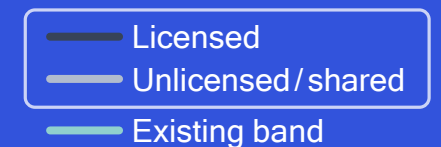

Designed for diverse spectrum bands/types

Global snapshot of 5G spectrum bands allocated or targeted

New 5G band

Demonstrating the potential new 5G NR spectrum sharing paradigms

Utilizes 5G NR spectrum sharing prototype – designed to also support testing of 5G NR in unlicensed spectrum

Significant performance gains utilizing advanced intra-operator CoMP and inter-operator SDM techniques

COMP = Coordinated Multi-Point
SDM = Spatial Domain Multiplexing

Industry-first demo of wireless PROFINET Industrial Ethernet over 5G NR

Showcases precise command-and-control of high-demand factory apps

Previews new use cases for 5G NR URLLC with sub-millisecond latencies

Highlights factory automation use case with 5G NR Private Networks

Enables wireline replacement and reconfigurable factories: a key concept of Industry 4.0

V2V

Vehicle-to-vehicle
e.g., collision avoidance safety systems

V2I

Vehicle-to-infrastructure
e.g., traffic signal timing/priority

V2P

Vehicle-to-pedestrian
e.g., safety alerts to pedestrians, bicyclists

V2N

Vehicle-to-network
e.g., real-time traffic/routing, cloud services

Enhanced range and reliability for direct communication without network assistance

C-V2X

Establishes the foundation for safety use cases and a continued 5G NR C-V2X evolution for future autonomous vehicles

- ✓ C-V2X Release 14 completed in 2017
- 5G Broad industry support – 5GAA
- 🌐 Global trials started in 2017
- 🚗 Our 1st announced C-V2X product in September, 2017
