# About the GSMA

THE GSMA  
WAS FOUNDED IN  
**1987**

15 OFFICES  
WORLDWIDE

SHANGHAI

SAN FRANCISCO

BEIJING

SAO PAULO

NAIROBI

NEW DELHI

LONDON

DUBAI

ATLANTA

BRUSSELS

BARCELONA

HONG KONG

BRASILIA

BUENOS AIRES

Connecting Everyone and  
Everything to a #BetterFuture

The mobile industry is the  
first to formally commit  
to the UN Sustainable  
Development Goals

The GSMA  
represents  
the interests  
of mobile  
operators  
worldwide

MORE  
THAN  
**750**  
MOBILE  
OPERATORS

WITH OVER  
**350**  
COMPANIES  
in the broader mobile ecosystem

The world's leading mobile industry events,  
MWC Barcelona, MWC Shanghai and  
MWC Americas, together attract nearly

**192,000**  
people from across the globe each year

The GSMA works to deliver a regulatory environment  
that creates value for consumers by engaging  
regularly with:

MINISTRIES  
OF TELECOMS

TELECOMS  
REGULATORY  
AUTHORITIES

INTERNATIONAL &  
NON-GOVERNMENTAL  
ORGANISATIONS

CONNECTING  
**23,000+**  
Industry Experts

Exclusively for GSMA Members,  
InfoCentre<sup>2</sup> is your place to  
connect with a global  
community of industry experts

GSMA Working Groups  
provide frameworks and  
standards in commercial,  
operational and  
technical matters that help  
maintain and advance  
mobile industry ecosystems

**8.7 bn+**

MOBILE CONNECTIONS  
WORLDWIDE

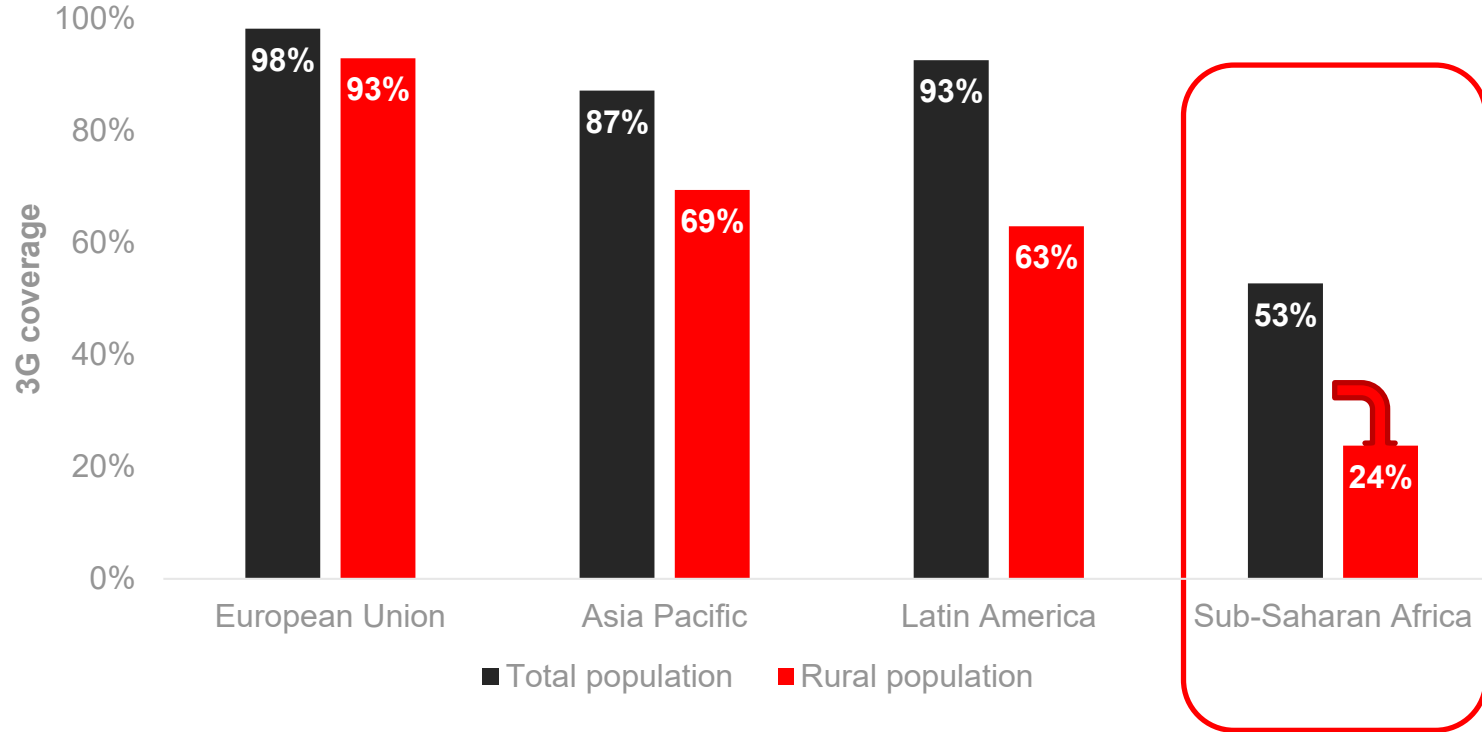

# In Sub-Saharan Africa the number one barrier for connectivity is the 40% of uncovered population

# Lack of coverage is more acute in rural areas

Source: GSMA 2017

# Factors impacting service extension in uncovered areas

# These factors have negative implications for the business case in rural areas

## FACT #1

**1.3x  
more  
Required  
CAPEX per  
site**

Remote site vs urban site

## FACT #2

**2x more  
Required  
OPEX per  
site**

Remote site vs urban  
site

## FACT #3

**10x less  
Revenues  
per site**

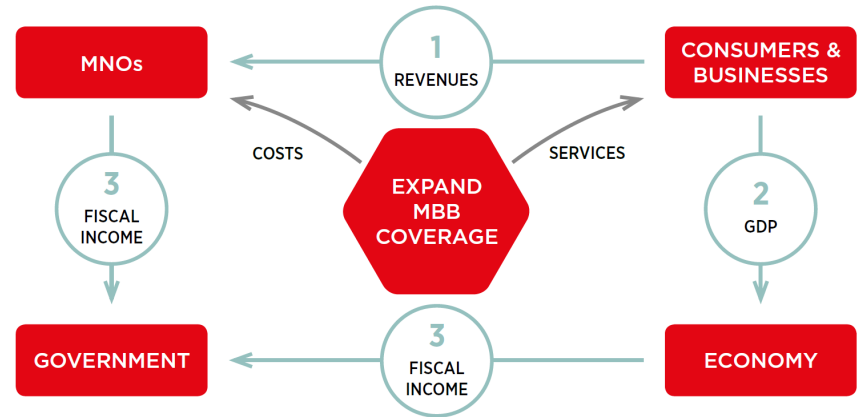

Remote site vs urban  
site

# But Improving connectivity is key to supporting the economic growth in emerging economies

- New Services
- New Jobs
- New Business Opportunities
- Better Integration at National Level
- GDP growth
- Increased Direct and Indirect Fiscal Income

**➔ +10% MBB Adoption = +1.4% GDP growth**

# A purpose-built regulatory and policy framework is needed to help bridge the coverage gap

Components of an investment-friendly Framework

# Infrastructure sharing

## Coherent regulatory framework

Regulatory governance

Cross-sector deployment coordination

Administrative efficiency at local level

Spectrum policy

Infrastructure sharing

- Infrastructure sharing allows mobile operators to decrease the costs and risk of covering rural areas.
- Active and passive infrastructure sharing should be allowed under primary legislation and encouraged by regulators on a **voluntary basis**.

Element of network shared	Passive sharing	MORAN	MOCN	Roaming
Site + mast	X	X	X	X
Power	X	X	X	X
Antennas + BTS + RNC + Backhaul		X	X	X
Spectrum			X	X

# Spectrum policy

## Coherent regulatory framework

Regulatory governance

Cross-sector deployment coordination

Administrative efficiency at local level

Spectrum policy

Infrastructure sharing

- A spectrum policy that facilitates rural coverage must:
  - Release sufficient spectrum below 1 GHz.
  - Follow an established roadmap.
  - Facilitate secondary spectrum markets.
  - Use technology-neutral licences.
  - Adopt a Universal-access-friendly spectrum pricing policy.
  - Review Backhaul Spectrum pricing and licensing practices.

# Administrative Efficiency

## Coherent regulatory framework

Regulatory governance

Cross-sector deployment coordination

Administrative efficiency at local level

Spectrum policy

Infrastructure sharing

- Local authorities play an important role in facilitating the deployment of mobile infrastructure.
- National authorities should play an active role in homogenising the processes across municipalities.
- Four priority areas of work:
  - Planning regulations.
  - Health and safety regulation (exposure to RF radiation).
  - BTS deployment permit procedures.
  - Rules for access to land and public infrastructure.

# Cross sector deployment coordination

## Coherent regulatory framework

Regulatory governance

Cross-sector deployment coordination

Administrative efficiency at local level

Spectrum policy

Infrastructure sharing

- Coordination across different sectors aids in the reduction of the costs of deploying mobile infrastructure in rural areas.
- Considerations to facilitate coordination:
  - Creating a single point of information for granting permits
  - Promoting initiatives to map infrastructure
  - Enforcing advance notification of civil works for infrastructure deployment (roads, sanitation, energy, telecom).

# Regulatory Governance

## Coherent regulatory framework

Regulatory governance

Cross-sector deployment coordination

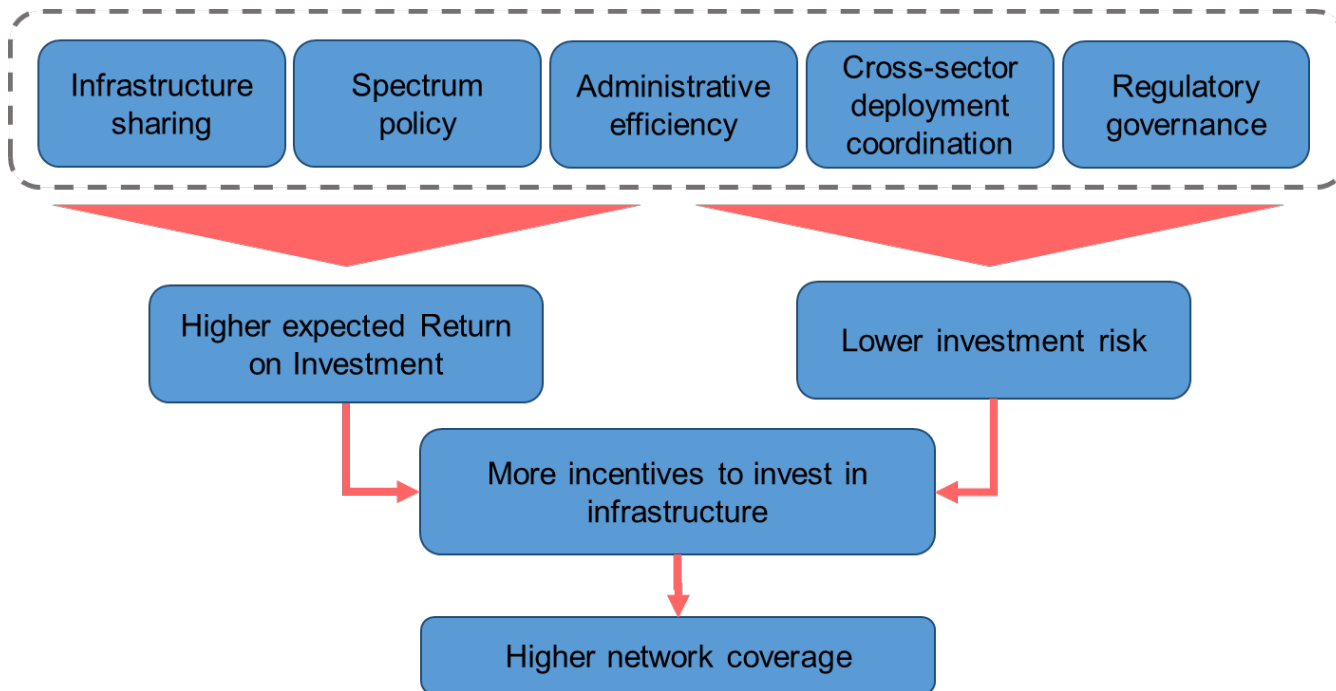

Administrative efficiency at local level

Spectrum policy

Infrastructure sharing

- Predictable and consistent regulation is crucial to giving operators the confidence to make long-term investments in rural areas.
- Ensuring consistency and predictability requires an independent regulator focused on long-term objectives.
- Regulator independence
  - Institutional
  - Functional
  - Hierarchical
  - Financial

# An investment-friendly regulatory framework will boost coverage

## In summary

- Sub-Saharan Africa requires large investments to bring Mobile broadband to rural communities.
- Mobile operators are already investing in Infrastructure sharing agreements in rural areas and innovative cost-reducing technology. But they can invest more.
- Making these investments will rely on having an investment-friendly regulatory framework that provides certainty of reasonable returns over the long-term.
- Closing the digital divide in Sub-Saharan Africa depends on the capacity of governments to make the required adjustments and create a regulatory framework aligned with their digital objectives.

# Thank You
